A Foreword from the Co-Director of the
Center for Child and Family Studies, WestEd

“Preschoolers’ understanding of history and social sciences naturally derives from their expanding knowledge of the world and their place in it . . . .”
California Department of Education, 2013, p. 44

“Children have a sense of wonder and natural curiosity about objects and events in their environment. Just like scientists, they seek information and actively explore and investigate the world around them, try things out to see what happens, and confirm or adjust their expectations . . . .”
California Department of Education, 2013, p. 136

The California Preschool Curriculum Framework, Volume 3 gives guidance on how teachers can support preschoolers’ growing understanding of history and social sciences and science concepts and scientific inquiry. It focuses on experiences, environments and materials that support children’s developing sense of self, knowledge of the larger social world, and basic concepts of time and place. In addition to offering strategies for planning learning experiences in the areas of history and social sciences, Volume 3 of the California Preschool Curriculum Framework addresses curriculum planning in the science domain. With preschool teachers’ intentional planning and guidance, children’s explorations of objects and nature can become rich opportunities to engage in scientific inquiry and deepen their understanding of objects and events in the world.

This document, the CDE/ECE Faculty Initiative Project Instructional Guide for the California Preschool Curriculum Framework, Volume 3, is the latest installment of practical, user-friendly resources developed by the Faculty Initiative Project. Seeking to forge a strong link between the California Department of Education’s (CDE) early care and education quality improvement activities and higher education in California, the Faculty Initiative Project has been supporting the efforts of faculty to infuse information from the CDE’s activities into their course work. The instructional guides, which are being created collaboratively with higher education faculty, are an essential component of the Faculty Initiative Project’s work.

Higher education faculty members will readily recognize the content of the preschool curriculum framework, for many of the principles, concepts, and strategies it presents reflect what they already teach. This instructional guide is designed to meet the needs of faculty in a wide variety of situations. Following a widely used teaching and learning sequence, it offers open-ended activities that can be used in their current form or adapted. In essence, the instructional guide provides an easy-to-use, ready-to-go set of comprehensive resources, including in-class activities and handouts, that relate to all instructional levels, from an introductory class to master’s level graduate study.

My colleagues and I at WestEd greatly appreciate our collaborative partnership with the Faculty Initiative Project advisors and consultants from higher education. It is our hope that this instructional guide will help faculty foster a broad and deep understanding of early learning and development in their students—tomorrow’s early childhood educators. Together with the CDE, we look forward to continuing our work with higher education to ensure that all young children have teachers who possess the knowledge, skills, and dispositions necessary to provide high quality early care and education.

Peter L. Mangione
Co-Director, Center for Child and Family Studies
WestEd
Acknowledgments

The creation of this instructional guide would not have been possible without the expertise and contributions of the many talented people who were involved. We extend our sincere gratitude to this group of dedicated professionals. They included the (1) Faculty Initiative Project Core Consultants, (2) The Faculty Initiative Project Advisory Group, (3) Staff from the California Department of Education/Early Education and Support Division (formerly Child Development Division), and (4) Project staff from WestEd’s Center for Child and Family Studies.

Peter Mangione, Co-Director of the Center for Child and Family Studies, provided invaluable academic and practical perspectives affecting all aspects of this instructional guide.

The Faculty Initiative Project, with Caroline Pietrangelo Owens as Project Director, works with a group of core consultants.

Advisors and consultants include faculty from California Community Colleges, California State University, and University of California systems and key specialists in the field of early childhood education.

Core Consultants

Lead consultant and lead writer of this Instructional Guide: 
Helen Heal, Consultant

Consultant, co-writer and editor of this Instructional Guide: 
Judy Higuchi, Consultant

Consultant and editorial contributor to the Guide, including PowerPoint Presentations: 
Erin Gordon Grady, Consultant

Major contributor, including indentifying the CAP Student Learning Outcomes: 
Terri Hutton, Butte College

Contributions were also made by these core consultants: 
Sydney Fisher Larson, College of the Redwoods 
Senta Greene, Pacific Oaks College and College of the Canyons 
Carrie Rothstein-Fisch, California State University, Northridge

Faculty Initiative Project Advisory Group Members

Joseph Aguerreberre, California State University Chancellor’s Office 
Lucy Berger, California Community Colleges Chancellor’s Office 
Zhe Chen, University of California, Davis 
Jan DeLapp, American River College 
Peggy Dodge, College of Marin 
Nancy Herota, California Preschool Instructional Network (CPIN) 
Terri Hutton, Butte College 
Mary Jo Jordan, Porterville Community College
Faculty Initiative Project Advisory Group Members (continued)
Kelly O. Lake, Santa Barbara City College
Mary Jane Maguire-Fong, American River College
Margie Perez-Sesser, Cuesta College
Kailzer Puglia, Pasadena City College
Shulamit Ritblatt, California State University, San Diego
James Rodriguez, California State University, Fullerton
Moises Roman, University of California, Los Angeles
Lupita M. Tannatt, Santa Monica Community College
Nadiyah Taylor, Las Positas College
Alison Wishard Guerra, University of California, San Diego

California Department of Education
Thanks are also extended to the following members of the Early Education and Support Division (formerly CDD):
Debra McMannis, Director, Early Education and Support Division
Cecelia Fisher-Dahms, Administrator, Quality Improvement Office
Luis Rios, Consultant, Early Education and Support Division
Laura Bridges, Consultant, Early Education and Support Division

WestEd, Center for Child and Family Studies Staff
Peter Mangione, Co-Director, Center for Child and Family Studies
Caroline Pietrangelo Owens, Director, Faculty Initiative Project
Christine Moscou, Project Assistant, Faculty Initiative Project

Christine Moscou, Faculty Initiative Project Assistant, was a major contributor to the complete process of the creation, development, formatting, and editing of the instructional guide. Special acknowledgment goes to Christine for her exceptional skills, dedication, and comprehensive contributions.
# Table of Contents

*Instructional Guide for the California Preschool Curriculum Framework, Volume 3 (PCF, V3)*

## Introduction to the Instructional Guide

- Online Options ................................................................................................. 25, 28, 29, 30
- Handout 1: History–Social Science and Science Foundations ................. 32
Key Topic 2: Getting to Know the Eight Overarching Principles

Students become familiar with each of the eight overarching principles that guided the development of the California Preschool Curriculum Framework, Volume 3.

- Preview of Key Topic 2 ................................................................. 42
- Key Topic 2 .................................................................................. 44
- Online Options .......................................................................... 45, 46
- Handout 1: Exploring the Overarching Principles .................. 50
- Handout 2: Relationships of the Overarching Principles to the Domain Guiding Principles ....................................................... 51

Key Topic 3: Getting to Know the Curriculum-Planning Process

Students become acquainted with the curriculum-planning process and its components as described in Chapter 1 of the California Preschool Curriculum Framework, Volume 3.

- Preview of Key Topic 3 ................................................................. 52
- Key Topic 3 .................................................................................. 54
- Online Options .......................................................................... 55, 56, 57, 59
- Handout 1: The Reflective Curriculum Planning Process ....... 60

Unit 2
History–Social Science Domain

Getting Ready for the Unit and Connecting to Experience

Students acquire an increased understanding of the history–social science domain by recalling their early experiences related to the domain substrands and how these early experiences may have influenced their interests and activities as they grew older.

- Preview of Getting Ready for Unit 2 ........................................ 61
- Getting Ready for Unit 2 .............................................................. 63

### Unit 4
California Preschool Curriculum Framework as a Resource for Planning and Integrating Curriculum

#### Key Topic 1: Integrating the History–Social Science Domain or Science Domain with Other Domains

Students become familiar with the integrated nature of children’s learning by exploring how the environments and materials or interactions and strategies in the history–social science domain or science domain can also support children’s learning in one or more of the other eight domains.

- Preview of Key Topic 1 .......................................................... 228
- Key Topic 1 ............................................................................. 230
- Online Options .................................................................... 232, 233
- Handout 1: Integrated Learning Opportunities for Young Children Across Domains: Environments and Materials in the History–Social Science Domain .................................................. 236

CDE/ECE Faculty Initiative Project Instructional Guide

California Preschool Curriculum Framework, Volume 3

Introduction to the Instructional Guide
Introduction to the Faculty Initiative Project: 
Supporting Faculty

Responding to early childhood priorities in California, the Early Education and Support Division of the California Department of Education has developed initiatives and published materials to support practitioners, young children, and families involved in early childhood education programs. The Faculty Initiative Project has been charged with supporting faculty in institutions of higher education across the state as they infuse these initiatives into their course work.

The purpose of the California Department of Education/Early Childhood Education Faculty Initiative Project is to align and integrate essential content and competencies of key California Department of Education/Early Education and Support Division materials and initiatives with core early childhood education curriculum of the California Community College and the California State University systems. Faculty will have information and resources to integrate content of the California Department of Education initiatives and publications into unit-bearing course work required for the attainment of college certificates, permits granted by the Commission for Teacher Credentialing, and campus graduation requirements.

About the Instructional Guides: 
Key Topics, Active Learning Experiences, and Resources for Higher Education Faculty

To support faculty as they prepare the early care and education workforce in California to successfully meet the challenges and requirements of implementing recent Early Education and Support Division initiatives and publications, the Faculty Initiative Project has been developing instructional guides to accompany several of these initiatives and publications. These instructional guides are intended to connect professional development in systems of higher education with the content of the Early Education and Support Division initiatives and the following publications:

- *California Preschool Learning Foundations, Volume 1*

- *California Preschool Learning Foundations, Volume 2*

- *California Preschool Learning Foundations, Volume 3*

- *California Preschool Curriculum Framework, Volume 1*
• California Preschool Curriculum Framework, Volume 2
• California Preschool Curriculum Framework, Volume 3

Instructional guides have been developed for all of the publications listed above, including this Instructional Guide for the California Preschool Curriculum Framework, Volume 3. They all are available on the Faculty Initiative Project Web site, http://facultyinitiative.wested.org/.

The instructional guides are developed to

• support the greatest possible utility across the complexity of California’s systems of higher education;
• maintain fidelity to the content of the Early Education and Support Division’s initiatives;
• adhere to commonly accepted principles of adult learning;
• provide maximum flexibility for faculty;
• support faculty as decision makers; and
• allow faculty to select curricular content that suits their particular students, courses, and program needs.

The instructional guides are intended to help faculty acquaint college students who are preparing for work in preschool settings with Early Education and Support Division publications. In the instructional guides, the word “students” refers to college students and not children in the preschool setting.

Purpose of the Instructional Guide for the California Preschool Curriculum Framework, Volume 3

The purpose of the Faculty Initiative Project’s Instructional Guide for the California Preschool Curriculum Framework, Volume 3 is to support faculty as they deepen their students’ familiarity with the content of the publication and to provide students with understanding and practice in how to use the California Preschool Curriculum Framework, Volume 3 as a resource in planning curriculum and reflecting on intentional curriculum decisions. This instructional guide is designed to encourage students to consistently open and explore the California Preschool Curriculum Framework, Volume 3.
Organization of the Publication:
California Preschool Curriculum Framework, Volume 3

The California Preschool Curriculum Framework, Volume 3 has an organization that parallels that of the California Preschool Learning Foundations, Volume 3. Both of these publications address two domains of early learning and development: history–social science and science. Each domain has a specific organizational format, but generally domains are organized as strands and substrands. Within each domain of the California Preschool Curriculum Framework, Volume 3 are sections relating to domain guiding principles, to environments and materials, and to interactions and strategies that are appropriate for implementing. There are also vignettes to illustrate the strategies and interactions as well as teachable moments and planning learning opportunities. Each domain has reflective questions and ideas for connecting to families. In addition, there is information in each domain that is specific to that domain.

The California Preschool Curriculum Framework, Volume 3 also contains an introductory chapter with contextual information, information relating to several critical topics when planning curriculum, and a description of eight overarching principles that guided the development of the framework. This introduction parallels the introduction in the California Preschool Curriculum Framework, Volume 1 and the California Preschool Curriculum Framework, Volume 2, with some adjustments for the domain content of the earlier volumes. The eight overarching principles are consistent for all three volumes of the curriculum framework.

Organization of the Instructional Guide for the California Preschool Curriculum Framework, Volume 3:
Flexible Use for Faculty in Individual Courses and Across Programs

Like the instructional guide for previous volumes of the curriculum framework, the Instructional Guide for the California Preschool Curriculum Framework, Volume 3 is organized into instructional units. Each unit then consists of key topics. This design enables faculty to use the instructional guide in different courses in a variety of ways. The intent is to support faculty as decision makers as they piece together what will work in an individual course or across a program.

The Organizational Chart for the Instructional Guide for the California Preschool Curriculum Framework, Volume 3 illustrates the organization of the instructional guide. The location of this chart can be found in the Table of Contents of this instructional guide. This graphic suggests how faculty can explore individual domains or how they can explore some topics—such as environment and materials or interactions and strategies—across domains. For example, each
domain has a key topic for environments and materials and one for interactions and strategies, so faculty could choose to work with environments and materials and/or with interactions and strategies across both domains.

To support working across domains, both in this volume and across domains in earlier volumes, some of the suggested instructional methodology for one domain could be used in other domains. This makes it easier for faculty to expand that topic for work across all domains. This is especially true for the key topic called “Universal Design, Individualizing, and Family Partnerships.” In all domain units, the instructional design for this key topic is essentially the same with adjustments for the specific content of each domain.

This approach also supports faculty if they choose to work individually in each domain and ensures that students are getting essential information and experience in depth for that domain. Some repetition of instructional design across key topics is also intended to deepen habits of exploration and reflection that students then carry into their work.

Topics in Chapter 1 of the *California Preschool Curriculum Framework, Volume 3*, the introduction to Volume 3 of the framework, are addressed in Unit 1 of this instructional guide. Unit 1 can be used with Units 2 and/or 3 of the instructional guide, or it can be used independently of them as an overview of the *California Preschool Curriculum Framework, Volume 3*.

Units 2 and 3 of the instructional guide relate to the domains of early learning and development that are explored in the *California Preschool Curriculum Framework, Volume 3*: history–social science and science.

Unit 4 of the instructional guide provides support and practice for students in understanding how to use the *California Preschool Curriculum Framework, Volume 3* as a resource for curriculum decisions in their work. For most students, Unit 4 will work best after they are familiar with the domain content in the *California Preschool Curriculum Framework, Volume 3* and in the instructional guide. However, there will be situations, perhaps with more experienced students, where Unit 4 can be used to familiarize students with the domains within the context of curriculum planning.

Wherever possible within the instructional guide, relevant page numbers are provided as well as possible connections to the previous publications, including the *Preschool English Learners: Principles and Practices to Promote Language, Literacy, and Learning—A Resource Guide (Second Edition)*. Key topics, active earning experiences, approaches, and strategies are described broadly enough so that faculty can choose, adapt, tailor, and shape these to their own preferred teaching styles, students, and program needs. This flexibility is offered in the hope of providing maximum utility for the initiatives and publications that the
Early Education and Support Division is preparing for the child care community in California.

Note: When the *Preschool English Learners: Principles and Practices to Promote Language, Literacy, and Learning—A Resource Guide (Second Edition)* and the first volumes of the *California Preschool Learning Foundations* and the *California Preschool Curriculum Framework* were published, the terms “preschool English learners” and “English-language development” were used. Please note that this instructional guide is using the term “young dual language learners” instead of “preschool English learners” or “young English language learners” in order to be consistent with the current policy of the California Department of Education/Early Education and Support Division. However, the domain in the foundations and curriculum framework is still referred to as the English-language development domain.

**Structure of the Key Topics in Each Unit:**

*Preview Pages and Core Instructional Components*

Each key topic begins with Preview Pages that include the Focus Statement for that key topic, the Curriculum Alignment Project’s (CAP) Courses/Student Learning Outcomes for that key topic, Instructional Methodologies for that key topic, and California Early Childhood Educator Competency Areas to Consider for that key topic.

Following the Preview Pages, the key topic opens with a section titled “Before You Start.” This section provides an overview of the activity to help faculty decide if the key topics fit into their purpose and goals for a class session. Background information and a few tips for faculty preparation or reflection are also included.

Following this section, the materials in each unit and key topic adhere to a framework of core instructional components and are organized into the following six components:

1. **Motivator and Connection to Experience**
   These connect the content of the unit to the personal and/or professional experience of the learner. It establishes motivation by embedding the topic within a situation or question with which the learner might be familiar and suggests ways to extend learning by providing challenges or issues to consider. The “Motivator and Connection to Experience” may include the following elements:
   - **Critical question**
   - **Challenging situation: short vignette that might be text, video, or audio**
   - **Challenging quote or text**
The “Motivator and Connection to Experience” is often accompanied by a set of guiding questions for reflection. These are not assessment questions but are intended to engage the learner in remembering and reflecting on—not evaluating—their own experiences, feelings, personal actions, or actions of others.

2. Information Delivery
   For each key topic, this component is designed to introduce specific content to students in the class setting. The delivery of information may be brief or long and may be composed of a single topic or several related topics, such as key concepts within a given chapter. “Information Delivery” may include lecture content, reading assignments, and/or location of key information in the *California Preschool Curriculum Framework, Volume 3* as well as the preschool learning foundations or the first two volumes of the curriculum framework.

3. Active Learning
   In some previous instructional guides there were learning experiences designated to be used in class or out of class. In this instructional guide, these are part of the “Active Learning” instructional components. Many of these can be fashioned into work that is done in class or out of class based on faculty determination of what will work best for a particular situation. The intent of the suggested active learning is to engage students in the key topic through learning experiences that will be active, thoughtful, challenging, and relevant to the content. This work might include, but is not limited to, these instructional approaches:
   - Class discussion
   - Small group work
   - Demonstrations
   - Observations
   - Interviews or panels
   - Internet resources
   - Research on a particular topic

4. Questions for Reflection
   These provide opportunities for students to reflect on the experience of working with the key topic. There are also questions for reflection at the end of each strand in the *California Preschool Curriculum Framework, Volume 3*,
but they differ from the instructional guide’s questions in that the curriculum framework questions generally ask students to reflect on the information in the framework. Across many but not all of the key topics in the instructional guide is a set of questions with a repeated structure. This is intentional and is designed to impart to students a useful set of questions to carry with them for reflection in their current or future work.

5. **Deeper Understanding**
This segment provides suggestions for independent research and/or ways to take students deeper into some important issues or concepts related to the key topic.

6. **Online Options**
Suggestions are made for ways to implement or adapt active learning to student work that is done online. This might be in online courses or as online assignments for face-to-face courses. These are not meant to be exhaustive but to indicate the kinds of adaptations that can be made to support faculty and students who work online.

**PowerPoint Presentations**

This symbol appears in the left margin of the instructional components through most of the key topics in the instructional guide. This symbol indicates that there are PowerPoint slides that correspond to a particular part of the “Active Learning” component of the key topic.

**Organization of Each Active Learning Component: Flexible Segments**

**Active Learning**
This component describes learning sessions that can be conducted within the time frame of a single class or over several class sessions by individuals, pairs, small groups, or the whole class. Each “Active Learning” component is organized in a sequence by which the work can unfold for students as they move progressively deeper into the topic. These learning sessions are intended to be active, thoughtful, challenging, and relevant to the content. “Active Learning” is further divided into the following segments:

- **Getting it started**
- **Keeping it going**
- **Taking it further**
• Putting it together

• Another approach

Not every key topic contains all of these segments of “Active Learning.” They are included when they are relevant and enhance learning or instructional possibilities.

Working Across the Nine Domains

Because Volume 3 of the California Preschool Curriculum Framework completes the publication of the preschool curriculum framework for all nine domains of learning for preschoolers in California’s Early Learning and Development System, it presents some opportunities to work across all of the nine domains contained in Volumes 1, 2, and 3 of the California Preschool Curriculum Framework. There are many ways to do this, but this instructional guide, combined with previous instructional guides, provides some explicit ways to address all nine domains.

First, there is the possibility, mentioned previously, of working across environments and materials in all domains or across interactions and strategies in all domains. This approach is specifically supported in Unit 4 of this instructional guide.

Additionally, Appendix C and Appendix D of this instructional guide are provided as comprehensive resources.

There are also opportunities in each domain in this instructional guide that can be used, individually or in combination, to support students in exploring some ways in which the domains are connected. This is intended to support an understanding that learning in young children is integrated and multifaceted. Rather than attempting to connect each domain to every other domain, learning experiences were developed to highlight selected connections.

Student Learning Outcomes

To support faculty in decisions regarding how and where they can best use the California Curriculum Framework, Volume 3 in their course work or across their program, the student learning outcomes developed by the Curriculum Alignment Project for the eight core lower division early childhood courses have been mapped onto each key topic in this instructional guide for consideration. More information about the Curriculum Alignment Project and the student learning
outcomes can be found at https://www.childdevelopment.org/cs/cdtc/print/htdocs/services_cap.htm. At the beginning of each key topic, the Preview Pages will provide the list of courses that have been mapped onto the specific key topic.

The Curriculum Alignment Project's student learning outcomes, objectives, and examples of course content and topics indicated for this instructional guide for the California Preschool Curriculum Framework, Volume 3 can be found in Appendix A of this instructional guide. Refer to the Student Learning Outcomes Index for an overview of this instructional guide mapping listed by unit/domain. The location of the Student Learning Outcomes Index is listed in the Table of Contents for this instructional guide.

These student learning outcomes are organized by the Curriculum Alignment Project's core lower division early childhood courses. This is not an exhaustive list, and faculty might find ways to use the key topics to address student learning outcomes in ways other than what has been indexed. Working through these selected key topics does not guarantee the achievement of any student learning outcome or objective; it is understood that students achieve student outcomes through repeated engagement with information and experiences that build competence.

To assist faculty in using these student learning outcomes as supports for decision making, the instructional guide key topics are indexed first by units and domains, then by the Curriculum Alignment Project's courses and student learning outcomes so that faculty can select what is most relevant to their particular needs. Student learning outcomes are matched to specific key topics in the instructional guide that will support attainment of that outcome. Not all student learning outcomes map onto the specific content of the instructional guide.

