1

# Mathematics

- When you reflect on your own experiences learning mathematics, what specific memories come to mind?
- Think about a time when you enjoyed mathematics. Why do you think you enjoyed it?
- Was there a time when you thought mathematics was hard or you couldn't understand it?

2

## Mathematics

- What are some things that stand out for you from people's remembrances and stories?
- Which ones resonated with you? Which ones surprised you?
- What are some themes that emerged from these experiences?