Refer to the Student Learning Outcomes Index for an overview of this instructional guide mapping listed by units/domains. Refer to Appendix A of this instructional guide for more detailed and specific student learning outcomes, objectives, and examples of course content and topics.
**Instructional Methodologies**

Each key topic is written to include a variety of instructional methodologies. This is intended to provide varied learning experiences for students as they encounter the curriculum framework. It also provides another variable for faculty to use in deciding which key topics will best suit the needs of their students and programs. In this instructional guide, these methodologies are identified for each key topic and are listed on the key topic Preview Pages. These instructional methodologies are also indexed so that faculty can get an overview of which methodologies are used across all units and key topics. The index also includes working definitions of each of the instructional methodologies used in the instructional guide. The location of the Instructional Methodologies Index is listed in the Table of Contents for this instructional guide.

**California Early Childhood Educator Competency Areas**

In this instructional guide, the competency areas of the California Early Childhood Educator Competencies are listed on the key topic Preview Pages. This list is titled “California Early Childhood Educator Competency Areas to Consider.” These are preliminary connections and are not meant to be exhaustive. Faculty will find more connections in their courses to both competency areas and competency contexts as they become more familiar with them. Competency areas are listed in this instructional guide as an initial exploration of how particular areas might be addressed through these key topics. There is no index for them in this instructional guide due to the preliminary nature of the mapping.

**Instructional Guide Resources: Appendixes**

To support the preparation of the early care and education workforce in California, this instructional guide offers several appendixes containing relevant content. To locate these appendixes, refer to the Table of Contents of this instructional guide.

**Appendix A** – “Student Learning Outcomes and CAP Lower Division Courses Mapped Onto the *Instructional Guide for the California Preschool Curriculum Framework, Volume 3*”

Because Volume 3 of the *California Preschool Curriculum Framework* completes the publication of the preschool curriculum framework for all nine domains of learning for preschoolers in California's Early Learning and Development System, it presents some opportunities to work across all of the nine domains contained in Volumes 1, 2, and 3 of the *California Preschool Curriculum Framework*.

The following appendixes provide comprehensive resources for faculty and students to work across all nine domains.
Appendix B – Summary of the *California Preschool Learning Foundations* All Nine Domains

Appendix C – Sample Environments and Materials for All Nine Domains of the *California Preschool Curriculum Framework*

Appendix D – Sample Interactions and Strategies for All Nine Domains of the *California Preschool Curriculum Framework*

Appendix E – Overarching Principles and Domain Guiding Principles All Nine Domains of the *California Preschool Curriculum Framework*

The following appendix provides links and resources for online access.

Appendix F – Related Links and Resources

For additional instructional guide resources, continue to check out the Faculty Initiative Project’s Web site at [http://facultyinitiative.wested.org/](http://facultyinitiative.wested.org/).

**Faculty Initiative Project Instructional Guide for the California Preschool Curriculum Framework, Volume 3**

DRAFT – 04-01-15 – Organizational Chart for the Instructional Guide

CDE/Early Education and Support Division and WestEd Center for Child and Family Studies

May be duplicated for educational purposes only.
Unit 2
History–Social Science Domain
Unit 2 – History–Social Science:
Getting Ready for the Unit and Connecting to Experience

Focus Statement

Students acquire an increased understanding of the history–social science domain by recalling their early experiences related to the domain substrands and how these early experiences may have influenced their interests and activities as they grew older.

Curriculum Alignment Project (CAP) Student Learning Outcomes

The Curriculum Alignment Project’s (CAP) lower division eight courses and student learning outcomes are mapped onto each instructional guide learning experience. See Appendix A for the specific student learning outcomes, objectives, and examples of course content and topics for the courses listed below.

- Child Growth and Development
- Child, Family and Community
- Introduction to Curriculum
- Principles and Practices of Teaching Young Children
- Teaching in a Diverse Society
- Practicum-Field Experience

Instructional Methodologies

- Class discussion
- Conversation grid
- Pairs or small groups
- Personal reflection
- Reflective discussion

California Early Childhood Educator Competency Areas to Consider

The Faculty Initiative Project will undertake a comprehensive process in the future to map the content of the instructional guides to the California Department of Education, Early Education and Support Division’s California Early Childhood Educator Competencies. The
“Competency Areas to Consider” below are listed in this instructional guide as a preliminary exploration of how particular competency areas might be addressed through these learning experiences.

- Child Development and Learning
- Culture, Diversity, and Equity
- Relationships, Interactions, and Guidance
- Family and Community Engagement
- Learning Environments and Curriculum
Unit 2 – History–Social Science:  
Getting Ready for the Unit and Connecting to Experience

Getting Ready for the Unit

The history–social science domain in the *California Preschool Curriculum Framework, Volume 3* is a companion to the same domain in the *California Preschool Learning Foundations, Volume 3* and has the same strands and substrands. There are five strands: Self and Society, Becoming a Preschool Community Member (Civics), Sense of Time (History), Sense of Place (Geography and Ecology), and Marketplace (Economics.) A list of the substrands for each strand can be found on page 50 of the *California Preschool Curriculum Framework, Volume 3* and is presented here as a reference:

Strand – Self and Society
Substrand 1.0 Culture and Diversity  
Substrand 2.0 Relationships  
Substrand 3.0 Social Roles and Occupations

Strand – Becoming a Preschool Community Member (Civics)
Substrand 1.0 Skills for Democratic Participation  
Substrand 2.0 Responsible Conduct  
Substrand 3.0 Fairness and Respect for Other People  
Substrand 4.0 Conflict Resolution

Strand – Sense of Time (History)
Substrand 1.0 Understanding Past Events  
Substrand 2.0 Anticipating and Planning Future Events  
Substrand 3.0 Personal History  
Substrand 4.0 Historical Changes in People and the World

Strand – Sense of Place (Geography and Ecology)
Substrand 1.0 Navigating Familiar Locations  
Substrand 2.0 Caring for the Natural World  
Substrand 3.0 Understanding the Physical World Through Drawings and Maps

Strand – Marketplace (Economics)
Substrand 1.0 Exchange
As with the domains in the first two volumes of the *California Preschool Curriculum Framework*, the history–social science domain contains guiding principles, characteristics or suggestions for environments and materials, vignettes, teachable moments, interactions and strategies, ideas for engaging families, research highlights, and questions for reflection. The 10 domain guiding principles and 12 characteristics of environments and materials are at the domain level; the research highlights are at the strand or substrand level; suggestions for engaging families and reflection questions are at the strand level; and the vignettes, teachable moments, and interactions and strategies are at the substrand level.

The concept of teaching history–social science to preschoolers might seem new or perhaps puzzling to many students who may think of history and social science as courses in history, geography, civics, and economics—topics not developmentally appropriate in a preschool setting. However, young children are in fact engaging in these topics as they explore and learn about the people and places in their homes and communities. The introduction to the history–social science domain on pages 44–45 of the *California Preschool Curriculum Framework, Volume 3* describes how children’s experiences during the preschool years contribute to an early understanding or “foundation for the study of history, culture, geography, economics, civics and citizenship, ecology, and the global environment that begins in the primary grades and continues throughout life” (*California Preschool Curriculum Framework, Volume 3*, p. 44). A more in-depth discussion of these foundational preschool experiences in history and social science is also on pages 1–4 of the *California Preschool Learning Foundations, Volume 3*.

Unit 2 in this instructional guide is designed to provide resources for faculty as they prepare their students to work with the history–social science domain of the *California Preschool Curriculum Framework, Volume 3*. The unit begins with a learning experience that focuses on our connections to history and social sciences content as young children and how these early experiences may have influenced our adult lives. Key Topic 1 provides opportunities to explore the rationale, organization, and guiding principles of the domain with three different subtopics. Key Topic 2 reviews the environments and materials that are recommended as supports for planning and delivering history–social science curriculum for young children. Key Topic 3 then provides students an opportunity to work with the recommended interactions and strategies for this domain. Key Topic 4 addresses the important issues of individualization, universal design, and partnering with families through three separate subtopics. Key Topic 5 can be used for strengthening students’ understanding of the research base and resources available for their work with the history–social science curriculum for young children.

Before beginning their work with the history–social science domain of the *California Preschool Curriculum Framework, Volume 3*, instructors may decide to provide students with an opportunity to increase their understanding of the domain foundations. The following learning experiences from the *Instructional Guide for the California Preschool Learning Foundations, Volume 3* can provide an introduction or review:
• History–Social Science Learning Experience 3: Piecing Together the History–Social Science Domain Content Puzzle

• History–Social Science Learning Experience 4: Exploring the History–Social Science Domain Through Vocabulary and Key Elements

• History–Social Science Learning Experience 6: Reviewing the Research and Rationale for the History–Social Science Domain

**Motivator and Connection to Experience**

**Before You Start**

Some students may not be as familiar with the history–social science domain as part of a preschool curriculum and how it helps prepare children for school and life. Therefore, it may be helpful for students to recall some of their own early experiences related to topics in history and the social sciences and then reflect on how these experiences helped them learn skills and knowledge that they used later in their lives. Students may also recognize how some of their current interests or activities may have had roots in these early childhood experiences.

Students might find it difficult to think of experiences that relate to the substrands in the history–social science domain, so it may be helpful to provide time to review the history–social science learning foundations and some of the examples. Some other examples of early experiences for the substrands are also provided in the “Getting it started” segment that may prompt students’ recall. Students may discover that they have a lot of rich experiences because of many factors such as family culture, values, and preferences; community opportunities; participation in preschool or child care programs; and opportunities to be with children and adults outside one’s immediate family.

It is also important to acknowledge that this learning experience may bring up some memories of experiences that were uncomfortable or not as positive for some students. Remind students that they can choose whatever experiences they wish to share during the discussions. Faculty may also consider planning a short break after the learning experience to allow students an opportunity to address any strong emotions that might have surfaced.

Handout 1, provided with this key topic, can be used for students to record their memories of their early experiences. Handout 2 is a conversation grid that students can use when sharing experiences with other students. Electronic versions of these handouts will be available when this instructional guide is online at [http://facultyinitiative.wested.org/](http://facultyinitiative.wested.org/).

If students do not have copies of the *California Preschool Curriculum Framework, Volume 3* and the *California Preschool Learning Foundations, Volume 3*, the Portable
If students are not already familiar with the history–social science domain, it may helpful to provide an opportunity for them to review the domain’s strands and substrands. This can be done by having them read the summary on pages 49–50 of the *California Preschool Curriculum Framework, Volume 3* or pages 1–4 of the *California Preschool Learning Foundations, Volume 3*.

The knowledge areas of the strands are described or defined on page 3 of the *California Preschool Learning Foundations, Volume 3*:

- **Self and Society** (Beginning to identify with how their family does things and understand that other families and people have ways of doing things that are different or similar to what their family does)

- **Civics** (how to live with others and how rules work, such as taking turns to go down the slide)

- **History** (events that happened in the past, even before they were born, such as when their mommy was a little girl)

- **Geography** (the location of familiar places in relation to each other, such as knowing the way to preschool or that the park is across the street from the grocery store) and the different kinds of places where people live

- **Ecology** (learning to take care of earth and animals [for example, not wasting water])

- **Economics** (a beginning understanding of money and the exchange of things and services, such as groceries purchased at the store)

**Getting it started**

Begin this learning experience with a discussion of what history–social science is in the preschool curriculum, based on some of the information suggested in the “Information Delivery” section. Instructors may want to encourage students to add examples from their own observations and interactions with preschool children.
It will be important for students to understand what each substrand means so that they will be able to identify links to adult interests and activities.

Then provide students with Handout 1 or ask them to make a list of the substrands with some space to write after each one. Ask students to recall some of their earliest memories about experiences they had that relate to the substrands. The following examples may prompt students’ memories:

Culture and Diversity
- Visiting a relative or friend who lives in another setting (e.g., urban/rural, apartment/single resident house) or whose family typically eats different kinds of foods

Relationships
- Having a first friend outside the family

Social Roles and Occupations
- Going to a parent’s place of work

Skills for Democratic Participation
- Playing a favorite game with other children

Responsible Conduct
- Being given a job at school or at home such as helping to set the table or put toys away

Fairness and Respect for Other People
- Noticing that an aunt brought a Mickey Mouse hat for each of her daughters and you

Conflict Resolution
- When staying overnight with several cousins, taking turns sleeping in the attic and in the bedroom

Understanding Past Events
- Talking about when a favorite uncle used to let you sit on the top of the refrigerator when you visited him

Anticipating and Planning Future Events
- Planning a special event such as a birthday party or visit to a relative’s or friend’s home, museum, park

Personal History
- Showing people that you could print your first name
Historical Changes in People and the World  
Learning about different family members’ histories or stories

Navigating Familiar Locations  
Having a favorite place to go to and recognizing a landmark by that place

Caring for the Natural World  
Planting or helping to take care of a plant or animal

Understanding the Physical World Through Drawings and Maps  
Drawing a picture of the houses on your block

Exchange  
Playing store or getting to pay for something at the store

Keeping it going
Students then individually write a memory for as many of the substrands as they can; these can be just a few words or a phrase or a simple drawing. Encourage students to try to think of things that happened when they were preschool age.

After students have completed their handouts, ask them to find one or two partners to share some of their memories. Remind them that they can choose to talk about only the ones they feel comfortable sharing but encourage them to try to compare memories for some of the same substrands.

Taking it further
After students have shared their memories, ask them to think about some of their current interests or activities that are related to the substrands. For example, some students may participate in an annual clean-up-the-park day or be active in a community organization. Discuss how some of their current interests may have begun with some of these early experiences. How were those interests nurtured or how did they evolve as they were growing up?

Online Options
Students could complete Handout 1 prior to class and post it online for instructor’s review. Students could then review their classmates’ handouts before class and be prepared to discuss the “Putting it together” questions in an instructor facilitated class discussion.
Putting it together
Convene the students as a large group and facilitate a discussion about what they discovered in this learning experience. The following questions could be used to guide the discussion:

- What stood out for you from your individual reflection time? From sharing your memories with other students?
- For which substrands did it seem easier to come up with memories? Which were harder? What surprised you?
- What new understandings or perspectives about the history–social science domain do you now have?
- What will you take from this learning experience to your work with young children?

Another approach
Instead of having students share their memories with one or two other students, students could do this sharing with a conversation grid. Handout 2 is provided for this process.

Reflection
If students are keeping journals for the course, instructors may have students individually answer the reflective questions in the “Putting it together” section prior to the class discussion.

This second set of questions is more general and can be used for individual reflection for this key topic and with the other key topics.

- What are some ideas, concepts, or strategies that you learned from this class session?
- Which ones reinforced what you have already learned or experienced? Which ones were new or caused you to think differently about teaching preschool children and/or engaging their families?
- Why do you think the content of this class session was presented the way it was? How did this approach help you understand the content? What else would have helped?
- How will you decide what to apply from this class session in your work with preschool children and/or their families? What will you do to ensure you will implement what you have decided to use?

History–Social Science

The history–social science domain in the *California Preschool Curriculum Framework, Volume 3* is:

- A companion to the same domain in the *California Preschool Learning Foundations, Volume 3*.
- A guide for teachers in planning curriculum in history–social science.
- Organized with the same strands and substrands as the foundations.
History–Social Science

History–social science in the *California Preschool Curriculum Framework, Volume 3* contains:

- Guiding principles
- Suggestions for environments and materials
- Vignettes
- Teachable moments
- Interactions and strategies
- Strategies for engaging families
- Research highlights
- Questions for reflection

**History–Social Science**

- **Self and Society**
  - Beginning to identify with how their family does things and understand that other families and people have ways of doing things that are different or similar to their family
- **Civics**
  - How to live with others and how rules work
- **History**
  - Events that happened in the past, even before they were born
History–Social Science

- **Geography**
  The location of familiar places in relation to each other and the different kinds of places where people live

- **Ecology**
  Learning to take care of earth and animals

- **Economics**
  A beginning understanding of money and the exchange of things and services

History–Social Science

- What stood out for you from your individual reflection time? From sharing your memories with other students?
- For which substrands did it seem easier to come up with memories? Which were harder? What surprised you?

History–Social Science

- What new understandings or perspectives about the history–social science domain do you now have?
- What will you take from this learning experience to your work with young children?
• What are some ideas, concepts, or strategies that you learned from this class session?

• Which ones reinforced what you have already learned or experienced? Which ones were new or caused you to think differently about teaching preschool children and/or engaging their families?
• Why do you think the content of this class session was presented the way it was? How did this approach help you understand the content? What else would have helped?

• How will you decide what to apply from this class session in your work with preschool children and/or their families? What will you do to ensure you will implement what you have decided to use?
Unit 2 – History–Social Science:  
Key Topic 1: Organization and Rationale of the History–Social Science Domain

Focus Statement

Students become familiar with the rationale and guiding principles for the history–social science domain in the California Preschool Curriculum Framework, Volume 3. They also explore how the domain is organized.

Curriculum Alignment Project (CAP) Student Learning Outcomes

The Curriculum Alignment Project’s (CAP) lower division eight courses and student learning outcomes are mapped onto each instructional guide learning experience. See Appendix A for the specific student learning outcomes, objectives, and examples of course content and topics for the courses listed below.

- Child Growth and Development
- Child, Family and Community
- Introduction to Curriculum
- Principles and Practices of Teaching Young Children
- Teaching in a Diverse Society
- Practicum-Field Experience

Instructional Methodologies

- Class discussion
- Class presentation
- Creation of a visual representation

California Early Childhood Educator Competency Areas to Consider

The Faculty Initiative Project will undertake a comprehensive process in the future to map the content of the instructional guides to the California Department of Education, Early Education and Support Division’s *California Early Childhood Educator Competencies*. The “Competency Areas to Consider” below are listed in this instructional guide as a preliminary exploration of how particular competency areas might be addressed through these learning experiences.

- Child Development and Learning
- Culture, Diversity, and Equity
- Relationships, Interactions, and Guidance
- Family and Community Engagement
- Learning Environments and Curriculum
- Professionalism
Unit 2 – History–Social Science:
Key Topic 1: Organization and Rationale of the History–Social Science Domain

Before You Start

As in the instructional guides for the California Preschool Curriculum Framework, Volumes 1 and 2, Key Topic 1 for the history–social science domain has three main components or subtopics: rationale for the domain, organization of the domain, and guiding principles for the domain. Each subtopic has a set of active learning experiences that are designed to help students become familiar with the overall content and key elements of the history–social science domain and know how to locate these elements when doing their curriculum planning. Opportunities to explore the domain content in more depth and detail are provided in other key topics.

If students have already done Key Topic 1 of Unit 1 or Key Topic 1/Subtopic 2 of Unit 3 of this instructional guide, they may already have acquired an understanding of the domain’s organization. Instructors may then wish to skip Subtopic 2 and focus on Subtopic 1, Rationale for the History–Social Science Domain, or Subtopic 3, Guiding Principles for the History–Social Science Domain.

Reflection questions are presented at the end of this key topic as well as for each of the subtopics in the “Putting it all together” sections. Please note that the California Preschool Curriculum Framework, Volume 3 also has “Questions for Reflection” at the end of each strand. The questions in the framework were designed to help students think about their teaching practices related to the content of the strand whereas the questions in this instructional guide focus on students’ understanding of the learning experiences presented in the key topics and how these experiences can be applied in their work. The following considerations for some of the active learning experiences in the three subtopics are presented for instructors’ planning:

Subtopic 1: Rationale for the History–Social Science Domain.
For this subtopic, students are asked to read several pages of the California Preschool Curriculum Framework, Volume 3. If students do not have copies of the publication, faculty may wish to remind students that a Portable Document Format (PDF) version of the curriculum framework can be downloaded from the California Department of Education Web site at http://www.cde.ca.gov/sp/cd/re/psframework.asp.

Subtopic 2: Organization of the History–Social Science Domain.
Two handouts are provided with this subtopic. Students can use Handout 1 when recording the elements or structures of the history–social science domain. Handout 2 is a completed version of Handout 1, which is provided as a reference for faculty. If students
have hard copies of the *California Preschool Curriculum Framework, Volume 3*, an alternative for reviewing the organizational structure of the domain is to ask students to tab the key elements of the chapter. If faculty choose this option, it will be helpful to have Post-it® Notes or some other kind of sticky note or page marker available for students.

Students also compare their work with Appendix A of the *California Preschool Learning Foundations, Volume 3*. The PDF versions of the curriculum framework and the learning foundations can be downloaded from the California Department of Education Web site at [http://www.cde.ca.gov/sp/cd/re/psframework.asp](http://www.cde.ca.gov/sp/cd/re/psframework.asp) and [http://www.cde.ca.gov/sp/cd/re/psfoundations.asp](http://www.cde.ca.gov/sp/cd/re/psfoundations.asp). Handout 3, a summary of the strands, substrands, and foundations for the history–social science domain, is also provided with this subtopic.

**Subtopic 3: Guiding Principles for the History–Social Science Domain**

Students are asked to read the 10 guiding principles for the history–social science domain and review the interactions and strategies found in the substrands. If students do not have the *California Preschool Curriculum Framework, Volume 3*, faculty may wish to provide copies of the pages containing the principles (pp. 45–46). A list of the interactions and strategies is provided as Handout 4. Handout 5 is a grid that students can use to note the intersections between the domain principles and interactions and strategies. Handout 6 is provided as a sample for recording the number of substrands and interactions and strategies the students identify for each domain principle.

Electronic versions of these handouts will be available when this instructional guide is online at [http://facultyinitiative.wested.org/](http://facultyinitiative.wested.org/).

**Information Delivery**

Depending on students’ understanding of and experience with the history–social science domain as a curricular area, faculty may choose to provide time for students to familiarize themselves with the history–social science foundations. The following sections from the *California Preschool Learning Foundations, Volume 3* can provide this background knowledge:

- Overview of the history–social science strands and subtrands (pp. 1–4)
- Bibliographic notes for the five strands (pp. 23–38)
- Glossary for the history–social science domain (p. 39)

A summary of the strands and substrands is on page 50 of the *California Preschool Curriculum Framework, Volume 3* and is listed here for reference:
• Self and Society [strand]
  1.0 Culture and Diversity [substrand]
  2.0 Relationships [substrand]
  3.0 Social Roles and Occupations [substrand]

• Becoming a Preschool Community Member (Civics) [strand]
  1.0 Skills for Democratic Participation [substrand]
  2.0 Responsible Conduct [substrand]
  3.0 Fairness and Respect for Other People [substrand]
  4.0 Conflict Resolution [substrand]

• Sense of Time (History) [strand]
  1.0 Understanding Past Events [substrand]
  2.0 Anticipating and Planning Future Events [substrand]
  3.0 Personal History [substrand]
  4.0 Historical Changes in People and the World [substrand]

• Sense of Place (Geography and Ecology) [strand]
  1.0 Navigating Familiar Locations [substrand]
  2.0 Caring for the Natural World [substrand]
  3.0 Understanding the Physical World Through Drawings and Maps [substrand]

• Marketplace (Economics) [strand]
  1.0 Exchange [substrand]

In addition, these sections from the California Preschool Curriculum Framework, Volume 3 will be discussed in Subtopic 1:

• Introduction to Chapter 2, History–Social Science (pp. 44–45)

• Summary of the History–Social Science Foundations (pp. 49–50)

• Discussion of the five history–social science strands and substrands (pp. 51, 53, 60, 63, 69, 70, 75, 78, 80, 86–87, 88, 91, 94, 97, 103–104, 105, 108, 112, 117, and 118)

• Research highlights (pp. 51–52, 83–84, 93, and 111)

For Subtopic 2, pages 9–11 of the California Preschool Curriculum Framework, Volume 3 will be discussed—Organization of the Framework.
**Subtopic 1: Rationale for the History–Social Science Domain**

**Getting it started**
Ask students to begin this learning experience by reading the following pages of the *California Preschool Curriculum Framework, Volume 3*:

- Introduction to Chapter 2, History–Social Science (pp. 44–45)
- Summary of the History–Social Science Foundations (pp. 49–50)
- Discussion of the five history–social science strands and substrands (pp. 51, 53, 60, 63, 69, 70, 75, 78, 80, 86–87, 88, 91, 94, 97, 103–104, 105, 108, 112, 117, and 118)
- Research highlights (pp. 51–52, 83–84, 93, and 111)

Ask them to note any key points or concepts and vocabulary that stand out from their reading. Then conduct a class discussion to ensure that the students have an understanding of the relevance of the substrands in a preschool curriculum.

**Keeping it going**
Instructors can assign students or ask students to self-select into 15 small groups, one for each substrand. Explain that the class is writing a parent handbook on the history–social science curriculum for a preschool program. Each group is to compose a short paragraph that explains to families what the substrand means and why it is included in the preschool curriculum. Groups can also include a graphic that helps to illustrate the substrand.

**Taking it further**
Each group then shares its paragraph with three other groups, and the other groups provide some feedback—one strength and one suggestion. Having only three other groups review each group’s paragraph is suggested because a review of all groups’ paragraphs could take a lot of time. However, faculty may choose

---

**Online Options**
Subtopic 1: Students could post their paragraphs online for their instructors and classmates to review. Students are then responsible for providing feedback on at least three paragraphs, using the comments feature for Microsoft Word documents. The student(s) who write the paragraphs then finalize their paragraphs after reading their instructor’s and classmates’ comments.
to use a different review process depending on the time available in the class.

The group that wrote the paragraph then reviews the feedback and makes any revisions it feels are appropriate. If possible, compile all the paragraphs into a sample parent handbook as a resource for the students.

**Putting it together**

Conclude this subtopic by facilitating a class discussion with the following questions:

- What are some things that stood out for you from the paragraphs you read?

- What was easy or difficult about writing your paragraph? Why?

- What did you learn from explaining the information in the history–social science domain for parents? What would you want to know about the families in your preschool program before sharing this information with them?

- What are some other ways you might explain to families why and how the history–social science domain is included in your preschool program?

**Another approach**

Instead of dividing the class into 15 small groups and having each group work on one substrand, faculty could ask students to work on a full strand. Each group could prepare a page on its strand, again including graphics as appropriate.

Faculty might choose to ask students to do a class presentation on its strand rather than create a parent handbook. The presentation could take any form such as a poster, oral presentation, panel discussion, or role playing. The presentation is to demonstrate how the strand could be explained to families.

**Subtopic 2: Organization of the History–Social Science Domain**

**Getting it started**

Begin this subtopic by asking students to read the “Organization of the Framework” section of the *California Preschool Curriculum Framework, Volume 3* (pp. 9–11). Ask students to make note of the main organizational structures of the framework.
Keeping it going
Next provide students with Handout 1 for this subtopic, titled “Organization of the History–Social Science Domain.” Ask them to compare the elements on the handout with the organizational structures they identified in their reading. Explain that their task is to complete the handout so that they will then have an expanded table of contents that can be used as a reference. The notes column can be used to indicate information they may find helpful in using the framework, such as the number of vignettes, interactions and strategies, or research highlights in the strand or substrand. Please note that Handout 2, a completed version of Handout 1, is provided for instructors.

Instructors may choose to have students work individually, in pairs, or in small groups. This decision may be partly based on the students’ access to the California Preschool Curriculum Framework, Volume 3—either a hard copy or electronic copy of the publication.

Taking it further
After students have completed their handouts, ask them to review Appendix A of the California Preschool Learning Foundations, Volume 3 (pp. 103–107), which provides a summary of the strands, substrands, and foundations for the history–social science domain. This summary is also provided as Handout 3 for this key topic.

Ask the students to compare their completed Handout 1 with Handout 3 and note the parallel organization of the learning foundations and the curriculum framework for this domain. It is important for students to understand that the foundations are the what—goal-like statements that describe what children typically learn and develop with optimal learning opportunities and support. The curriculum framework is the how—guidance for how teachers can intentionally support children’s learning and development.

It is also important for students to understand that the curriculum framework does not provide a one-to-one match between individual foundations and curriculum guidance such as the interactions and strategies.

Another way
If students have hard copies of the California Preschool Curriculum Framework, Volume 3, they can tab the sections of the publication with small Post-It® Notes or a similar kind of sticky note or page marker. Different colors could be used for the different sections. This tabbing could be done in place of or in addition to completing Handout 1.
Putting it together
This subtopic can be concluded with a facilitated group discussion or individual student reflection on the following questions:

- Which components or elements of the history–social science chapter caught your attention?

- Which component do you want to spend more time reading about? Why?

- Which organizational element(s) do you think will help you become more intentional in your curriculum planning and teaching of history and social science? Why and how?

- In what ways can you use this organizational guide of the history–social science domain as a reference in your work?

Subtopic 3: Guiding Principles for the History–Social Science Domain

Getting it started
Begin this subtopic by asking students to review the 10 guiding principles for the history–social science domain on pages 45–46 of the California Preschool Curriculum Framework, Volume 3. In a class discussion, ask students to highlight key words and concepts in each principle. Also provide opportunities for students to ask for clarification about any principles or share other examples of what the principle might look like in a classroom.

Keeping it going
Next ask the students to form pairs or small groups so that there are 15 groupings. Each group is assigned one of the 15 substrands and given a copy of Handout 5 included with this subtopic.

Next give each group a set of the interactions and strategies for that substrand. Handout 4 lists the interactions and strategies by substrand. Each group will have 7 to 12 interactions and strategies. Ask students to write each interaction and strategy in the left hand
column of Handout 5. Students do not have to write the full interaction or strategy; they can write a few words that capture the main point of the strategy. Students then are to decide which interactions and strategies implement the guiding principles by placing an “X” in the box on the grid where the interaction/strategy and principle intersect.

Taking it further
Then bring the students together as a full class. Read each principle and ask which groups included an interaction or strategy that implements that principle. Ask one student to keep track of how many substrands were identified for each principle. Ask another student to note how many interactions and strategies are reported for each principle. It would be helpful if the students can record these tallies on a large sheet of paper so that all the students can see them. Handout 6 is provided as a sample.

Putting it together
Conclude this subtopic with a facilitated group discussion or individual student reflection on the following questions:

• What stood out for you from comparing the guiding principles and interactions and strategies?

• Which principles seemed to encompass the most interactions and strategies? The fewest? What might be some reasons for these differences?

• Which principles do you think will be the easiest for you to implement in your teaching? The most difficult? Why?

• How will you keep these principles in mind when you are planning curriculum and working with young children and families in your preschool program?

Reflection
The following questions can be used to support reflection on this key topic as a whole:

• As you think about the rationale, organizational structure, and guiding principles of the history–social science domain, what are
some things that you remember?

• Which aspects seemed the most important to you? Why?

• What was useful in helping you understand the elements of the history–social science domain?

• How might you use the resource tools you developed in curriculum planning? In explaining to families how history and social science are part of their children’s learning and development?

There are two sample developmental sequences in the chapter on history–social science in the California Preschool Curriculum Framework, Volume 3. One is on the sense of time (p. 87), and the other is on the sense of place (p. 104).

Students could look for information on similar developmental sequences for the other strands or substrands in the history–social science domain. The Endnotes (pp. 126–129) and the Bibliography (pp. 130–134) are resources for locating information on possible developmental sequences. In addition, in the California Preschool Learning Foundations, Volume 3 the Bibliographic Notes (pp. 23–38) include references to children’s acquisition of knowledge and skills for each of the substrands.

Ask students to summarize their findings for a particular strand or substrand following the two sample developmental sequences: beginning level, next level, next level, and mature or proficient level. Students should include the references they used in constructing these sequences.
Handout for the Organization of the History–Social Science Domain

Indicate the pages where each component can be found in the history–social science domain chapter of the California Preschool Curriculum Framework, Volume 3. Use the notes column for any information that will help you remember what is in each component. For example, you might want to indicate that there are 10 guiding principles in this domain or that there are five vignettes in the first substrand of the Self and Society Strand.

# History–Social Science: Self and Society

## 1.0 Culture and Diversity

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.1</strong> Exhibit developing cultural, ethnic, and racial identity and understand relevant language and cultural practices. Display curiosity about diversity in human characteristics and practices, but prefer those of their own group.</td>
<td><strong>1.1</strong> Manifest stronger cultural, ethnic, and racial identity and greater familiarity with relevant language, traditions, and other practices. Show more interest in human diversity, but strongly favor characteristics of their own group.</td>
</tr>
</tbody>
</table>

## 2.0 Relationships

| **2.1** Interact comfortably with many peers and adults; actively contribute to creating and maintaining relationships with a few significant adults and peers. | **2.1** Understand the mutual responsibilities of relationships; take initiative in developing relationships that are mutual, cooperative, and exclusive. |

## 3.0 Social Roles and Occupations

| **3.1** Play familiar adult social roles and occupations (such as parent, teacher, and doctor) consistent with their developing knowledge of these roles. | **3.1** Exhibit more sophisticated understanding of a broader variety of adult roles and occupations, but uncertain how work relates to income. |

## Becoming a Preschool Community Member (Civics)

### 1.0 Skills for Democratic Participation

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Identify as members of a group, participate willingly in group activities, and begin to understand and accept responsibility as group members, although assistance is required in coordinating personal interests with those of others.</td>
<td>1.1 Become involved as responsible participants in group activities, with growing understanding of the importance of considering others’ opinions, group decision making, and respect for majority rules and the views of group members who disagree with the majority.</td>
</tr>
</tbody>
</table>

### 2.0 Responsible Conduct

| 2.1 Strive to cooperate with group expectations to maintain adult approval and get along with others. Self-control is inconsistent, however, especially when children are frustrated or upset. | 2.1 Exhibit responsible conduct more reliably as children develop self-esteem and gain approval from being responsible group members. May also manage others’ behavior to ensure that others also fit in with group expectations. |

### 3.0 Fairness and Respect for Other People

| 3.1 Respond to the feelings and needs of others with simple forms of assistance, sharing, and turn-taking. Understand the importance of rules that protect fairness and maintain order. | 3.1 Pay attention to others’ feelings, more likely to provide assistance, and try to coordinate personal desires with those of other children in mutually satisfactory ways. Actively support rules that protect fairness to others. |

### 4.0 Conflict Resolution

| 4.1 Can use simple bargaining strategies and seek adult assistance when in conflict with other children or adults, although frustration, distress, or aggression also occurs. | 4.1 More capable of negotiating, compromising, and finding cooperative means of resolving conflict with peers or adults, although verbal aggression may also result. |

---

### Sense of Time (History)

#### 1.0 Understanding Past Events

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Recall past experiences easily and enjoy hearing stories about the past, but require adult help to determine when past events occurred in relation to each other and to connect them with current experience.</td>
<td>1.1 Show improving ability to relate past events to other past events and current experiences, although adult assistance continues to be important.</td>
</tr>
</tbody>
</table>

#### 2.0 Anticipating and Planning Future Events

| 2.1 Anticipate events in familiar situations in the near future, with adult assistance. | 2.1 Distinguish when future events will happen, plan for them, and make choices (with adult assistance) that anticipate future needs. |

#### 3.0 Personal History

| 3.1 Proudly display developing skills to attract adult attention and share simple accounts about recent experiences. | 3.1 Compare current abilities with skills at a younger age and share more detailed autobiographical stories about recent experiences. |

#### 4.0 Historical Changes in People and the World

| 4.1 Easily distinguish older family members from younger ones (and other people) and events in the recent past from those that happened “long ago,” although do not readily sequence historical events on a timeline. | 4.1 Develop an interest in family history (e.g., when family members were children) as well as events of “long ago,” and begin to understand when these events occurred in relation to each other. |
# Sense of Place (Geography and Ecology)

## 1.0 Navigating Familiar Locations

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Identify the characteristics of familiar locations such as home and school, describe objects and activities associated with each, recognize the routes between them, and begin using simple directional language (with various degrees of accuracy).</td>
<td>1.1 Comprehend larger familiar locations, such as the characteristics of their community and region (including hills and streams, weather, common activities) and the distances between familiar locations (such as between home and school), and compare their home community with those of others.</td>
</tr>
</tbody>
</table>

## 2.0 Caring for the Natural World

| 2.1 Show an interest in nature (including animals, plants, and weather) especially as children have direct experience with them. Begin to understand human interactions with the environment (such as pollution in a lake or stream) and the importance of taking care of plants and animals. | 2.1 Show an interest in a wider range of natural phenomena, including those not directly experienced (such as snow for a child living in Southern California), and are more concerned about caring for the natural world and the positive and negative impacts of people on the natural world (e.g., recycling, putting trash in trash cans). |

## 3.0 Understanding the Physical World Through Drawings and Maps

| 3.1 Can use drawings, globes, and maps to refer to the physical world, although often unclear on the use of map symbols. | 3.1 Create their own drawings, maps, and models; are more skilled at using globes, maps, and map symbols; and use maps for basic problem solving (such as locating objects) with adult guidance. |
# Marketplace (Economics)

## 1.0 Exchange

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Understand ownership, limited supply, what stores do, give-and-take, and payment of money to sellers. Show interest in money and its function, but still figuring out the relative value of coins.</td>
<td>1.1 Understand more complex economic concepts (e.g., bartering; more money is needed for things of greater value; if more people want something, more will be sold).</td>
</tr>
</tbody>
</table>

<th>Substrand 3.0: Social Roles and Occupations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Practice a reflective approach to build awareness of self and others.</td>
<td>Develop quality, nurturing relationships with the children in your program.</td>
<td>Design the early learning environment to encourage all children’s active engagement in each area, regardless of gender, home language, or abilities.</td>
</tr>
<tr>
<td>Maintain a healthy curiosity about the experiences of others.</td>
<td>Model effective relationship skills as you interact with other adults and children.</td>
<td>Provide children with play props for exploring occupations and work settings.</td>
</tr>
<tr>
<td>Partner with families in goal setting and program design.</td>
<td>Prepare an early learning environment and daily routine that foster peer interaction.</td>
<td>Get to know the workers in your setting.</td>
</tr>
<tr>
<td>Prepare an active learning environment that incorporates the full spectrum of the human experience.</td>
<td>Teach children positive interaction strategies during large-group meetings.</td>
<td>Convey respect for the roles of adults who work at home.</td>
</tr>
<tr>
<td>Create an environment, both indoors and outdoors, that is inclusive of all children’s abilities.</td>
<td>Provide all children with coaching and appropriate prompts as they maneuver through peer relationships.</td>
<td>Highlight the roles that elders play in family life and in society.</td>
</tr>
<tr>
<td>Address children’s initial comments and inquiries about diversity with honest, direct communication . . .</td>
<td>Reinforce pro-social behavior and its impact on others.</td>
<td>Incorporate books, magazines, and other forms of print that include images and stories of different workers.</td>
</tr>
<tr>
<td>Converse about similarities and differences.</td>
<td>Offer sensitive guidance as children experience challenges related to peer interactions and friendship.</td>
<td>Include the pursuit of further education among work options.</td>
</tr>
</tbody>
</table>

### History–Social Science Domain:
#### Key Topic 1
#### Handout 5

- **Nurture children's sense of wonder about nature.**
- **Help children deepen their own sense of peace.**
- **Understandings of life and history.**
  - Observe and converse with children during their dramatic play.
  - Encourage children to incorporate their knowledge of adult roles and occupations.
- **Skills of democratic participation.**
  - Actively teach and practice the essential explanations.
  - Model social behavior and attitudes with children.
- **Encourage children's social curiosity.**
  - Share children's experiences and values.
  - Affirm children's home cultures.
- **Understandings.**
  - Encourage children's social skills and create activities that will actively contribute to community.

History–Social Science

Read and review

• Introduction to Chapter 2, History–Social Science (pp. 44–45)
• Summary of the History–Social Science Foundations (pp. 49–50)
• Discussion of the five history–social science strands and substrands
• Research highlights (pp. 51–52, 83–84, 93, and 111)

What are some things that stood out for you from the paragraphs you read?

What was easy or difficult about writing your paragraph? Why?
History–Social Science

- What did you learn from explaining the information in the history–social science domain for parents? What would you want to know about the families in your preschool program before sharing this information with them?

- What are some other ways you might explain to families why and how the history–social science domain is included in your preschool program?
The **foundations** are the *what*
~ goal-like statements that describe *what* children typically learn and develop with optimal learning opportunities and support.

The **curriculum framework** is the *how*
~ guidance for *how* teachers can intentionally support children’s learning and development.
History–Social Science

- Which components or elements of the history–social science chapter caught your attention?

- Which component do you want to spend more time reading about? Why?

History–Social Science

- Which organizational element(s) do you think will help you become more intentional in your curriculum planning and teaching of history and social science? Why and how?

- In what ways can you use this organizational guide of the history–social science domain as a reference in your work?
History–Social Science

Guiding Principles: History–Social Science

• Build a cooperative, inclusive preschool community.
• Create activities that will actively engage children’s social skills and understanding.
• Affirm children’s home cultures, experiences, and values.
• Encourage children’s social curiosity.

Guiding Principles: History–Social Science

• Model social behavior and attitudes with explanations.
• Actively teach and practice the essential skills of democratic participation.
• Encourage children to incorporate their knowledge of adult roles and occupations into their dramatic play.
### Guiding Principles: History–Social Science

- Observe and converse with children during play in order to learn about their current understanding of time and history.
- Help children deepen their own sense of place.
- Nurture children’s sense of wonder about nature.

What stood out for you from comparing the guiding principles and interactions and strategies?

Which principles seemed to encompass the most interactions and strategies? The fewest? What might be some reasons for these differences?
History–Social Science

- Which principles do you think will be the easiest for you to implement in your teaching? The most difficult? Why?

- How will you keep these principles in mind when you are planning curriculum and working with young children and families in your preschool program?

- As you think about the rationale, organizational structure, and guiding principles of the history–social science domain, what are some things that you remember?

- Which aspects seemed the most important to you? Why?

- What was useful in helping you understand the elements of the history–social science domain?
How might you use the resource tools you developed in curriculum planning? In explaining to families how history and social science are part of their children’s learning and development?

History–Social Science

Developmental Sequences in History–Social Science

- Review sample sequences: sense of time (p. 87) and sense of place (p. 104).
- Identify developmental sequences for other strands or substrands.
- Summarize findings, including:
  - Beginning level, next level, next level and mature or proficient level
  - References used in constructing these sequences
Unit 2 – History–Social Science:  
Key Topic 2: Getting to Know Environments and Materials that Support History–Social Science

Focus Statement

Students review the 12 characteristics of environments and materials that support children’s learning in the history–social science domain and explore how each characteristic relates to the different substrands.

Curriculum Alignment Project (CAP) Student Learning Outcomes

The Curriculum Alignment Project’s (CAP) lower division eight courses and student learning outcomes are mapped onto each instructional guide learning experience. See Appendix A for the specific student learning outcomes, objectives, and examples of course content and topics for the courses listed below.

- Child Growth and Development
- Introduction to Curriculum
- Principles and Practices of Teaching Young Children
- Observation and Assessment
- Practicum-Field Experience

Instructional Methodologies

- Class discussion
- Class presentation
- Development of a resource tool
- Interview
- Observations
- Pairs or small groups
- Panel/guest speaker
- Reflective discussion
- Short paper or report
California Early Childhood Educator Competency Areas to Consider

The Faculty Initiative Project will undertake a comprehensive process in the future to map the content of the instructional guides to the California Department of Education, Early Education and Support Division’s *California Early Childhood Educator Competencies*. The “Competency Areas to Consider” below are listed in this instructional guide as a preliminary exploration of how particular competency areas might be addressed through these learning experiences.

- Child Development and Learning
- Culture, Diversity, and Equity
- Observation, Screening, Assessment, and Documentation
- Learning Environments and Curriculum
- Professionalism
Before You Start

This key topic provides an opportunity for students to link the 12 characteristics of the environment and materials with the substrands in the history–social science domain. Students review the sections on curriculum planning and environments and materials in the *California Preschool Curriculum Framework, Volume 3* as preparation for this learning experience.

In the “Deeper Understanding” segment, students can learn directly from early care and education professionals by either (1) observing a classroom and interviewing the teaching staff or (2) hearing from a speaker or panel and viewing photographs of a classroom. Depending on students’ familiarity with preschool programs in their community, instructors may wish to prepare a list of programs that students can visit. It is also important to remind students to check with the program director about policies and procedures for observation visits. If faculty choose to have a speaker or panel, it would be helpful to provide the speaker(s) with a copy of the *California Preschool Curriculum Framework, Volume 3* and point out the section on Environments and Materials (pp. 46–48).

If students visit classrooms, they are asked to take photographs of examples of the 12 characteristics. If some students do not have access to a camera or other photographic capability such as a cell phone or tablet (i.e., tablet computer), students may do their observations in pairs or groups of three. Instructors may choose to have students do these classroom visits in small groups regardless of photographic capability to encourage more discussion.

Handout 1, which is included with this key topic, is a table or matrix that students can use to record how each of the 12 materials and environments characteristics helps to support children’s learning in one or more of the substrands. An electronic version of this handout will be available when this instructional guide is online at [http://facultyinitiative.wested.org/](http://facultyinitiative.wested.org/).
examples that can help students better understand why the environment and materials are a critical part of the preschool learning environment. The 12 characteristics are found on pages 46–48 of the *California Preschool Curriculum Framework, Volume 3*.

The section on curriculum planning in the *California Preschool Curriculum Framework, Volume 3* is also referred to in the “Getting it started” segment:

- “Curriculum Planning” (pp. 15–29)
- “The environment as curriculum: Interest areas to support children’s play and child-initiated learning” (pp. 21–22)

**Getting it started**

Begin this key topic by asking students to read and discuss the “Curriculum Planning” section of the *California Preschool Curriculum Framework, Volume 3* on pages 15–29. Ask them to note key points from the section titled “The environment as curriculum: Interest areas to support children’s play and child-initiated learning” (pp. 21–22) and the section titled “Daily routines as curriculum” (pp. 22–24).

**Keeping it going**

Next ask students to read the “Environments and Materials” section in the history–social science chapter of the *California Preschool Curriculum Framework, Volume 3* (pp. 46–48). If this is the first time students are working with one of the three volumes of the curriculum framework, explain that there is an “Environments and Materials” section for each of the nine domains.

Make sure that students recognize how some of the examples for a characteristic reflect one or more substrands. For example, under “Extended projects that are centered on a topic in history or social science and emerge from children’s interests or inquiries” (p. 47), the example about group decision making supports the Skills for Democratic Participation substrand. The example about caring for the earth is a direct link to the Caring for the Natural World substrand.

Then explain that students are to identify how the other examples in the 12 characteristics of environments and materials support children’s learning in specific substrands of the history–social science domain. Faculty can provide Handout 1 for students to use or ask them to create a similar one. Instructors may choose to have the students work individually or in small groups.
Taking it further
After students have identified examples from the curriculum framework, ask them to add other examples. It is suggested that students list at least one substrand for each characteristic.

Putting it together
After students have completed the handout, provide time for them to share their work. This can be done in a number of ways:

- If students have worked individually, they can find one or two partners and compare their ideas. Or students can pass their handouts to a student seated to one side, for instance going in a clockwise direction, until all the students have had a chance to review all the other students’ handouts. With either approach, encourage students to note ideas that are different from theirs and present a new way of thinking about the environmental characteristic or material.

- If students have completed the handouts in pairs or small groups, students share their work with someone from another group. Again ask students to look for similarities and differences in their results.

- If there is space in the room, post 12 large sheets of paper on the walls, one for each environmental characteristic or material. Students then write their examples and substrands on the appropriate sheet, moving from one sheet to the next. Depending on the time allotted for this learning experience, instructors can ask students to write an example and substrand on all 12 sheets or just on three or four sheets, making sure that there are some
examples on each sheet. Then provide time for the students to review the examples for all 12 characteristics.

Another approach
After reading the “Curriculum Planning” section of the *California Preschool Curriculum Framework, Volume 3* on pages 15–29 and the “Environments and Materials” section on pages 46–48, ask students to write a two- to three-page paper about the 12 characteristics. Then, ask them to describe why they think that particular characteristic is important in supporting children’s learning in history and the social sciences. They should pay particular attention to characteristics that could be included for other domains or as part of curriculum in general.

Reflection
Conclude this key topic by asking students to reflect on the following questions. Students could respond individually in journals, or a class discussion could be held.

- When you reviewed the 12 environmental characteristics and materials in the history–social science domain, which ones stood out for you?
- Which ones were easier to apply to the substrands? Which ones were more challenging? Why?
- What do you think are the most important environmental characteristics or elements to include in a preschool program that support children’s learning in history and the social sciences?
- How would you ensure that you are including these elements? What supports might you need?

This second set of questions is more general and can be used for individual reflection for this key topic and with the other key topics.

- What are some ideas, concepts, or strategies that you learned from this class session?
- Which ones reinforced what you have already learned or experienced? Which ones were new or caused you to think differently about teaching preschool children and/or engaging their families?
- Why do you think the content of this class session was presented the way it was? How did this approach help you understand the
content? What else would have helped?

- How will you decide what to apply from this class session in your work with preschool children and/or their families? What will you do to ensure you will implement what you have decided to use?

Students can continue their exploration of the environments and materials by talking with teachers and observing classrooms that contain many of the characteristics described in the *California Preschool Curriculum Framework, Volume 3*. This can be done in two ways.

1. Ask students to visit a preschool classroom, take photos of the environment, and interview the teacher(s) about the ways the teachers plan and implement many of the 12 characteristics. Faculty could then ask students to prepare a written summary of the visit or do a class presentation on the interview.

2. Invite a teacher to be a guest speaker or several teachers to be a panel. Ask them to bring some photos of their classroom environments (indoors and outdoors) that illustrate some of the 12 characteristics and to be prepared to describe how they incorporate these characteristics over the course of the year.

Supporting History–Social Science

Curriculum Planning” pages 15–29
“Environments and Materials” pages 46–48
California Preschool Curriculum Framework, Volume 3

✓ Write a 2–3 page paper about the characteristics of the suggested environments and materials.
✓ Describe why particular characteristics are important in supporting children’s learning in history and the social sciences.
✓ Consider characteristics that could be included for other domains or part of curriculum in general.

When you reviewed the 12 environmental characteristics and materials in the history–social science domain, which ones stood out for you?

• Which ones were easier to apply to the substrands? Which ones were more challenging? Why?
• What do you think are the most important environmental characteristics or elements to include in a preschool program that support children’s learning in history and the social sciences?
• How would you ensure that you are including these elements? What supports might you need?

• What are some ideas, concepts, or strategies that you learned from this class session?
• Which ones reinforced what you have already learned or experienced? Which ones were new or caused you to think differently about teaching preschool children and/or engaging their families?
Why do you think the content of this class session was presented the way it was? How did this approach help you understand the content? What else would have helped?

How will you decide what to apply from this class session in your work with preschool children and/or their families? What will you do to ensure you will implement what you have decided to use?

Supporting History–Social Science

- Visit a preschool classroom, take photos of the environment, and interview the teacher(s) about the ways the teachers plan and implement many of the 12 characteristics.

- Write a summary of the visit or do a class presentation on the interview.
Focus Statement

Students explore interactions and strategies that can support children’s learning in history and the social sciences.

Curriculum Alignment Project (CAP) Student Learning Outcomes

The Curriculum Alignment Project’s (CAP) lower division eight courses and student learning outcomes are mapped onto each instructional guide learning experience. See Appendix A for the specific student learning outcomes, objectives, and examples of course content and topics for the courses listed below.

- Child Growth and Development
- Child, Family and Community
- Introduction to Curriculum
- Principles and Practices of Teaching Young Children
- Observation and Assessment
- Health, Safety and Nutrition
- Teaching in a Diverse Society
- Practicum-Field Experience

Instructional Methodologies

- Class discussion
- Development of a resource tool
- Personal reflection
- Reflective discussion
- Short paper or report
California Early Childhood Educator Competency Areas to Consider

The Faculty Initiative Project will undertake a comprehensive process in the future to map the content of the instructional guides to the California Department of Education, Early Education and Support Division’s *California Early Childhood Educator Competencies*. The “Competency Areas to Consider” below are listed in this instructional guide as a preliminary exploration of how particular competency areas might be addressed through these learning experiences.

- Child Development and Learning
- Culture, Diversity, and Equity
- Relationships, Interactions, and Guidance
- Family and Community Engagement
- Dual-Language Development
- Observation, Screening, Assessment, and Documentation
- Learning Environments and Curriculum
- Health, Safety, and Nutrition
- Leadership in Early Childhood Education
- Professionalism
- Administration and Supervision
Unit 2 – History–Social Science:  
Key Topic 3: Getting to Know Interactions and Strategies that Support History–Social Science

Before You Start

In this key topic, students examine the interactions and strategies in each substrand of the history–social science domain and reflect on their confidence and capability to use those strategies in their teaching. In the “Deeper Understanding” segment, students look for children’s books that help build children’s understanding of history and social science concepts.

There are 140 interactions and strategies in the history–social science domain of the *California Preschool Curriculum Framework, Volume 3*. As in volumes 1 and 2 of the curriculum framework, these interactions and strategies are located after the vignette(s) and teachable moment(s) in the substrand. In this key topic, a table in the “Information Delivery” section lists the number of vignettes and interactions and strategies by substrand. This table may assist faculty in deciding how many substrands to assign to students during the active learning.

If students are not familiar with how the three volumes of the *California Preschool Curriculum Framework* are structured, it may be helpful for them to do Key Topic 1, Subtopic 2 in this unit of this instructional guide. Or instructors may provide an overview of the curriculum framework’s overall structure.

It will also be helpful for students to review the *California Preschool Learning Foundations, Volume 3*. As stated in Key Topic 1, Subtopic 2 of Unit 2 of this instructional guide—and in the instructional guides for the *California Preschool Curriculum Framework, Volumes 1 and 2*—the learning foundations describe what children typically learn and develop with optimal learning opportunities and support. The curriculum framework provides guidance for how teachers can intentionally provide these learning opportunities and supports. It is important for students to understand this distinction, particularly when working with the interactions and strategies, and that there is not a one-to-one match between the curriculum framework and the individual foundations.

In the “Taking it further” segment, students are asked to self-assess how well they feel they can implement the interactions and strategies. It may be helpful to preface the discussion by reminding students that this self-assessment is designed to help students strengthen their teaching practices. By sharing examples with their classmates, students can learn new ways they may be able to implement the strategies in their classrooms. When students share strategies for which they can use support, other students may be able to offer some ideas or resources.

Three handouts are provided with this key topic. Handout 1 is a list of the interactions and strategies by substrand. This list is identical to the one in Unit 2, Key Topic 1 of this instructional guide. Handout 2 is a sample table that students can use to record the key words and concepts, examples, and their self-assessment of their ability to use some of the interactions and strategies. Handout 3 is a list of resources to assist students in identifying children’s books related to the strands and substrands of the history–social science domain. Electronic versions of these handouts will be available when this instructional guide is online at http://facultyinitiative.wested.org/.

Information Delivery

Depending on students’ experience with the history–social science domain, instructors may decide to begin work on this key topic by asking students to read certain sections from the California Preschool Learning Foundations, Volume 3 and the California Preschool Curriculum Framework, Volume 3.

These sections from the California Preschool Learning Foundations, Volume 3 can introduce students to what history and social science are in a preschool curriculum:

- Overview of the history–social science strands and subtrands (pp. 1–4)
- Bibliographic notes for the five strands (pp. 23–38)
- Glossary for the history–social science domain (p. 39)

The organizational structure of the California Preschool Curriculum Framework, Volume 3 is found on pages 9–11. A summary of the history–social science domain strands and substrands is on page 50. The following table lists the strands, substrands, and number of vignettes and interactions and strategies in each substrand.

The following table lists the strands, substrands, and number of vignettes and interactions and strategies in each substrand.
Note to Faculty: The number of vignettes and interactions and strategies are provided in the following table so that faculty can decide how to assign strands and/or substrands so that they are distributed as evenly as possible among students.

<table>

</tr>
</tbody>
</table>

Getting it started
Begin by reviewing the organizational structure of the domain and where to locate the vignettes, teachable moments, and interactions and strategies in each substrand. Point out how the interactions and strategies follow the vignette(s) and teachable moment(s). It may also be helpful to review the section “Organization of the Framework”
on pages 9–11 of the *California Preschool Curriculum Framework, Volume 3*.

Next ask students to discuss the terms “interactions,” “strategies,” and “teachable moments” and their relation to each other. As described on page 10, strategies “range from spontaneous to planned. Some sample strategies focus on how teachers build on children’s interests during interaction and instruction; some rely on planning and teacher initiation; and others reflect a combination of teacher planning and spontaneous responses to children’s learning.” Also remind students that the interactions and strategies in each substrand are examples and not meant to be complete lists of intentional teaching practices.

Students now have an opportunity to review in depth a set of interactions and strategies. Instructors may choose to assign a specific substrand to each student or let students choose a substrand that particularly interests them. The list of interactions and strategies by substrand in the “Information Delivery” section of this key topic may help instructors decide how to ensure that students have an approximately equal number of interactions and strategies to explore.

In their review, students are to read the vignettes, teachable moments, and interactions and strategies for their assigned substrand. Ask them to note any examples or key words that facilitate their understanding of the interaction or strategy. Instructors may give students Handout 2 to use or have students create a similar handout on their own.

**Keeping it going**

Now ask students to come up with an additional example that they might use in a preschool program for each interaction and strategy. If they are working in preschool programs, they can use examples from their work.

**Taking it further**

After listing an example for each interaction and strategy, students then do a self-assessment by indicating if they feel confident in implementing the strategy or need some additional support such as coaching, resources, or opportunities for practice. This self-
assessment is for students' own reflective practice and professional growth.

**Putting it together**
Provide time for students to share their examples and self-assessments. If more than one student worked on the same substrand, these students can form a group. Or instructors may choose to have a full class discussion and ask each student to share a different interaction and strategy so that each substrand is covered.

It may be helpful to preface the discussion by reminding students that this learning experience is designed to help students strengthen their teaching practices. By sharing examples with their classmates, students can increase the ways they may be able to implement the strategies in their classrooms. When students share strategies for which they can use support, other students may be able to offer some ideas or resources. During the discussion, ask students to share other examples and possible resources for each strategy presented.

**Reflection**
Conclude this key topic by asking students to reflect on their experience of this key topic by responding to the following questions. Students could respond individually in journals or a class discussion could be held.

- Which three interactions and strategies stood out from your review of the ones in your assigned substrand or from the class discussion?
- What was intriguing to you about the strategies?
- What were some themes in the interactions and strategies that surfaced from the class discussion? Which themes do you think are applicable to other domains as well as to the history–social science domain?
- What are some new strategies that you would like to try in your teaching to support children’s learning in history and social sciences?

**Deeper Understanding**
A number of strategies list children’s books as a way for children to build their understanding of some concepts or develop a different perspective. Ask students to write a short paper describing why and
how children's books can be used throughout a preschool program to support children's development of history and social science concepts and skills.

Students are also to include an annotated list of 15 children's books—one for each substrand. Students can use up to 5 books that are listed in the interactions and strategies of the California Preschool Curriculum Framework, Volume 3, but the other 10 should be identified by the students. Students may begin by reviewing the “Teacher Resources” for ideas (California Preschool Curriculum Framework, Volume 3, p. 125). Instructors can also provide additional guidance. The following resources may be helpful for students and can also be found on Handout 3 of this key topic:

- Center on the Social and Emotional Foundations for Early Learning (CSEFEL) includes a list of children’s books, primarily for children aged infant to eight years, that is divided into different categories of children’s social and emotional development. Many of these relate to some of the history–social science substrands, such as “Accepting Different Kinds of Friends,” “Good Behavior Expectations,” “Problem Solving,” and “Caring About Others and Empathy.” The “Book Nook” has teacher or caregiver guides that provide ideas and activities based on familiar children’s books. These lists and guides can be found on the CSEFEL Web site: [http://csefel.vanderbilt.edu/resources/strategies.html](http://csefel.vanderbilt.edu/resources/strategies.html).

- The National Council for the Social Studies (NCSS) puts out an annual list of “Notable Social Studies Trade Books for Young People.” The current year is available only to NCSS members, but lists for 2000–2013 can be downloaded as PDF files from its Web site at [http://www.socialstudies.org/notable](http://www.socialstudies.org/notable). The suggested reading level for each book is included, and most of the selections are for children in kindergarten through the eighth grade. However, some of the kindergarten-level books may be appropriate for older preschoolers.

- The American Library Association (ALA) has several lists of and links to children’s books. The lists can be found on the ALA
Summary Fact Sheet 23 at [http://www.ala.org/readinglists](http://www.ala.org/readinglists).

- The Association for Library Service to Children (ALSC) annually compiles an annotated list of notable children’s books that is loosely grouped by age levels. “Young Readers” include preschool to grade level two or age seven and “All Ages” are for children from preschool to grade level eight. Lists from 1999 through 2014 are on the ALSC Web site at [http://www.ala.org/alsc/awardsgrants/notalists/ncb](http://www.ala.org/alsc/awardsgrants/notalists/ncb).

- Booklist Editors’ Choice: Books for Youth, 2013. The list is divided into nonfiction and fiction categories, and each category has a list for older, middle, and young readers. There are some books for preschoolers in the fiction list for young readers. The list can be found on this Web site: [http://www.booklistonline.com/Booklist-Editors-Choice-Books-for-Youth-2013-Gillian-Engberg/pid=6578139](http://www.booklistonline.com/Booklist-Editors-Choice-Books-for-Youth-2013-Gillian-Engberg/pid=6578139).

- Día Book List is divided into four age groups: birth–four years, four to eight years, eight to twelve years, and twelve years and up. The lists are in English/Spanish and English/Chinese. The book lists are among the many resources and programs that Día provides. Día is a national initiative that promotes the importance of literacy for all children from all linguistic and cultural backgrounds. Information about Día can be found on its Web site at [http://dia.ala.org/content/about-dia/](http://dia.ala.org/content/about-dia/). The book list can be found on this Web page: [http://dia.ala.org/content/free-program-downloads](http://dia.ala.org/content/free-program-downloads).

- The Quicklists Consulting Committee of the ALSC developed the “Money as You Grow” book list in 2012. This list is divided into three age groups: three to five years, six to ten years, and eleven to thirteen years. The Money as You Grow Web site has additional information on financial responsibility at [http://www.moneyasyougrow.org/](http://www.moneyasyougrow.org/).

- Reading Rockets has book lists by themes on the Web site: [http://www.readingrockets.org/books/booksbytheme](http://www.readingrockets.org/books/booksbytheme). Many of these are recommended for preschoolers.

Students’ lists can be compiled into a master resource list for the whole class.
### Interactions and Strategies that Support History–Social Science

Resources that Support Deeper Understanding

Center on the Social and Emotional Foundations for Early Learning (CSEFEL) includes a list of children’s books, primarily for children aged infant to eight years, that is divided into different categories of children’s social and emotional development. Many of these relate to some of the history—social science substrands, such as “Accepting Different Kinds of Friends,” “Good Behavior Expectations,” “Problem Solving,” and “Caring About Others and Empathy.” The “Book Nook” has teacher or caregiver guides that provide ideas and activities based on familiar children’s books. These lists and guides can be found on the CSEFEL Web site: 

The National Council for the Social Studies (NCSS) puts out an annual list of “Notable Social Studies Trade Books for Young People.” The current year is available only to NCSS members, but lists for 2000–2013 can be downloaded as PDF files from its Web site at http://www.socialstudies.org/notable. The suggested reading level for each book is included, and most of the selections are for children in kindergarten through the eighth grade. However, some of the kindergarten-level books may be appropriate for older preschoolers.

Social Studies for the Preschool/Primary Child, 9th edition, by Carol Seefeldt, Sharon D. Castle, and Renee D. Falconer includes references to children’s literature in many chapters. The eighth edition of this book is listed in the “Teacher Resources” section of the California Preschool Curriculum Framework, Volume 3 on page 125.
The **American Library Association (ALA)** has several lists of and links to children’s books. The lists can be found on the ALA Summary Fact Sheet 23 at [http://www.ala.org/readinglists](http://www.ala.org/readinglists).

- **The Association for Library Service to Children (ALSC)** annually compiles an annotated list of notable children’s books that is loosely grouped by age levels. “Young Readers” include preschool to grade level two or age seven and “All Ages” are for children from preschool to grade level eight. Lists from 1999 through 2014 are on the ALSC Web site at [http://www.ala.org/alsc/awardsgrants/notalists/ncb](http://www.ala.org/alsc/awardsgrants/notalists/ncb).

- **Booklist Editors’ Choice: Books for Youth, 2013**. The list is divided into nonfiction and fiction categories, and each category has a list for older, middle, and young readers. There are some books for preschoolers in the fiction list for young readers. The list can be found on this Web site: [http://www.booklistonline.com/Booklist-Editors-Choice-Books-for-Youth-2013-Gillian-Engberg/pid=6578139](http://www.booklistonline.com/Booklist-Editors-Choice-Books-for-Youth-2013-Gillian-Engberg/pid=6578139).

- **Día Book List** is divided into four age groups: birth–four years, four to eight years, eight to twelve years, and twelve years and up. The lists are in English/Spanish and English/Chinese. The book lists are among the many resources and programs that Día provides. Día is a national initiative that promotes the importance of literacy for all children from all linguistic and cultural backgrounds. Information about Día can be found on its Web site at [http://dia.ala.org/content/about-dia/](http://dia.ala.org/content/about-dia/). The book list can be found on this Web page: [http://dia.ala.org/content/free-program-downloads](http://dia.ala.org/content/free-program-downloads).
The Quicklists Consulting Committee of the ALSC developed the “Money as You Grow” book list in 2012. This list is divided into three age groups: three to five years, six to ten years, and eleven to thirteen years. The Money as You Grow Web site has additional information on financial responsibility at http://www.moneyasyougrow.org/.

Reading Rockets has book lists by themes on the Web site: http://www.readingrockets.org/books/booksbytheme. Many of these are recommended for preschoolers.

• Which three interactions and strategies stood out from your review of the ones in your assigned substrand or from the class discussion?

• What was intriguing to you about the strategies?

• What were some themes in the interactions and strategies that surfaced from the class discussion? Which themes do you think are applicable to other domains as well as to the history–social science domain?

• What are some new strategies that you would like to try in your teaching to support children’s learning in history and the social sciences?
History–Social Science

- Describe why and how children’s books can be used throughout a preschool program to support children’s development of history and social science concepts and skills.

- Include an annotated list of 15 children’s books—one for each substrand.
Focus Statement

Students explore the concepts of universal design for learning, individualization, and partnerships with families as part of curriculum planning to support children’s learning in history and the social sciences.

Curriculum Alignment Project (CAP) Student Learning Outcomes

The Curriculum Alignment Project’s (CAP) lower division eight courses and student learning outcomes are mapped onto each instructional guide learning experience. See Appendix A for the specific student learning outcomes, objectives, and examples of course content and topics for the courses listed below.

- Child Growth and Development
- Child, Family and Community
- Introduction to Curriculum
- Principles and Practices of Teaching Young Children
- Health, Safety and Nutrition
- Teaching in a Diverse Society
- Practicum-Field Experience

Instructional Methodologies

- Class discussion
- Class presentation
- Creation of a visual representation
- Development of a resource tool
- Interview
- Lecture
- Pairs or small groups
- Panel/guest speaker
• Peer review and feedback
• Reflective discussion
• Role playing
• Short paper or report

California Early Childhood Educator Competency Areas to Consider

The Faculty Initiative Project will undertake a comprehensive process in the future to map the content of the instructional guides to the California Department of Education, Early Education and Support Division’s California Early Childhood Educator Competencies. The “Competency Areas to Consider” below are listed in this instructional guide as a preliminary exploration of how particular competency areas might be addressed through these learning experiences.

• Child Development and Learning
• Culture, Diversity, and Equity
• Relationships, Interactions, and Guidance
• Family and Community Engagement
• Dual-Language Development
• Special Needs and Inclusion
• Learning Environments and Curriculum
• Health, Safety, and Nutrition
• Leadership in Early Childhood Education
• Professionalism
• Administration and Supervision
Before You Start

This key topic prompts students to consider the importance of ensuring that all children have access to the classroom experiences that support their learning of foundational history and social science concepts and skills. Universal design for learning, individualization, and partnering with families are ways that teachers can support this access.

By examining and reflecting on these three areas, students—as teachers—can address the many diverse characteristics that children bring to the preschool classroom such as their unique temperaments, interests, and abilities; cultural and linguistic backgrounds; family beliefs, values, and structures; socioeconomic backgrounds; and neighborhood and community environments, opportunities, and resources. Partnering with families is one way to learn about these characteristics. Practicing principles and strategies of universal design for learning and individualization is a way to plan curriculum that helps all children learn.

Universal design for learning, individualization, and partnering with families are each presented as a separate subtopic. The following considerations are provided for some of the active learning experiences in each one:

Subtopic 1: Universal Design. There are two suggested options for the learning experience for this first subtopic. The first approach is to have students prepare a presentation on the concept of universal design for learning after reviewing and discussing the concepts and examples in the history–social science domain of the California Preschool Curriculum, Volume 3. Faculty may wish to spread this learning experience over a few class sessions so that students have time to prepare their presentations.

The second approach to this subtopic is to invite guest speakers to share how they use universal design for learning in their programs. Suggestions for presenters include early childhood special education teachers, speech and language therapists, occupational therapists, assistive technology specialists, preschool teachers with experience in including children with disabilities in their classes, and parents or other family members of children with disabilities or special needs.

Subtopic 2: Individualization. In this subtopic, students are assigned a number of interactions and strategies to review for examples of individualization. It may be helpful to
use the table in Key Topic 3, “Getting to Know Interactions and Strategies that Support History–Social Science,” a summary of the number of interactions and strategies by substrand, in deciding the number of interactions and strategies per student.

This subtopic can also be made richer by asking students to address characteristics of children and families in their community. For example, there may be a significant number of families who regularly and/or fairly frequently relocate their residences such as families who are (1) engaged in seasonal work, (2) in the military, or (3) homeless or without permanent and adequate housing. There may be some strategies for individualizing that are very important to ensure that children in these families have opportunities for learning history and social science concepts and skills.

Subtopic 3: Family Partnerships. Two approaches are suggested for the active learning in this subtopic. The first approach has students role-playing ways that teachers can present some of the family engagement suggestions to families. If this approach is used, class time will need to be provided for the presentations and short discussions. With the second approach, students write summaries of how they would present the suggestions to families.

Note: The suggestions in subtopic 1 and subtopic 2 are for children who may need additional supports when planning intentional teaching strategies or materials, whether or not they have an Individualized Education Program (IEP). For any child with an IEP, the design and use of adaptations should be done in collaboration with the early childhood special educator or therapist working with the child and family. Consultation with the family and these specialists is especially important for children who may have more significant physical, sensory, and/or medical conditions.

The same active learning segments for these three subtopics are used in Key Topic 4 of the science domain. Slight modifications are made to reflect the specific content of each domain. This similarity across the two domains is done to allow instructors to use each key topic individually in the domain or to merge the subtopics across both domains.

Information Delivery

Background information on the diversity of California's preschool children and families, universal design for learning, and partnering with families may provide an introduction to this key topic. Faculty may provide summary lectures or ask students to read the following material in the California Preschool Curriculum Framework, Volume 3:

- California's Preschool Children (pp. 3–5)
- Overarching principle: “Family and community partnerships create meaningful connections” (pp. 7–8)
• Overarching principle: “Individualization of learning includes all children” (p. 8)

• Overarching principle: “Responsiveness to culture and language supports children’s learning” (pp. 8–9)

• Universal Design for Learning (p. 14)

• “Partnering with families in curriculum planning” (p. 35)

Subtopic 1: Universal Design for Learning

Getting it started
The extent to which students are familiar with the concept of universal design for learning will impact how the instructor chooses to begin this subtopic. If students have experience with this concept, a review of the section on “Universal Design for Learning” on page 14 of the California Preschool Curriculum Framework, Volume 3 may not be needed. If the concept is new or less familiar to most students, it will be helpful for students to read and discuss the section.

The California Preschool Curriculum Framework, Volume 3 includes some examples of the three practices of universal design for learning: multiple means of representation, multiple means of expression, and multiple means of engagement. Ask students to consider the following examples from the curriculum framework and decide if each example demonstrates multiple means of representation, expression, or engagement:

• A teacher uses visual aids and suggests a child can use words or signs to join other children in play. (California Preschool Curriculum Framework, Volume 3, p. 62)

• When children are voting, provide different materials such as buttons or stickers to ensure that all children can actively participate. (California Preschool Curriculum Framework, Volume 3, pp. 73–74)
• Provide visual and auditory cues and prompts to help children remember rules and expectations that the children developed as a community. (California Preschool Curriculum Framework, Volume 3, p. 76)

• A teacher encourages children to use signs or gestures when talking about an activity the children enjoyed. (California Preschool Curriculum Framework, Volume 3, p. 89)

• Peers can help children with special needs by collaboratively drawing maps of their environment based on joint observations. Some children may need physical assistance in creating maps, or a peer could draw a map based on the ideas shared by the children. (California Preschool Curriculum Framework, Volume 3, pp. 112–113)

• Suggest that children explore an area in small groups instead of individually to accommodate children with visual or motor challenges and with differing skill levels. (California Preschool Curriculum Framework, Volume 3, p. 115)

Keeping it going
Ask students to form pairs or small groups and to choose a vignette. Instructors may wish to assign vignettes to the groups so that vignettes from the different strands or substrands are discussed. The table in the “Information Delivery” section of Unit 2, Key Topic 3 of this instructional guide has the number of vignettes for each substrand.

Explain to students that their task is to review their vignette and (1) identify any elements of universal design for learning that the teacher used and (2) think of other ways that universal design could be incorporated.

Taking it further
After students have identified different examples of multiple means of representation, expression, and engagement for their vignette, ask them to develop a presentation of the vignette and their ideas. The presentations can take any form the students choose. Examples
could include role playing, creating a poster or PowerPoint, facilitating a discussion, or writing a short report. Encourage students to be creative and present the information in a way that is interesting and meaningful to them.

**Putting it together**  
Provide time for the groups to share their presentations with the rest of the class. As each group presents, ask the other students to note two strengths of the presentation and one recommendation for improving it. These are to be given to the instructor and presenters for their review.

Conclude this subtopic by having a discussion on the following questions:

- What images, words, or phrases are going through your head?
- What did you find easy in identifying examples of universal design for learning in your vignette and including examples in your presentation? What was more challenging?
- What are some insights about universal design for learning that you learned from preparing your presentation? From your classmates’ presentations?
- Where do you need more practice or support in applying universal design for learning in history and social science? How could you obtain these?

**Another approach**  
In the *Instructional Guide for the California Preschool Curriculum Framework, Volumes 1 and 2*, another approach to the subtopic Universal Design for Learning is to have a guest speaker or panel discuss the application of the universal design for learning concepts in preschool programs. The details for having a speaker or panel are from the subtopic in the instructional guides for the first two volumes of the curriculum framework and are summarized here for reference.

Explain to students that a guest speaker or panelists will be discussing considerations when planning for children with disabilities or special needs and explaining how universal design for learning is applied in curriculum planning. This presentation is not intended as an in-depth exploration but as an introduction to some of the ways in which curriculum can be adapted to meet the needs of all children, including children with disabilities or special needs.
It would be helpful to provide the presenters with the segment on “Universal Design for Learning” from page 14 of the California Preschool Curriculum Framework, Volume 3. Ask them to address the importance of including children with special needs in all activities and learning experiences related to history and social sciences and to share examples of the three aspects of universal design for learning: multiple means of representation, multiple means of engagement, and multiple means of expression. If the students are not familiar with special education, ask the presenters to also provide a brief overview: referral, assessment, and Individualized Educational Program (IEP) process; service provision; and ways that the special education specialists and parents can partner with the preschool program teachers in planning and/or providing the adaptations for a child with a disability or special need.

Faculty may choose to have the class prepare some questions for the presenters or allow students to spontaneously ask questions during the presentation. Ask students to listen for examples of the three universal design for learning approaches that support all children’s participation in the history and social sciences learning experiences.

After the speakers have left, provide time for the class to reflect on the presentation through individual responses to or a class discussion on the following questions:

- What information from the presenter(s) caught your attention or stood out for you?
- What ideas or strategies seemed familiar? Which ones were new?
- What are some key messages or different perspectives that you are taking away from this presentation?
- What supports do you need to more fully implement the universal design for learning concepts to ensure that all children in your program have access to the history and social science curriculum? What are some steps you can take to obtain these supports?

**Subtopic 2: Individualization**

**Getting it started**

California’s children and families are very diverse in many ways. The section on “California’s Preschool Children” on pages 3–5 of the
California Preschool Curriculum Framework, Volume 3 describes some aspects of this diversity. Ask students to review this section and facilitate a class discussion on the key points. Also encourage any students who have experience in early care and education programs to share some of the characteristics of the children and families in their programs. Remind students to use general terms and not identify any specific child or parent.

Include in the discussion a review of the sixth overarching principle, “Individualization of learning includes all children,” which is found on page 8 of the California Preschool Curriculum Framework, Volume 3. Ask students to provide examples of each of the characteristics listed in this principle: “. . . temperament, family and cultural experiences, language experiences, personal strengths, interests, abilities, and dispositions . . . .” Instructors may also include additional characteristics of the children and families in their community. It will help students in the next subtopic about partnering with families if these examples are recorded either by the students or by the instructor in a way that will make them available to students.

Keeping it going
Assign each student a set of interactions and strategies. The table in Key Topic 3, “Getting to Know Interactions and Strategies that Support History–Social Science,” is a summary of the number of interactions and strategies by substrand. This table may be helpful in assigning the interactions and strategies. The number of interactions and strategies per student will depend on the class size.

Ask students to individually review their assigned interactions and strategies and look for examples of individualization in that strategy. If none appear to be part of the strategy, ask students to think of one example of how they can individualize that strategy.

Online Options
Subtopic 2: If the class has online-discussion capability, faculty could facilitate a discussion on the diverse characteristics of children and families.

Online Options
Subtopic 2: Students could post online their examples of individualization for their assigned interactions and strategies for the instructor and their peers to review.
Taking it further
After students have completed their individual review, ask them to share and discuss their strategies and individualization examples with another student. What similarities or themes did they notice?

Putting it together
Conclude this subtopic by convening the class for a reflective discussion. The following questions can be used as a guide:

- What did you notice when looking for examples of individualization in the interactions and strategies? What stood out for you?
- What individualization strategies do you feel most confident in being able to use? Which ones might be more difficult?
- Which individualization practices seem the most critical to support children’s learning in history and social sciences?
- What are three new individualization practices that you will use in your teaching of history and social sciences?

Subtopic 3: Family Partnerships

Getting it started
Ask students to read the fifth overarching principle “Family and community partnerships create meaningful connections” (California Preschool Curriculum Framework, Volume 3, pp. 7–8) and identify the key words and concepts that stand out for them. Next ask students to discuss what considerations regarding the diversity of families they should keep in mind when building partnerships with families. If students have not done Subtopic 2 of this key topic, it is suggested that they review the section “California’s Preschool Children” (pp. 3–5 of the California Preschool Curriculum Framework, Volume 3).

Keeping it going
Ask the class to form small groups and explain that each group is to write a short description of a family that has at least one preschool-aged child who is in an early care and education program. Students

Online Options
Subtopic 2: If there is online-discussion capability, faculty could facilitate a discussion on the examples posted by the students. The questions in the “Putting it together” section could be used as individual discussion threads.
may draw on their experiences with families but should be careful to not include any details that could identify a specific child or family. Instructors may wish to provide some guidance to the groups so that the families represent some of the diversity in their communities and portray some of the characteristics described in the California Preschool Curriculum Framework, Volume 3.

Taking it further
After the students have completed their descriptions, each group is to exchange its family story with another group. Provide time for each group to read the description and ask the author group for any clarification.

Continue this subtopic by having students find and read the suggestions in the “Engaging Families” sections at the end of each strand in the history–social science domain chapter of the California Preschool Curriculum Framework, Volume 3. It may be helpful to provide a brief overview of the organizational structure of the chapter domains if they are not already familiar with the structure. The “Engaging Families” sections are also listed in the table of contents for each strand.

Each group then chooses a suggestion and develops a short role-playing presentation that illustrates how to share that suggestion with their “family.” Faculty may choose to assign a strand to each group to ensure that a range of suggestions is selected.

Putting it together
The groups then do their role playing for the whole class. After each presentation, the group also shares any considerations and challenges they discussed while preparing their presentation. The other students can also ask questions, share observations, and contribute other ideas for using that suggestion with other families.

The following questions for individual or group reflection could be used to conclude this subtopic:

• What words or images caught your attention?

Online Options
Subtopic 3: Students could post their descriptions of their families online, and the instructor could then assign a family to specific students. The option for writing a summary of how a strategy is shared with the family could be used instead of the role-playing presentations in class.
• What approaches would you feel comfortable using? Which topic or substrand areas do you feel more confident in discussing with families? What concerns do you have?

• What are some new insights that are emerging for you as you think about engaging families in supporting their children’s learning history and social science concepts and skills?

• What will you do differently in your communications and interactions with families?

**Another approach**
Instead of role playing, students could write summaries of how they would present a suggestion to their family. This could be done as a group or individually.

**Online Options**
Subtopic 3: The option for writing a summary of how a strategy is shared with the family could be used instead of the role-playing presentations in class.

**Reflection**
There are reflection questions suggested in the “Putting it together” section for each subtopic. The following set of questions is more general and has been presented for other key topics in this instructional guide.

• What are some ideas, concepts, or strategies that you learned from this class session?

• Which ones reinforced what you have already learned or experienced? Which ones were new or caused you to think differently about teaching preschool children and/or engaging their families?

• Why do you think the content of this class session was presented the way it was? How did this approach help you understand the content? What else would have helped?

• How will you decide what to apply from this class session in your work with preschool children and/or their families? What will you do to ensure you will implement what you have decided to use?

**Deeper Understanding**
One of the suggestions for the Marketplace strand is that early care and education professionals be knowledgeable about community resources for families who may be experiencing financial crises or hardships. In the Culture and Diversity substrand of the Self and Society strand, the first two strategies encourage teachers to reflect
on their own attitudes, values, and approaches and to build understanding of others’ experiences and caregiving beliefs and practices.

Ask students to identify a community resource that they could use to strengthen their knowledge and understanding of the children and families in their community and supports available for them. Ask students to interview a staff member from the agency and prepare a written summary of the information that includes the following elements:

- Agency name, location, contact information, and Web site
- Name and role of person interviewed; length of time person has been with the agency
- Vision and mission of the organization
- History and primary funding sources
- Programs and services
- Strengths and current and future challenges
- Unique characteristics

Depending on the class size and the possible number of resources available in the community, instructors may ask students to identify the agency they selected and compile a list to minimize duplication before the interviews are done. If there are several duplicates, instructors may allow students to work in pairs or small groups or suggest other agencies.

Ask students to share their summaries with the other students so that each student has a directory of resources.
Understanding California’s preschool children and families, universal design for learning, and partnering with families:

- California’s Preschool Children (pp. 3–5)
- Overarching principle: “Family and community partnerships create meaningful connections” (pp. 7–8)
- Overarching principle: “Individualization of learning includes all children” (p. 8)
History–Social Science

Understanding California’s preschool children and families, universal design for learning, and partnering with families:

- Overarching principle: “Responsiveness to culture and language supports children’s learning” (pp. 8–9)
- Universal Design for Learning (p. 14)
- “Partnering with families in curriculum planning” (p. 35)

California’s state preschools include children who:

- Are ethnically and culturally diverse.
- Speak languages other than English.
- Have different abilities.
- Come from diverse socioeconomic backgrounds.

(California Preschool Curriculum Framework, Volume 3, pages 3–5)
Almost half of all children living in California live in immigrant families.

22% of students in California are English learners.

The majority of students who are English learners are native Spanish speakers.

~ Refers to all children ages birth to 18 years
Universal Design for Learning

- Provides for multiple means of representation, multiple means of engagement, and multiple means of expression.

*(California Preschool Curriculum Framework, Volume 3, page 14)*

---

Multiple means of representation

- Providing information in a variety of ways to meet the learning needs of all children

Multiple means of expression

- Allowing children to use alternative ways to communicate or demonstrate what they know or what they are feeling

Multiple means of engagement

- Offering choices in the setting or program that facilitate learning by building on children's interests

*(California Preschool Curriculum Framework, Volume 3, page 14)*
A teacher uses visual aids and suggests a child can use words or signs to join other children in play. (*California Preschool Curriculum Framework, Volume 3*, p. 62)

When children are voting, provide different materials such as buttons or stickers to ensure that all children can actively participate. (*California Preschool Curriculum Framework, Volume 3*, pp. 73–74)

Provide visual and auditory cues and prompts to help children remember rules and expectations that the children developed as a community. (*California Preschool Curriculum Framework, Volume 3*, p. 76)

A teacher encourages children to use signs or gestures when talking about an activity the children enjoyed. (*California Preschool Curriculum Framework, Volume 3*, p. 89)
History–Social Science

- Peers can help children with special needs by collaboratively drawing maps of their environment based on joint observations. Some children may need physical assistance in creating maps, or a peer could draw a map based on the ideas shared by the children. (*California Preschool Curriculum Framework, Volume 3, pp. 112–113*)

History–Social Science

- Suggest that children explore an area in small groups instead of individually to accommodate children with visual or motor challenges and with differing skill levels. (*California Preschool Curriculum Framework, Volume 3, p. 115*)
History–Social Science

- Review the vignette.
- Identify any elements of universal design for learning that the teacher used.
- Think of other ways that universal design could be incorporated.

History–Social Science

- What images, words, or phrases are going through your head?
- What did you find easy in identifying examples of universal design for learning in your vignette and including examples in your presentation? What was more challenging?
What are some insights about universal design for learning that you learned from preparing your presentation? From your classmates’ presentations?

Where do you need more practice or support in applying universal design for learning in history and social science? How could you obtain these?

What information from the presenter(s) caught your attention or stood out for you?

What ideas or strategies seemed familiar? Which ones were new?

What are some key messages or different perspectives that you are taking away from this presentation?
History–Social Science

- What supports do you need to more fully implement the universal design for learning concepts to ensure that all children in your program have access to the history and social science curriculum?
- What are some steps you can take to obtain these supports?

“Individualization of learning includes all children.”

Overarching principle, *California Preschool Curriculum Framework, Volume 3 (page 8)*
History–Social Science

- Temperament
- Family and cultural experiences
- Language experiences
- Personal strengths
- Interests
- Abilities
- Dispositions

What did you notice when looking for examples of individualization in the interactions and strategies? What stood out for you?

What individualization strategies do you feel most confident in being able to use? Which ones might be more difficult?
Which individualization practices seem the most critical to support children’s learning in history and the social sciences?

What are three new individualization practices that you will use in your teaching of history and the social sciences?

“Family and community partnerships create meaningful connections.”

*California Preschool Curriculum Framework, Volume 3* (pages 7–8)
History–Social Science

Engaging Families

• What words or images caught your attention?

• What approaches would you feel comfortable using? Which topic or substrand areas do you feel more confident in discussing with families? What concerns do you have?

What are some new insights that are emerging for you as you think about engaging families in supporting their children’s learning history and social science concepts and skills?

• What will you do differently in your communications and interactions with families?
What are some ideas, concepts, or strategies that you learned from this class session?

Which ones reinforced what you have already learned or experienced? Which ones were new or caused you to think differently about teaching preschool children and/or engaging their families?

Why do you think the content of this class session was presented the way it was? How did this approach help you understand the content? What else would have helped?

How will you decide what to apply from this class session in your work with preschool children and/or their families? What will you do to ensure you will implement what you have decided to use?
Community resources for children and families

- Agency name, location, contact information, and Web site
- Name and role of person interviewed; length of time person has been with the agency
- Vision and mission of the organization
- History and primary funding sources
- Programs and services
- Strengths and current and future challenges
- Unique characteristics
Focus Statement

Students review the four research highlights for the history–social science domain and then have an opportunity to identify additional research articles on a topic of interest to them and develop a summary of their articles.

Curriculum Alignment Project (CAP) Student Learning Outcomes

The Curriculum Alignment Project’s (CAP) lower division eight courses and student learning outcomes are mapped onto each instructional guide learning experience. See Appendix A for the specific student learning outcomes, objectives, and examples of course content and topics for the courses listed below.

- Child Growth and Development
- Introduction to Curriculum
- Principles and Practices of Teaching Young Children
- Teaching in a Diverse Society
- Practicum-Field Experience

Instructional Methodologies

- Book review
- Class discussion
- Class presentation
- Development of a resource tool
- Lecture
- Literature review
- Pairs or small groups
- Reflective discussion
- Short paper or report
California Early Childhood Educator Competency Areas to Consider

The Faculty Initiative Project will undertake a comprehensive process in the future to map the content of the instructional guides to the California Department of Education, Early Education and Support Division’s *California Early Childhood Educator Competencies*. The “Competency Areas to Consider” below are listed in this instructional guide as a preliminary exploration of how particular competency areas might be addressed through these learning experiences.

- Child Development and Learning
- Culture, Diversity, and Equity
- Learning Environments and Curriculum
- Leadership in Early Childhood Education
- Professionalism
Before You Start

There are four research highlights in the history–social science domain of the California Preschool Curriculum Framework, Volume 3. One is in the Self and Society strand, one is in the Becoming a Preschool Community Member (Civics) strand, the third is in the Sense of Time (History) strand/Anticipating and Planning Future Events substrand, and the fourth is in the Sense of Place (Geography and Ecology) strand/Caring for the Natural World substrand.

Each research highlight is a brief summary of a few research articles. For students who do not have a lot of experience reading research articles, these highlights can provide an introduction. It is important for students to understand that there is a research base for the information provided in the curriculum framework and for the foundations as well. Research, such as the highlights in the history–social science domain, also has implications for the students’ work in the classroom. Teachers can use research to inform their practice and help explain to parents why history and social sciences are a part of the preschool curriculum.

After reviewing and discussing the four research highlights, ask students to read the “Summary of the History–Social Science Foundations” in the domain chapter of the California Preschool Curriculum Framework, Volume 3 (pp. 49–50). They then identify a topic that interests them, read the supporting articles, and prepare a research highlight.

In the “Deeper Understanding” section, students are asked to locate a book from the Bibliography for the history–social science chapter of the California Preschool Curriculum Framework, Volume 3. They then write a book review that includes a critique of the book. This review will be a resource in understanding and planning curriculum for history and social sciences.

The following four research highlights in the history–social science domain of the California Preschool Curriculum Framework, Volume 3 are used in this key topic:

- Research Highlight: Anti-Bias Curriculum Approach (pp. 51–52)
Active Learning

• Research Highlight (pp. 83–84)
• Research Highlight (p. 93)
• Research Highlight (p. 111)

The Endnotes on pages 126–129 and the Bibliography on pages 130–134 of the curriculum framework are also referenced.

Getting it started
Depending on the students’ experience with research articles, instructors may choose to begin this key topic with a brief lecture and discussion about how research has contributed to our understanding of children’s development of knowledge and skills in history and the social sciences.

Then ask the students to read the four research highlights and to share one or two key points from each highlight. Also ask students to find the footnote that cites the references for the research highlight. [Note to faculty: The endnote for the fourth research highlight (p. 111) is not listed in the Endnotes on pages 126–129 of the California Preschool Curriculum Framework, Volume 3. The correct reference for the fourth research highlight is the following citation: S. Cohen and D. Horm-Wingerd, “Children and the Environment: Ecological Awareness Among Preschool Children,” Environment and Behavior, 25, no. 1, (1993): 103-120. This reference is also listed for the fifteenth endnote on page 128.]

Explain to students how they can locate some of the articles cited. For example, the section of the Atance and Jackson article on mental time travel can be pointed out as the research highlight on page 93 for the substrand Anticipating and Planning Future Events.

Keeping it going
Then ask students to read the “Summary of the History–Social Science Foundations” on pages 49–50 of the California Preschool Curriculum Framework, Volume 3. Ask students to select a topic that is of interest to them and locate the endnote references. Students can do this reference search individually or in pairs or small groups.

Online Options
Students can post their reference findings online so that the instructor and other students can also review them.
Taking it further
After finding the references, ask students to prepare a research highlight, similar to the ones they reviewed in the California Preschool Curriculum Framework, Volume 3. Students should also include all the articles used in the research highlight.

Putting it together
Students then share their research highlights with the other students. It is suggested that these be done as class presentations so there are opportunities for students to ask questions and discuss the highlights. If possible, compile the research highlights as a resource tool for the students.

Reflection
Ask students to reflect on this learning experience by responding to these questions individually or in a class discussion:

- What did you do to find the reference articles or resources on your topic?
- Did you find the process easy or challenging? In what ways?
- Why do you think it’s important for preschool teachers to be able to identify, review, and summarize research articles? How will this skill impact your practice as a teacher in planning curriculum for history and the social sciences?
- Which research highlights do you want to be sure to consider in your work?

This second set of questions is more general and can be used for individual reflection for this key topic and with the other key topics.

- What are some ideas, concepts, or strategies that you learned from this class session?
- Which ones reinforced what you have already learned or experienced? Which ones were new or caused you to think differently about teaching preschool children and/or engaging their families?
- Why do you think the content of this class session was presented the way it was? How did this approach help you understand the content? What else would have helped?
• How will you decide what to apply from this class session in your work with preschool children and/or their families? What will you do to ensure you will implement what you have decided to use?

**Deeper Understanding**

Ask students to review the Bibliography on pages 130–134 of the *California Preschool Curriculum Framework, Volume 3* and find a book that interests them. The book can be on the same topic they chose for their research highlight or a different topic.

Students are then to prepare a book review using either a format of the instructors’ choosing or one that incorporates some of the following elements*:

• Full citation for the book
• Background of the author
• Central theme of the book and key ideas
• How the theme and key ideas are supported in the book
• Student’s evaluation of the book as a resource in understanding and/or planning curriculum for history and the social sciences

*The book review elements are based on the description for writing book reviews from the Purdue Online Writing Lab – 2012 at [http://owl.english.purdue.edu/owl/resource/704/1](http://owl.english.purdue.edu/owl/resource/704/1).
History–Social Science

Research Highlights

- Anti-Bias Curriculum Approach (pp. 51–52)
- Remembering Past Experiences (pp. 83–84)
- Planning for the Future (p. 93)
- Environmental Awareness (p. 111)
What did you do to find the reference articles or resources on your topic?

Did you find the process easy or challenging? In what ways?

Why do you think it's important for preschool teachers to be able to identify, review, and summarize research articles?

How will this skill impact your practice as a teacher in planning curriculum for history and the social sciences?

Which research highlights do you want to be sure to consider in your work?
What are some ideas, concepts, or strategies that you learned from this class session?

Which ones reinforced what you have already learned or experienced? Which ones were new or caused you to think differently about teaching preschool children and/or engaging their families?

Why do you think the content of this class session was presented the way it was? How did this approach help you understand the content? What else would have helped?

How will you decide what to apply from this class session in your work with preschool children and/or their families? What will you do to ensure you will implement what you have decided to use?
Choose a book from the Bibliography on pages 130–134.

Prepare a book review, including:

- Full citation
- Background of the author
- Central theme and key ideas
- How the theme and key ideas are supported
- Student’s evaluation of the book as a resource in understanding and/or planning curriculum for history and the social sciences
Instructional Methodologies Definitions

In this instructional guide, a variety of instructional methodologies have been suggested across all key topics. The intention is to provide instructors with access to diverse instructional methodologies that will enrich the experiences of their students and also support meeting program or college requirements for engaging students in a variety of methodologies. In the preview page(s) for each key topic, the instructional methodologies that are used during that key topic are listed. These methodologies are indexed in the Instructional Methodologies Index, so that instructors can make decisions based on which methodologies they prefer to use with their students.

The following list provides working definitions for each of the methodologies referred to in Faculty Initiative Project’s instructional guides. These working definitions provide instructors with an understanding of what is meant by each term. They are not intended as definitive or exhaustive and refer only to the way in which they are used in these instructional guides.

**Book review**
Students are asked to indicate, in writing, how well they understood the contents of a book, how they think about it, and possibly how it connects to their work and/or experience.

**Brainstorming**
Students generate thoughts or ideas within a group without judgment as to the merits of what is generated.

**Categorizing**
Students put objects, thoughts, ideas, or concepts into groups based on overarching themes, theories, frameworks, likenesses, or differences.

**Class discussion**
All students participate in sharing of ideas/points of view, asking questions, and responding to others. This is often guided by an initial instructional question or prompt.

**Class presentation**
An individual student or small or larger group of students shares, performs, or presents material or a project that is related to an assigned or chosen topic.

**Conversation grid**
Students use a grid as a basis to facilitate discussion and learning. The conversation grid can be used to record notes, record answers, and/or raise additional questions.
Creation of a visual representation
Students develop a way to visually show a specific idea or concept. This can be a chart, table, graphic, poster, PowerPoint presentation, sculpture, collage, video, diorama, or any other medium that visually represents a concept, theory, practice, or idea.

Development of a resource tool
Students create a collection of relevant resources and/or information relating to a specific topic to be shared and used as a resource for other teachers or students.

Game
Students participate in interactive playful activities—focused on specific content or learning outcomes—that facilitate students’ exploration of a topic and/or skill.

Interview
Students conduct a question-and-answer session with a content expert, such as an early care and education professional or parent.

Jigsaw reading
Pairs or small groups of students are given sections of an article or text chapter to read and then find a creative and meaningful way to share the content with their peers.

Lecture
Instructors present an organized verbal presentation of ideas and/or information related to a specific topic. A PowerPoint presentation or other forms of visual support may accompany this.

Literature review
Students explore what a variety of authors have to say about a topic or question that is either selected by the student or assigned by the faculty.

Notetaking outline or guide
Students are provided with a form that supports their focus on the key points covered. This may be a form with the key points listed along with spaces for students to add information gained from the lecture, readings, or discussion or a form on which students list key points and add the information.

Observations
Students are asked to actively look at, listen to, and think about something, such as a classroom, child/ren, or teacher-child interactions. As observers, they do not participate in the setting or interfere with those around them. Observations may be conducted via video or in actual settings.

Pairs or small groups
Students are organized into pairs or groups of three to five for the purpose of completing a task such as having a discussion, solving a problem, preparing and implementing a presentation, and/or creating a resource or visual display.
Panel/guest speaker
Content experts come to class to share their knowledge and experiences on topics related to course content.

Peer review and feedback
Other individuals with similar characteristics—such as class members, co-teachers, or parents—review and share thoughts, identify strengths, and suggest areas of improvement with the peer member about his/her work, project, or presentation.

Personal reflection
An individual student or group of students engages in remembering details and thinking about an occurrence or experience. This requires one to consider one’s own role, behaviors, thoughts, and/or feelings in a particular situation or experience, as well as how one might apply the knowledge and understanding from the reflection to a new situation in the future.

Photo observation
Students explore a photograph, usually used to illustrate a concept or idea or to document an exercise or activity.

Problem solving
Students work on a solution to one or a series of tasks, questions, or problems. Problem solving may be done individually or as a group or class.

Reflective discussion
Following a learning experience, students engage in a discussion or talk about details and think about an event or experience that has occurred. The process requires students to consider their own role, behaviors, thoughts, and feelings in a particular situation or experience, as well as how one might apply the knowledge and understanding from the reflection to a new situation in the future. A reflective discussion might be facilitated by questions or prompts to guide and encourage participants to actively participate in reflection.

Role playing
Students take on a role in an activity and act it out.

Short paper or report
Students write a short paper that focuses on a specific topic or question.

Video observation
Students observe video for the purposes of documentation, understanding, and discussion.

For additional instructional guide resources, continue to check out the Faculty Initiative Project’s Web site at http://facultyinitiative.wested.org/.
Instructional Methodologies Index

Instructional Methodologies Indexed with the *Instructional Guide for the California Preschool Curriculum Framework, Volume 3*

Each key topic is written to include a variety of instructional methodologies. This is intended to provide varied learning experiences for students as they encounter the preschool curriculum framework. It also provides another variable for faculty to use in deciding which key topic learning experiences will best suit the needs of their students and programs.

In this instructional guide, these methodologies are identified for each key topic and are listed on its preview page(s). The instructional methodologies are also indexed so that faculty can get an overview of which methodologies are used across all units/domains and key topics.

To locate page numbers for each key topic listed in the following index, refer to the Table of Contents of this instructional guide.

Student Learning Outcomes Index

Student Learning Outcomes and CAP Lower Division Eight Courses Mapped onto the *Instructional Guide for the California Preschool Curriculum Framework, Volume 3*

To support faculty in deciding how and where they can best use the *California Preschool Curriculum Framework, Volume 3* in their course work or across their program, the Student Learning Outcomes (SLOs) developed by the Curriculum Alignment Project (CAP) for the eight core lower division early childhood courses have been mapped onto the key topics for each domain in this instructional guide. Each Key Topic Preview Page provides course suggestions for instructor consideration.

More information about the Curriculum Alignment Project can be found on its website: [http://www.childdevelopment.org/cs/cdtc/print/htdocs/services_cap.htm](http://www.childdevelopment.org/cs/cdtc/print/htdocs/services_cap.htm).

Appendix A is a listing of the suggested CAP lower division eight courses for all key topics in this instructional guide with the addition of the SLOs, objectives, and examples of course content and topics. Appendix A is first organized by instructional guide units and key topics, then by the CAP courses, SLOs, objectives, and examples of course content and topics.

This is not an exhaustive list, and faculty might find ways to use the key topics to address SLOs by means other than what has been indexed. Working through these selected key topics does not guarantee the achievement of any student learning outcome or objective; it is understood that students achieve student outcomes through repeated engagement with information and experiences that build competence.

To locate page numbers for each key topic listed in the following index, refer to the Instructional Guide Table of Contents.

---

**California State University and University of California**

The Curriculum Alignment Project (CAP) course and student learning outcomes (SLO) mapping with this instructional guide is done with the understanding that not all institutions will use these particular SLOs or objectives. This is particularly true for faculty at the California State University (CSU) and University of California (UC) campuses. The SLOs do provide learning outcomes that can be used selectively or with adaptations for courses at the CSU and UC campuses and indicate what can be accomplished by students through using the key topics in this instructional guide.
### Course: Child Growth and Development

Appendix A

Student Learning Outcomes and CAP Lower Division Eight Courses Mapped onto the Instructional Guide for the California Preschool Curriculum Framework, Volume 3

To support faculty in decisions regarding how and where they can best use the *California Preschool Curriculum Framework, Volume 3* in their course work or across their program, the Student Learning Outcomes (SLOs) developed by the Curriculum Alignment Project (CAP) ([https://www.childdevelopment.org/cs/cdctc/print/htdocs/services_cap.htm](https://www.childdevelopment.org/cs/cdctc/print/htdocs/services_cap.htm)) for the eight core lower division early childhood courses have been mapped onto each key topic in this instructional guide for consideration. Each Key Topic Preview Page will provide the list of courses that have been mapped onto the specific key topic.

The Curriculum Alignment Project's SLOs, objectives, and examples of course content and topics indicated for this instructional guide for the *California Preschool Curriculum Framework, Volume 3* are found in this Appendix A. Refer to the Student Learning Outcomes Index for an overview of this instructional guide mapping listed by unit and domain. The location of the SLO Index is listed in the Table of Contents for this instructional guide.

These SLOs are organized by the CAP core lower division early childhood courses. This is not an exhaustive list, and faculty might find ways to use the learning experiences to address SLOs by means other than what has been indexed. Working through these selected key topic learning experiences does not guarantee the achievement of any student learning outcome or objective; it is understood that students achieve student outcomes through repeated engagement with information and experiences that build competence.

To assist faculty in using these SLOs as supports for decision making, the instructional guide key topics are indexed first by units and domains, then by CAP courses and SLOs so that faculty can select what is most relevant to their particular needs. Student learning outcomes are matched to specific key topics in the instructional guide that will support attainment of that outcome. Not all student learning outcomes map onto the specific content of the instructional guide.
Unit 1
Chapter 1: Introduction to the Framework

Getting Ready for the Unit and Connecting to Experience

Course: Child, Family and Community

Student Learning Outcomes:
• Describe social issues, changes, and transitions that affect children, families, schools, and communities.

Objectives:
• Identify how the child develops within a system and is influenced by numerous factors of socialization including the role of the family, childcare, schooling and the community.

Content and Topics:
• Interrelatedness of family, school and community as agents of socialization
• The influence of teachers’ and caregivers’ personal experience and family history on relationships with children and families.
• The role of group childcare and early schooling on socialization

Course: Introduction to Curriculum

Student Learning Outcomes:
• Demonstrate an understanding of the many aspects of the teachers’ role in early childhood programs.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Identify the influence of daily schedules and routines on curriculum and activities.
• Identify ways in which the environment functions as an essential component of curriculum.

Content and Topics:
• Innovative and best practices in teaching
• Use of current research
• Content areas (math, science, literacy, social studies, creative arts)
• The development of the whole child (physical, cognitive, and social/emotional development, including socialization, self-regulation, self-help skills for all children)

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.
Course: Principles and Practices of Teaching Young Children – Continued

Objectives:
• Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.

Content and Topics:
• Addressing the needs of the “whole child” (physical, cognitive, social-emotional)
• Characteristics and roles of an effective teacher in an early childhood setting

Course: Teaching in a Diverse Society

Student Learning Outcomes:
• Analyze various aspects of children’s experience as members of families targeted by social bias considering the significant role of education in reinforcing or contradicting such experiences.

Objectives:
• Evaluate inclusive classroom environments, materials and approaches for developmental, cultural, and linguistic appropriateness.

Content and Topics:
• Culturally and developmentally appropriate classrooms: curriculum, environment; human relationships
• Environments and curriculums that respectively reflect children’s cultures and experiences and that expose children to the larger communities in which they live

Course: Practicum-Field Experience

Student Learning Outcomes:
• Critically assess one’s own teaching experiences to guide and inform practice.

Objectives:
• Integrate content areas and opportunities for development across the curriculum
• Analyze student teaching experiences to inform and guide future teaching and collaborative practices.

Content and Topics:
• Self reflection and self-assessment through team collaboration and portfolio documentation
• Content Areas:
  o Science
  o Social Studies
• California State Learning Standards and tools
Unit 1
Chapter 1: Introduction to the Framework

Key Topic 1 – Getting to Know the Organization of the California Preschool Curriculum Framework, Volume 3

Course: Child Growth and Development

Student Learning Outcomes:

• Describe major developmental milestones for children from conception through adolescence in the areas of physical, psychosocial, cognitive, and language development.

Objectives:

• Demonstrate knowledge of current research as it applies to child development.

Content and Topics:

• Major current and historical theoretical frameworks of child development

Course: Child, Family and Community

Student Learning Outcomes:

• Describe effective strategies that empower families and encourage family involvement in children’s development.

Objectives:

• Identify how the child develops within a system and is influenced by numerous factors of socialization including the role of the family, childcare, schooling and the community.

Content and Topics:

• Role of family in children’s developmental outcomes.
• Teachers’ and caregivers’ influences on children and families

Course: Introduction to Curriculum

Student Learning Outcomes:

• Recognize developmentally appropriate teaching strategies and apply them in supervised settings for young children.
• Identify play-based curriculum models and approaches, standards for early learning, and indicators of quality.

Objectives:

• Identify and evaluate teaching behaviors for research-based best practices.
• Identify ways in which development in all domains and learning in all content areas can be integrated across the curriculum.
Course: Introduction to Curriculum – Continued
Content and Topics:
• Standards from legislation and accrediting groups
• Innovative and best practices in teaching
• Use of current research
• Components of effective learning environments

Course: Principles and Practices of Teaching Young Children
Student Learning Outcomes:
• Examine the value of play as a vehicle for developing skills, knowledge, dispositions, and strengthening relationships among young children.
• Analyze the relationship between observation, planning, implementation and assessment in developing effective teaching strategies and positive learning and development.

Objectives:
• Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
• Describe the relationship of observation, planning, implementation, and assessment in effective programming.

Content and Topics:
• The importance of developmentally, culturally, linguistically appropriate practice.
• Play as a vehicle for development and learning
• Essentials of program planning and the interrelationship of planning, observation, and assessment

Course: Observation and Assessment
Student Learning Outcomes:
• Compare the purpose, value and use of formal and informal observation and assessment strategies.

Objectives:
• Use observation tools to identify quality in play-based environment, curriculum, and care routines, and to detect trends and anomalies in individuals and groups.

Content and Topics:
• Utilization of observation and assessment data to create appropriate curricula and environments
• The value of collaboration with families and professionals
• Observation as part of the on-going process of curriculum and planning that support all children.
Course: Teaching in a Diverse Society

Student Learning Outcomes:
• Critically assess the components of linguistically and culturally relevant, inclusive, age-appropriate, anti-bias approaches in promoting optimum learning and development.

Objectives:
• Evaluate inclusive classroom environments, materials and approaches for developmental, cultural, and linguistic appropriateness.

Content and Topics:
• Culturally and developmentally appropriate classrooms: curriculum, environment; human relationships

Course: Practicum-Field Experience

Student Learning Outcomes:
• Integrate understanding of children’s development and needs to create and maintain healthy, safe, respectful, supportive and challenging learning environments for all children.
• Apply a variety of effective approaches, strategies and techniques supporting positive relationships with children and adults.

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
• Integrate content areas and opportunities for development across the curriculum

Content and Topics:
• Application of developmentally, culturally, and linguistically appropriate practices
• Organization of physical environment, routine/schedule, and materials
• Content Areas:
  o Science
  o Social Studies
• California State Learning Standards and tools
Unit 1
Chapter 1: Introduction to the Framework

Key Topic 2 – Getting to Know the Eight Overarching Principles

Course: Child Growth and Development

Student Learning Outcomes:
• Apply developmental theory to child observations, surveys, and/or interviews using investigative research methodologies.

Objectives:
• Demonstrate objective techniques and skills when observing, interviewing, describing and evaluating behavior in children of all ages.
• Identify and describe biological and environmental factors that influence children’s development from conception to adolescence across domains.

Content and Topics:
• Investigative research methods:
  o Observation
• Play-Years Development (including but not limited to physical, social/emotional, cognitive, language, special needs, risk factors, and care and education at each level).

Course: Introduction to Curriculum

Student Learning Outcomes:
• Demonstrate an understanding of the many aspects of the teachers’ role in early childhood programs.

Objectives:
• Observe and document children at play and propose appropriate activities and possibilities for expanding children’s learning in a variety of curriculum areas.

Content and Topics:
• Observation and assessment strategies as they apply to curriculum planning and evaluation.
• Use of current research
• Components of effective learning environments

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.
Course: Principles and Practices of Teaching Young Children – Continued

Student Learning Outcomes:
• Assess early childhood settings, curriculum, and teaching strategies utilizing indicators of quality early childhood practice that support all children including those with diverse characteristics and their families.

Objectives:
• Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
• Demonstrate basic observational skills.

Content and Topics:
• The importance of developmentally, culturally, linguistically appropriate practice.
• Play as a vehicle for development and learning
• Characteristics and roles of an effective teacher in an early childhood setting

Course: Observation and Assessment

Student Learning Outcomes:
• Complete systematic observations using a variety of methods of data collection to assess the impact of the environment, interactions, and curriculum on children’s development and behavior.

Objectives:
• Identify and apply basic quantitative and qualitative observation and recording techniques.
• Use observation tools to identify quality in play-based environment, curriculum, and care routines, and to detect trends and anomalies in individuals and groups.

Content and Topics:
• National and State standards for learning and assessment (e.g., NAEYC’s position statement on assessment)
• Utilization of observation and assessment data to create appropriate curricula and environments

Course: Practicum-Field Experience

Student Learning Outcomes:
• Evaluate the effectiveness of early childhood curriculum, classrooms, teaching strategies and how teachers involve families in their children’s development and learning to improve teaching practices for all children.

Objectives:
• Analyze classroom space and daily routines in terms of their effect on the behavior and interactions of children and teachers.
Course: Practicum-Field Experience – Continued

Content and Topics:

- Application of developmentally, culturally, and linguistically appropriate practices
- Organization of physical environment, routine/schedule, and materials
- California State Learning Standards and tools
Unit 1
Chapter 1: Introduction to the Framework

Key Topic 3 – Getting to Know the Curriculum-Planning Cycle

Course: Introduction to Curriculum

Student Learning Outcomes:
• Use the ongoing cycle of curriculum development to plan, implement, and evaluate early childhood activities and environments.

Objectives:
• Observe and document children at play and propose appropriate activities and possibilities for expanding children’s learning in a variety of curriculum areas.
• Demonstrate ability to document curriculum planning process with written curriculum plans.
• Identify ways in which the environment functions as an essential component of curriculum.

Content and Topics:
• Observation and assessment strategies as they apply to curriculum planning and evaluation.
• Innovative and best practices in teaching
• Use of current research
• Components of effective learning environments

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Analyze the relationship between observation, planning, implementation and assessment in developing effective teaching strategies and positive learning and development.

Objectives:
• Identify children’s developmental processes and describe adaptations to curriculum and environments needed to support all children.
• Describe the relationship of observation, planning, implementation, and assessment in effective programming.

Content and Topics:
• Attention to developmental needs of children of different ages (infant/toddler, preschool, school-age)
• Characteristics and roles of an effective teacher in an early childhood setting
Course: Observation and Assessment

Student Learning Outcomes:
• Complete systematic observations using a variety of methods of data collection to assess the impact of the environment, interactions, and curriculum on children’s development and behavior.

Objectives:
• Use observation tools to identify quality in play-based environment, curriculum, and care routines, and to detect trends and anomalies in individuals and groups.
• Demonstrate and apply knowledge of developmental domains to interpret observations.
• Demonstrate knowledge of the role of observation and assessment in intervention.

Content and Topics:
• Appropriate methods of child observation, documentation, portfolio collection, and record keeping
• Utilization of observation and assessment data to create appropriate curricula and environments
• Observation as part of the on-going process of curriculum and planning that support all children.

Course: Practicum-Field Experience

Student Learning Outcomes:
• Design, implement and evaluate curriculum activities that are based on observation and assessment of young children.

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
• Utilize an appropriate recordkeeping system to document, assess and track children’s progress.

Content and Topics:
• Self reflection and self-assessment through team collaboration and portfolio documentation
• Integration of content areas across curriculum
• California State Learning Standards and tools
Unit 2
Chapter 2: History–Social Science Domain

Getting Ready for the Unit and Connecting to Experience

Course: Child Growth and Development

Student Learning Outcomes:
• Identify cultural, economic, political, historical contexts that affect children’s development.

Objectives:
• Demonstrate knowledge of current research as it applies to child development.
• Identify and describe biological and environmental factors that influence children’s development from conception to adolescence across domains.

Content and Topics:
• Contemporary social issues that impact children’s development
• The role and influence of family and caregivers
• The role and influence of cultural and societal impacts

Course: Child, Family and Community

Student Learning Outcomes:
• Describe social issues, changes, and transitions that affect children, families, schools, and communities.
• Analyze one’s own values, goals and sense of self as related to family history and life experiences, assessing how this impacts relationships with children and families.

Objectives:
• Describe contemporary social issues and their effects on families and children.
• Explore one’s own family history and examine how it affects one’s relationships with children and families.

Content and Topics:
• Role of family in children’s developmental outcomes.
• The influence of teachers’ and caregivers’ personal experience and family history on relationships with children and families.
• Contemporary social issues and their effect on children and families
Course: Introduction to Curriculum

Student Learning Outcomes:
• Demonstrate an understanding of the many aspects of the teachers’ role in early childhood programs.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Identify ways in which development in all domains and learning in all content areas can be integrated across the curriculum.

Content and Topics:
• Consideration of cultural, linguistic, ethnic, economic, ability and gender diversity including the acquisition of English as a second language in planning for young children
• Innovative and best practices in teaching
• Use of current research
• Content areas (math, science, literacy, social studies, creative arts)
• The Role of the ECE teacher

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.

Objectives:
• Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
• Differentiate between program types (age, funding stream, purpose, policies, environments, etc.), delivery systems, quality standards, licensing and regulation structures in early childhood settings.

Content and Topics:
• Current and historic models, influences, and approaches in the field of early childhood
• Play as a vehicle for development and learning
• Quality indicators of programs (e.g., accreditation, assessment tools)

Course: Teaching in a Diverse Society

Student Learning Outcomes:
• Evaluate the impact of personal experiences and social identity on teaching effectiveness.
Course: Teaching in a Diverse Society – Continued

Objectives:
• Compare the historical and current perspectives involving diversity and inclusion and their impacts on children’s identity development and learning.

Content and Topics:
• Culturally and developmentally appropriate classrooms: curriculum, environment; human relationships
• Environments and curriculum that challenge children’s biases and support the acquisition of authentic information about human differences

Course: Practicum-Field Experience

Student Learning Outcomes:
• Critically assess one’s own teaching experiences to guide and inform practice.

Objectives:
• Present and evaluate a variety of developmentally, culturally and linguistically appropriate play-based learning experiences.
• Analyze student teaching experiences to inform and guide future teaching and collaborative practices.

Content and Topics:
• Application of developmentally, culturally, and linguistically appropriate practices
• Content Areas:
  o Science
  o Social Studies
• Integration of content areas across curriculum
• California State Learning Standards and tools
Unit 2
Chapter 2: History–Social Science Domain

Key Topic 1 – Organization and Rationale of the History–Social Science Domain

Course: Child Growth and Development

Student Learning Outcomes:
• Describe major developmental milestones for children from conception through adolescence in the areas of physical, psychosocial, cognitive, and language development.

Objectives:
• Demonstrate knowledge of current research as it applies to child development.
• Examine and evaluate the importance of the early years.

Content and Topics:
• Major current and historical theoretical frameworks of child development
• Play-Years Development (including but not limited to physical, social/emotional, cognitive, language, special needs, risk factors, and care and education at each level).

Course: Child, Family and Community

Student Learning Outcomes:
• Describe effective strategies that empower families and encourage family involvement in children’s development.

Objectives:
• Identify how the child develops within a system and is influenced by numerous factors of socialization including the role of the family, childcare, schooling and the community.
• Develop appropriate strategies to assist families experiencing stress.

Content and Topics:
• Major current and historical theoretical frameworks of socialization
• Interrelatedness of family, school and community as agents of socialization
• Role of family in children’s developmental outcomes.
• Teachers’ and caregivers’ influences on children and families
• Appropriate and effective communication strategies
Course: Introduction to Curriculum

Student Learning Outcomes:
• Recognize developmentally appropriate teaching strategies and apply them in supervised settings with young children.
• Identify play-based curriculum models and approaches, standards for early learning, and indicators of quality.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Identify ways in which the environment functions as an essential component of curriculum.

Content and Topics:
• Developmental theory as it applies to curriculum development.
• Innovative and best practices in teaching
• Use of current research
• Components of effective learning environments
• The Role of the ECE teacher

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.
• Examine the value of play as a vehicle for developing skills, knowledge, dispositions, and strengthening relationships among young children.

Objectives:
• Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
• Identify children’s developmental processes and describe adaptations to curriculum and environments needed to support all children.

Content and Topics:
• Current and historic models, influences, and approaches in the field of early childhood
• The importance of developmentally, culturally, linguistically appropriate practice.
• Characteristics and roles of an effective teacher in an early childhood setting

Course: Teaching in a Diverse Society

Student Learning Outcomes:
• Critically assess the components of linguistically and culturally relevant, inclusive, age-appropriate, anti-bias approaches in promoting optimum learning and development.
Course: Teaching in a Diverse Society – Continued

Objectives:
• Compare the historical and current perspectives involving diversity and inclusion and their impacts on children’s identity development and learning.

Content and Topics:
• Culturally and developmentally appropriate classrooms: curriculum, environment; human relationships
• Anti-bias approaches to all curriculum arenas, materials, activities, goals, assessment

Course: Practicum-Field Experience

Student Learning Outcomes:
• Evaluate the effectiveness of early childhood curriculum, classrooms, teaching strategies and how teachers involve families in their children’s development and learning to improve teaching practices for all children.
• Apply a variety of effective approaches, strategies and techniques supporting positive relationships with children and adults.

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
• Present and evaluate a variety of developmentally, culturally and linguistically appropriate play-based learning experiences.
• Analyze student teaching experiences to inform and guide future teaching and collaborative practices.

Content and Topics:
• Application of developmentally, culturally, and linguistically appropriate practices
• Environment as a teaching and learning tool
• California State Learning Standards and tools
• Family involvement in early childhood programs
Unit 2
Chapter 2: History–Social Science Domain

Key Topic 2 – Getting to Know Environments and Materials That Support History–Social Science

Course: Child Growth and Development

Student Learning Outcomes:
• Apply developmental theory to child observations, surveys, and/or interviews using investigative research methodologies.

Objectives:
• Demonstrate objective techniques and skills when observing, interviewing, describing and evaluating behavior in children of all ages.
• Examine and evaluate the importance of the early years.

Content and Topics:
• The role and influence of family and caregivers

Course: Introduction to Curriculum

Student Learning Outcomes:
• Use the ongoing cycle of curriculum development to plan, implement, and evaluate early childhood activities and environments.

Objectives:
• Identify ways in which the environment functions as an essential component of curriculum.
• Demonstrate how curriculum and environment can be designed and adapted for children’s unique and individual ages, stages, and needs.

Content and Topics:
• Innovative and best practices in teaching
• Program models and approaches (Reggio, Montessori, High Scope, Creative Curriculum, Waldorf, Bank Street, etc.)
• Effective use of learning centers and integrated curriculum
• Components of effective learning environments
• The effect of environment on behavior
Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Assess early childhood settings, curriculum, and teaching strategies utilizing indicators of quality early childhood practice that support all children including those with diverse characteristics and their families.

Objectives:
• Differentiate between program types (age, funding stream, purpose, policies, environments, etc.), delivery systems, quality standards, licensing and regulation structures in early childhood settings.
• Identify children’s developmental processes and describe adaptations to curriculum and environments needed to support all children.

Content and Topics:
• Characteristics and roles of an effective teacher in an early childhood setting
• The influence of environment on behavior and learning (environment as third teacher)

Course: Observation and Assessment

Student Learning Outcomes:
• Complete systematic observations using a variety of methods of data collection to assess the impact of the environment, interactions, and curriculum on children’s development and behavior.

Objectives:
• Use observation tools to identify quality in play-based environment, curriculum, and care routines, and to detect trends and anomalies in individuals and groups.
• Demonstrate knowledge of the role of observation and assessment in intervention.

Content and Topics:
• Utilization of observation and assessment data to create appropriate curricula and environments
• Observation as part of the on-going process of curriculum and planning that support all children.

Course: Practicum-Field Experience

Student Learning Outcomes:
• Design, implement and evaluate curriculum activities that are based on observation and assessment of young children.
• Critically assess one’s own teaching experiences to guide and inform practice.

Objectives:
• Assume teaching and non-teaching responsibilities and demonstrate developmentally appropriate practices in an early childhood classroom.
Course: Practicum-Field Experience – Continued

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.

Content and Topics:
• Organization of physical environment, routine/schedule, and materials
• Environment as a teaching and learning tool
• California State Learning Standards and tools
Unit 2
Chapter 2: History–Social Science Domain

Key Topic 3 – Getting to Know Interactions and Strategies That Support History–Social Science

Course: Child Growth and Development

Student Learning Outcomes:
• Describe major developmental milestones for children from conception through adolescence in the areas of physical, psychosocial, cognitive, and language development.
• Identify cultural, economic, political, historical contexts that affect children’s development.

Objectives:
• Examine and evaluate the importance of the early years.
• Examine and evaluate the role of family in facilitating children’s development.
• Identify and describe biological and environmental factors that influence children’s development from conception to adolescence across domains.

Content and Topics:
• Contemporary social issues that impact children’s development
• The role and influence of cultural and societal impacts

Course: Child, Family and Community

Student Learning Outcomes:
• Describe social issues, changes, and transitions that affect children, families, schools, and communities.
• Identify and evaluate community support services and agencies available to families and children.

Objectives:
• Identify how the child develops within a system and is influenced by numerous factors of socialization including the role of the family, childcare, schooling and the community.
• Identify appropriate community resources that support children and families including at risk populations.
• Explore one’s own family history and examine how it affects one’s relationships with children and families.

Content and Topics:
• Interrelatedness of family, school and community as agents of socialization
• The role of group childcare and early schooling on socialization
Course: Introduction to Curriculum

Student Learning Outcomes:
• Use the ongoing cycle of curriculum development to plan, implement, and evaluate early childhood activities and environments.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Demonstrate ability to select safe and appropriate materials and equipment.
• Identify ways in which development in all domains and learning in all content areas can be integrated across the curriculum.

Content and Topics:
• Consideration of cultural, linguistic, ethnic, economic, ability and gender diversity including the acquisition of English as a second language in planning for young children
• Innovative and best practices in teaching
• Use of current research
• Content areas (math, science, literacy, social studies, creative arts)
• The development of the whole child (physical, cognitive, and social/emotional development, including socialization, self-regulation, self-help skills for all children)

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.
• Assess early childhood settings, curriculum, and teaching strategies utilizing indicators of quality early childhood practice that support all children including those with diverse characteristics and their families.

Objectives:
• Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
• Identify children’s developmental processes and describe adaptations to curriculum and environments needed to support all children.

Content and Topics:
• Addressing the needs of the “whole child” (physical, cognitive, social-emotional)
• The influence of environment on behavior and learning (environment as third teacher)
• Quality indicators of programs (e.g., accreditation, assessment tools)
Course: Observation and Assessment

Student Learning Outcomes:
• Identify the role of partnerships with families and other professionals in utilizing interpretations of observational data to inform teaching practices.

Objectives:
• Describe the effect of social context, child’s state of health and well-being, primary language, ability, and environment on assessment processes.
• Demonstrate and apply knowledge of developmental domains to interpret observations.

Content and Topics:
• Utilization of observation and assessment data to create appropriate curricula and environments
• The value of collaboration with families and professionals
• Observation as part of the on-going process of curriculum and planning that support all children.

Course: Health, Safety and Nutrition

Student Learning Outcomes:
• Assess strategies to maximize the mental and physical health of children and adults in accordance with culturally, linguistic and developmentally sound practice.

Objectives:
• Compare and contrast various methods of collaboration with teachers and families to promote health and safety in settings for all children.
• Plan early childhood curriculum on the topics of health, safety, and nutrition in accordance with culturally, linguistic and developmentally sound practice.

Content and Topics:
• Respecting the cultural, linguistic, and developmental differences of families, teachers and children
• Nutrition guidelines, diet analysis and mealtime policies, food safety and menu planning considering culture, traditions and family choices

Course: Teaching in a Diverse Society

Student Learning Outcomes:
• Analyze various aspects of children’s experience as members of families targeted by social bias considering the significant role of education in reinforcing or contradicting such experiences.
• Critically assess the components of linguistically and culturally relevant, inclusive, age-appropriate, anti-bias approaches in promoting optimum learning and development.
Course: Teaching in a Diverse Society – Continued

Objectives:
- Compare the historical and current perspectives involving diversity and inclusion and their impacts on children’s identity development and learning.
- Differentiate between various sources of diversity.
- Evaluate inclusive classroom environments, materials and approaches for developmental, cultural, and linguistic appropriateness.
- Investigate and develop strategies to create partnerships with families on issues of bias and injustice through building mutual, collaborative relationships.

Content and Topics:
- How children think: pre-prejudice, impacts of silence, overt and covert social messages
- Culturally and developmentally appropriate classrooms: curriculum, environment; human relationships
- Anti-bias approaches to all curriculum arenas, materials, activities, goals, assessment
- Environments and curriculums that respectively reflect children’s cultures and experiences and that expose children to the larger communities in which they live

Course: Practicum-Field Experience

Student Learning Outcomes:
- Apply a variety of effective approaches, strategies and techniques supporting positive relationships with children and adults.
- Critically assess one's own teaching experiences to guide and inform practice.

Objectives:
- Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
- Integrate content areas and opportunities for development across the curriculum.

Content and Topics:
- Application of developmentally, culturally, and linguistically appropriate practices
- Content Areas:
  - Social Studies
Unit 2
Chapter 2: History–Social Science Domain

Key Topic 4 – Universal Design, Individualizing, and Family Partnerships

Course: Child Growth and Development
Student Learning Outcomes:
• Differentiate characteristics of typical and atypical development.

Objectives:
• Examine and evaluate the importance of the early years.
• Examine and evaluate the role of family in facilitating children’s development.

Content and Topics:
• The role and influence of family and caregivers
• The role and influence of cultural and societal impacts

Course: Child, Family and Community
Student Learning Outcomes:
• Describe effective strategies that empower families and encourage family involvement in children’s development.

Objectives:
• Describe contemporary social issues and their effects on families and children.
• Develop appropriate strategies to assist families experiencing stress.

Content and Topics:
• Role of family in children’s developmental outcomes.
• Teachers’ and caregivers’ influences on children and families
• The influence of teachers’ and caregivers’ personal experience and family history on relationships with children and families.

Course: Introduction to Curriculum
Student Learning Outcomes:
• Recognize developmentally appropriate teaching strategies and apply them in supervised settings with young children.
• Demonstrate an understanding of the many aspects of the teachers’ role in early childhood programs.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Demonstrate how curriculum and environment can be designed and adapted for children’s unique and individual ages, stages, and needs.
Course: Introduction to Curriculum – Continued

Content and Topics:
- Consideration of cultural, linguistic, ethnic, economic, ability and gender diversity including the acquisition of English as a second language in planning for young children
- Planning for diverse learning styles, motivations, interests, and abilities
- Innovative and best practices in teaching
- Planning for children with special needs

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
- Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.

Objectives:
- Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
- Identify children’s developmental processes and describe adaptations to curriculum and environments needed to support all children.

Content and Topics:
- Attention to developmental needs of children of different ages (infant/toddler, preschool, school-age)
- The importance of developmentally, culturally, linguistically appropriate practice.
- Applying developmentally-appropriate practices to normative and atypical development

Course: Health, Safety and Nutrition

Student Learning Outcomes:
- Discuss the value of collaboration with families and the community.

Objectives:
- Compare and contrast various methods of collaboration with teachers and families to promote health and safety in settings for all children.
- Plan early childhood curriculum on the topics of health, safety, and nutrition in accordance with culturally, linguistic and developmentally sound practice.

Content and Topics:
- Respecting the cultural, linguistic, and developmental differences of families, teachers and children
- Collaboration with families and health care professionals
Course: Teaching in a Diverse Society

Student Learning Outcomes:
• Critically assess the components of linguistically and culturally relevant, inclusive, age-appropriate, anti-bias approaches in promoting optimum learning and development.

Objectives:
• Compare the historical and current perspectives involving diversity and inclusion and their impacts on children’s identity development and learning.
• Evaluate inclusive classroom environments, materials and approaches for developmental, cultural, and linguistic appropriateness.
• Investigate and develop strategies to create partnerships with families on issues of bias and injustice through building mutual, collaborative relationships.

Content and Topics:
• Culturally and developmentally appropriate classrooms: curriculum, environment; human relationships
• Environments and curriculums that respectively reflect children’s cultures and experiences and that expose children to the larger communities in which they live
• Teachers and families: teacher responsibility to assess power dynamics; and commitment to co-creation of anti-bias approaches

Course: Practicum-Field Experience

Student Learning Outcomes:
• Integrate understanding of children’s development and needs to create and maintain healthy, safe, respectful, supportive and challenging learning environments for all children.
• Apply a variety of effective approaches, strategies and techniques supporting positive relationships with children and adults.

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
• Analyze student teaching experiences to inform and guide future teaching and collaborative practices.

Content and Topics:
• Application of developmentally, culturally, and linguistically appropriate practices
• Adaptations for children with diverse abilities, learning styles, and temperaments
• California State Learning Standards and tools
• Family involvement in early childhood programs
Unit 2

Chapter 2: History–Social Science Domain

Key Topic 5 – Exploring the Research Highlights of the History–Social Science Domain

Course: Child Growth and Development

Student Learning Outcomes:
• Apply developmental theory to child observations, surveys, and/or interviews using investigative research methodologies.

Objectives:
• Demonstrate knowledge of current research as it applies to child development.
• Identify and describe biological and environmental factors that influence children’s development from conception to adolescence across domains.

Content and Topics:
• Contemporary social issues that impact children’s development
• The role and influence of cultural and societal impacts

Course: Introduction to Curriculum

Student Learning Outcomes:
• Demonstrate an understanding of the many aspects of the teachers’ role in early childhood programs.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.

Content and Topics:
• Developmental theory as it applies to curriculum development.
• Use of current research
• The development of the whole child (physical, cognitive, and social/emotional development, including socialization, self-regulation, self-help skills for all children)

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.
Course: Principles and Practices of Teaching Young Children – Continued

Objectives:
- Investigate various foundations and theories in the field of early childhood education as a basis for forming a personal philosophy of teaching and developing professional goals.

Content and Topics:
- Current and historic models, influences, and approaches in the field of early childhood
- Characteristics and roles of an effective teacher in an early childhood setting

Course: Teaching in a Diverse Society

Student Learning Outcomes:
- Critique the multiple societal impacts on young children’s social identity.

Objectives:
- Compare the historical and current perspectives involving diversity and inclusion and their impacts on children’s identity development and learning.

Content and Topics:
- Anti-bias approaches to all curriculum arenas, materials, activities, goals, assessment
- Teachers and families: teacher responsibility to assess power dynamics; and commitment to co-creation of anti-bias approaches

Course: Practicum-Field Experience

Student Learning Outcomes:
- Integrate understanding of children’s development and needs to create and maintain healthy, safe, respectful, supportive and challenging learning environments for all children.
- Evaluate the effectiveness of early childhood curriculum, classrooms, teaching strategies and how teachers involve families in their children’s development and learning to improve teaching practices for all children.

Objectives:
- Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
- Present and evaluate a variety of developmentally, culturally and linguistically appropriate play-based learning experiences.

Content and Topics:
- Self reflection and self-assessment through team collaboration and portfolio documentation
- Professional development skills
- California State Learning Standards and tools
Unit 3
Chapter 3: Science Domain

Getting Ready for the Unit and Connecting to Experience

Course: Introduction to Curriculum

Student Learning Outcomes:
• Recognize developmentally appropriate teaching strategies and apply them in supervised settings with young children.
• Use the ongoing cycle of curriculum development to plan, implement, and evaluate early childhood activities and environments.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Observe and document children at play and propose appropriate activities and possibilities for expanding children’s learning in a variety of curriculum areas.
• Identify ways in which development in all domains and learning in all content areas can be integrated across the curriculum.

Content and Topics:
• Observation and assessment strategies as they apply to curriculum planning and evaluation.
• Innovative and best practices in teaching
• Program models and approaches (Reggio, Montessori, High Scope, Creative Curriculum, Waldorf, Bank Street, etc.)

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.
• Examine the value of play as a vehicle for developing skills, knowledge, dispositions, and strengthening relationships among young children.

Objectives:
• Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
• Investigate various foundations and theories in the field of early childhood education as a basis for forming a personal philosophy of teaching and developing professional goals.
• Demonstrate basic observational skills.
Course: Principles and Practices of Teaching Young Children – Continued

Content and Topics:
- Addressing the needs of the “whole child” (physical, cognitive, social-emotional)
- Characteristics and roles of an effective teacher in an early childhood setting

Course: Observation and Assessment

Student Learning Outcomes:
- Compare the purpose, value and use of formal and informal observation and assessment strategies.
- Complete systematic observations using a variety of methods of data collection to assess the impact of the environment, interactions, and curriculum on children’s development and behavior.

Objectives:
- Identify and apply basic quantitative and qualitative observation and recording techniques.
- Use observation tools to identify quality in play-based environment, curriculum, and care routines, and to detect trends and anomalies in individuals and groups.

Content and Topics:
- Historic and current tools of observation and assessment
- Utilization of observation and assessment data to create appropriate curricula and environments
- Observation as part of the on-going process of curriculum and planning that support all children.

Course: Practicum-Field Experience

Student Learning Outcomes:
- Apply a variety of effective approaches, strategies and techniques supporting positive relationships with children and adults.
- Critically assess one’s own teaching experiences to guide and inform practice.

Objectives:
- Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
- Analyze classroom space and daily routines in terms of their effect on the behavior and interactions of children and teachers.
- Analyze classroom space and daily routines in terms of their effect on the behavior and interactions of children and teachers.

Content and Topics:
- Authentic assessment and documentation
- Self reflection and self-assessment through team collaboration and portfolio documentation
Course: Practicum-Field Experience – Continued

Content and Topics:

• Ongoing Curriculum Development Cycle
  a. Observation
  b. Planning
  c. Implementation
  d. Evaluation
  e. Documentation

• Content Areas:
  o Science

• California State Learning Standards and tools
Unit 3
Chapter 3: Science Domain

Key Topic 1 – Organization and Rationale of the Science Domain

Course: Child Growth and Development

Student Learning Outcomes:
• Describe major developmental milestones for children from conception through adolescence in the areas of physical, psychosocial, cognitive, and language development.

Objectives:
• Demonstrate knowledge of the physical, social/emotional, cognitive and language development of children, both typical and atypical, in major developmental stages.
• Demonstrate knowledge of current research as it applies to child development.

Content and Topics:
• Major current and historical theoretical frameworks of child development
• The role and influence of family and caregivers

Course: Child, Family and Community

Student Learning Outcomes:
• Describe effective strategies that empower families and encourage family involvement in children’s development.

Objectives:
• Describe contemporary social issues and their effects on families and children.

Content and Topics:
• Interrelatedness of family, school and community as agents of socialization
• Teachers’ and caregivers’ influences on children and families

Course: Introduction to Curriculum

Student Learning Outcomes:
• Identify play-based curriculum models and approaches, standards for early learning, and indicators of quality.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Identify ways in which development in all domains and learning in all content areas can be integrated across the curriculum.
Course: Introduction to Curriculum – Continued

Content and Topics:
• Innovative and best practices in teaching
• Use of current research
• Strategies for family involvement
• Content areas (science)

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Assess early childhood settings, curriculum, and teaching strategies utilizing indicators of quality early childhood practice that support all children including those with diverse characteristics and their families.

Objectives:
• Investigate various foundations and theories in the field of early childhood education as a basis for forming a personal philosophy of teaching and developing professional goals.
• Describe the characteristics of effective relationships and interactions between early childhood professionals, children, families, and colleagues including the importance of collaboration.

Content and Topics:
• Characteristics and roles of an effective teacher in an early childhood setting
• Collaboration and partnerships with families, colleagues, and health care professionals

Course: Practicum-Field Experience

Student Learning Outcomes:
• Evaluate the effectiveness of early childhood curriculum, classrooms, teaching strategies and how teachers involve families in their children’s development and learning to improve teaching practices for all children.

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
• Analyze classroom space and daily routines in terms of their effect on the behavior and interactions of children and teachers.

Content and Topics:
• Self reflection and self-assessment through team collaboration and portfolio documentation
• Content Areas:
  o Science
• California State Learning Standards and tools
• Family involvement in early childhood programs
Unit 3
Chapter 3: Science Domain

Key Topic 2 – Getting to Know Environmental Factors That Support Science

Course: Child, Family and Community

Student Learning Outcomes:
• Describe effective strategies that empower families and encourage family involvement in children’s development.

Objectives:
• Identify how the child develops within a system and is influenced by numerous factors of socialization including the role of the family, childcare, schooling and the community.

Content and Topics:
• Interrelatedness of family, school and community as agents of socialization
• Teachers’ and caregivers’ influences on children and families

Course: Introduction to Curriculum

Student Learning Outcomes:
• Recognize developmentally appropriate teaching strategies and apply them in supervised settings with young children.
• Demonstrate an understanding of the many aspects of the teachers’ role in early childhood programs.
• Identify play-based curriculum models and approaches, standards for early learning, and indicators of quality.
• Use the ongoing cycle of curriculum development to plan, implement, and evaluate early childhood activities and environments.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Demonstrate ability to select safe and appropriate materials and equipment.
• Identify ways in which development in all domains and learning in all content areas can be integrated across the curriculum.

Content and Topics:
• Developmental theory as it applies to curriculum development.
• Innovative and best practices in teaching
• Effective use of learning centers and integrated curriculum
• The effect of environment on behavior
• Content areas (math, science, literacy, social studies, creative arts)
Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:

- Assess early childhood settings, curriculum, and teaching strategies utilizing indicators of quality early childhood practice that support all children including those with diverse characteristics and their families.
- Analyze the relationship between observation, planning, implementation and assessment in developing effective teaching strategies and positive learning and development.

Objectives:

- Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
- Identify children’s developmental processes and describe adaptations to curriculum and environments needed to support all children.
- Describe the relationship of observation, planning, implementation, and assessment in effective programming.

Content and Topics:

- Addressing the needs of the “whole child” (physical, cognitive, social-emotional)
- Characteristics and roles of an effective teacher in an early childhood setting
- The influence of environment on behavior and learning (environment as third teacher)
- Quality indicators of programs (e.g., accreditation, assessment tools)

Course: Observation and Assessment

Student Learning Outcomes:

- Complete systematic observations using a variety of methods of data collection to assess the impact of the environment, interactions, and curriculum on children’s development and behavior.

Objectives:

- Use observation tools to identify quality in play-based environment, curriculum, and care routines, and to detect trends and anomalies in individuals and groups.

Content and Topics:

- Utilization of observation and assessment data to create appropriate curricula and environments
- Observation as part of the on-going process of curriculum and planning that support all children.
Course: Practicum-Field Experience

Student Learning Outcomes:
• Integrate understanding of children’s development and needs to create and maintain healthy, safe, respectful, supportive and challenging learning environments for all children.
• Evaluate the effectiveness of early childhood curriculum, classrooms, teaching strategies and how teachers involve families in their children’s development and learning to improve teaching practices for all children.

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
• Analyze classroom space and daily routines in terms of their effect on the behavior and interactions of children and teachers.
• Integrate content areas and opportunities for development across the curriculum.

Content and Topics:
• Organization of physical environment, routine/schedule, and materials
• Positive interactions with children and adults
• Content Areas:
  o Science
• Environment as a teaching and learning tool
• California State Learning Standards and tools
Unit 3
Chapter 3: Science Domain

Key Topic 3 – Getting to Know Interactions and Strategies That Support Science

Course: Introduction to Curriculum

Student Learning Outcomes:
• Recognize developmentally appropriate teaching strategies and apply them in supervised settings with young children.
• Demonstrate an understanding of the many aspects of the teachers’ role in early childhood programs.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Identify ways in which development in all domains and learning in all content areas can be integrated across the curriculum.

Content and Topics:
• Developmental theory as it applies to curriculum development.
• Planning for diverse learning styles, motivations, interests, and abilities
• Innovative and best practices in teaching
• Components of effective learning environments
• Content areas (science)

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Assess early childhood settings, curriculum, and teaching strategies utilizing indicators of quality early childhood practice that support all children including those with diverse characteristics and their families.
• Examine a variety of guidance and interaction strategies to increase children’s social competence and promote a caring classroom community.

Objectives:
• Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.

Content and Topics:
• Addressing the needs of the “whole child” (physical, cognitive, social-emotional)
• The importance of developmentally, culturally, linguistically appropriate practice.
• Characteristics and roles of an effective teacher in an early childhood setting
Course: Practicum-Field Experience

Student Learning Outcomes:

- Evaluate the effectiveness of early childhood curriculum, classrooms, teaching strategies and how teachers involve families in their children’s development and learning to improve teaching practices for all children.
- Critically assess one’s own teaching experiences to guide and inform practice.

Objectives:

- Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
- Analyze classroom space and daily routines in terms of their effect on the behavior and interactions of children and teachers.
- Analyze student teaching experiences to inform and guide future teaching and collaborative practices.

Content and Topics:

- Application of developmentally, culturally, and linguistically appropriate practices
- Content Areas:
  - Science
- California State Learning Standards and tools
Unit 3
Chapter 3: Science Domain

Key Topic 4 – Universal Design, Individualizing, and Family Partnerships

Course: Child Growth and Development

Student Learning Outcomes:
• Differentiate characteristics of typical and atypical development.

Objectives:
• Examine and evaluate the importance of the early years.
• Examine and evaluate the role of family in facilitating children’s development.

Content and Topics:
• The role and influence of family and caregivers
• The role and influence of cultural and societal impacts

Course: Child, Family and Community

Student Learning Outcomes:
• Describe effective strategies that empower families and encourage family involvement in children’s development.

Objectives:
• Describe contemporary social issues and their effects on families and children.
• Develop appropriate strategies to assist families experiencing stress.

Content and Topics:
• Role of family in children’s developmental outcomes.
• Teachers’ and caregivers’ influences on children and families
• The influence of teachers’ and caregivers’ personal experience and family history on relationships with children and families.

Course: Introduction to Curriculum

Student Learning Outcomes:
• Recognize developmentally appropriate teaching strategies and apply them in supervised settings with young children.
• Demonstrate an understanding of the many aspects of the teachers’ role in early childhood programs.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Demonstrate how curriculum and environment can be designed and adapted for children’s unique and individual ages, stages, and needs.
Course: Introduction to Curriculum – Continued

Content and Topics:
• Consideration of cultural, linguistic, ethnic, economic, ability and gender diversity including the acquisition of English as a second language in planning for young children
• Planning for diverse learning styles, motivations, interests, and abilities
• Innovative and best practices in teaching
• Planning for children with special needs

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.

Objectives:
• Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
• Identify children’s developmental processes and describe adaptations to curriculum and environments needed to support all children.

Content and Topics:
• Attention to developmental needs of children of different ages (infant/toddler, preschool, school-age)
• The importance of developmentally, culturally, linguistically appropriate practice.
• Applying developmentally-appropriate practices to normative and atypical development

Course: Health, Safety, and Nutrition

Student Learning Outcomes:
• Discuss the value of collaboration with families and the community.

Objectives:
• Compare and contrast various methods of collaboration with teachers and families to promote health and safety in settings for all children.
• Plan early childhood curriculum on the topics of health, safety, and nutrition in accordance with culturally, linguistic and developmentally sound practice.

Content and Topics:
• Respecting the cultural, linguistic, and developmental differences of families, teachers and children
• Collaboration with families and health care professionals
Course: Teaching in a Diverse Society

Student Learning Outcomes:
• Critically assess the components of linguistically and culturally relevant, inclusive, age-appropriate, anti-bias approaches in promoting optimum learning and development.

Objectives:
• Compare the historical and current perspectives involving diversity and inclusion and their impacts on children’s identity development and learning.
• Evaluate inclusive classroom environments, materials and approaches for developmental, cultural, and linguistic appropriateness.
• Investigate and develop strategies to create partnerships with families on issues of bias and injustice through building mutual, collaborative relationships.

Content and Topics:
• Culturally and developmentally appropriate classrooms: curriculum, environment; human relationships
• Environments and curriculums that respectively reflect children’s cultures and experiences and that expose children to the larger communities in which they live
• Teachers and families: teacher responsibility to assess power dynamics; and commitment to co-creation of anti-bias approaches

Course: Practicum-Field Experience

Student Learning Outcomes:
• Integrate understanding of children’s development and needs to create and maintain healthy, safe, respectful, supportive and challenging learning environments for all children.
• Apply a variety of effective approaches, strategies and techniques supporting positive relationships with children and adults.

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
• Analyze student teaching experiences to inform and guide future teaching and collaborative practices.

Content and Topics:
• Application of developmentally, culturally, and linguistically appropriate practices
• Adaptations for children with diverse abilities, learning styles, and temperaments
• California State Learning Standards and tools
• Family involvement in early childhood programs
Unit 3
Chapter 3: Science Domain

Key Topic 5 – Exploring the Research Highlights of the Science Domain

Course: Child Growth and Development
Student Learning Outcomes:
• Apply developmental theory to child observations, surveys, and/or interviews using investigative research methodologies.

Objectives:
• Demonstrate knowledge of current research as it applies to child development.
• Identify and describe biological and environmental factors that influence children’s development from conception to adolescence across domains

Content and Topics:
• Contemporary social issues that impact children’s development
• The role and influence of cultural and societal impacts

Course: Introduction to Curriculum
Student Learning Outcomes:
• Demonstrate an understanding of the many aspects of the teachers’ role in early childhood programs.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.

Content and Topics:
• Developmental theory as it applies to curriculum development.
• Use of current research
• The development of the whole child (physical, cognitive, and social/emotional development, including socialization, self-regulation, self-help skills for all children)

Course: Principles and Practices of Teaching Young Children
Student Learning Outcomes:
• Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.
Course: Principles and Practices of Teaching Young Children – Continued

Objectives:
• Investigate various foundations and theories in the field of early childhood education as a basis for forming a personal philosophy of teaching and developing professional goals.

Content and Topics:
• Current and historic models, influences, and approaches in the field of early childhood
• Characteristics and roles of an effective teacher in an early childhood setting

Course: Teaching in a Diverse Society

Student Learning Outcomes:
• Critique the multiple societal impacts on young children’s social identity.

Objectives:
• Compare the historical and current perspectives involving diversity and inclusion and their impacts on children’s identity development and learning.

Content and Topics:
• Anti-bias approaches to all curriculum arenas, materials, activities, goals, assessment
• Teachers and families: teacher responsibility to assess power dynamics; and commitment to co-creation of anti-bias approaches

Course: Practicum-Field Experience

Student Learning Outcomes:
• Integrate understanding of children’s development and needs to create and maintain healthy, safe, respectful, supportive and challenging learning environments for all children.
• Evaluate the effectiveness of early childhood curriculum, classrooms, teaching strategies and how teachers involve families in their children’s development and learning to improve teaching practices for all children.

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
• Present and evaluate a variety of developmentally, culturally and linguistically appropriate play-based learning experiences.

Content and Topics:
• Self reflection and self-assessment through team collaboration and portfolio documentation
• Professional development skills
• California State Learning Standards and tools
Unit 4
California Preschool Curriculum Framework as a Resource for Planning and Integrating Curriculum

Key Topic 1: Integrating the History–Social Science or Science Domains with Other Domains

Course: Introduction to Curriculum

Student Learning Outcomes:
- Recognize developmentally appropriate teaching strategies and apply them in supervised settings with young children.
- Identify play-based curriculum models and approaches, standards for early learning, and indicators of quality.

Objectives:
- Identify and evaluate teaching behaviors for research-based best practices.
- Observe and document children at play and propose appropriate activities and possibilities for expanding children's learning in a variety of curriculum areas.
- Identify ways in which development in all domains and learning in all content areas can be integrated across the curriculum.

Content and Topics:
- Innovative and best practices in teaching
- Use of current research
- Effective use of learning centers and integrated curriculum
- Content areas (math, science, literacy, social studies, creative arts)

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
- Assess early childhood settings, curriculum, and teaching strategies utilizing indicators of quality early childhood practice that support all children including those with diverse characteristics and their families.
- Examine a variety of guidance and interaction strategies to increase children's social competence and promote a caring classroom community.
- Analyze the relationship between observation, planning, implementation and assessment in developing effective teaching strategies and positive learning and development.

Objectives:
- Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
- Demonstrate basic observational skills.
Course: Principles and Practices of Teaching Young Children – Continued

Objectives:
• Describe the relationship of observation, planning, implementation, and assessment in effective programming.

Content and Topics:
• Addressing the needs of the “whole child” (physical, cognitive, social-emotional)
• The importance of developmentally, culturally, linguistically appropriate practice.
• Importance of positive teacher-child relationships and interactions
• The influence of environment on behavior and learning (environment as third teacher)

Course: Observation and Assessment

Student Learning Outcomes:
• Complete systematic observations using a variety of methods of data collection to assess the impact of the environment, interactions, and curriculum on children’s development and behavior.

Objectives:
• Identify and apply basic quantitative and qualitative observation and recording techniques.
• Use observation tools to identify quality in play-based environment, curriculum, and care routines, and to detect trends and anomalies in individuals and groups.
• Demonstrate and apply knowledge of developmental domains to interpret observations.

Content and Topics:
• National and State standards for learning and assessment (e.g., NAEYC’s position statement on assessment)
• Utilization of observation and assessment data to create appropriate curricula and environments
• Observation as part of the on-going process of curriculum and planning that support all children.

Course: Practicum-Field Experience

Student Learning Outcomes:
• Integrate understanding of children’s development and needs to create and maintain healthy, safe, respectful, supportive and challenging learning environments for all children.
• Evaluate the effectiveness of early childhood curriculum, classrooms, teaching strategies and how teachers involve families in their children’s development and learning to improve teaching practices for all children.
Course: Practicum-Field Experience – Continued

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children
• Present and evaluate a variety of developmentally, culturally and linguistically appropriate play-based learning experiences
• Integrate content areas and opportunities for development across the curriculum

Content and Topics:
• Authentic assessment and documentation
• Content Areas
  a. Language
  b. Literacy
  c. Math
  d. Science
  e. Social Studies
  f. Visual and performing arts
• Integration of content areas across curriculum
• Environment as a teaching and learning tool
• California State Learning Standards and tools
Unit 4
California Preschool Curriculum Framework as a Resource for Planning and Integrating Curriculum

Key Topic 2: Integrated Planning Using California’s Early Learning and Development System

Course: Introduction to Curriculum

Student Learning Outcomes:
• Demonstrate an understanding of the many aspects of the teachers’ role in early childhood programs.
• Identify play-based curriculum models and approaches, standards for early learning, and indicators of quality.
• Use the ongoing cycle of curriculum development to plan, implement, and evaluate early childhood activities and environments.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Demonstrate how curriculum and environment can be designed and adapted for children’s unique and individual ages, stages, and needs.

Content and Topics:
• Observation and assessment strategies as they apply to curriculum planning and evaluation.
• Use of current research
• Components of effective learning environments
• Planning for children with special needs
• The continuing cycle of observation, assessment, curriculum planning, documentation.

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Interpret best and promising teaching and care practices as defined within the field of early care and education’s history, range of delivery systems, program types and philosophies and ethical standards.
• Analyze the relationship between observation, planning, implementation and assessment in developing effective teaching strategies and positive learning and development.

Objectives:
• Differentiate between program types (age, funding stream, purpose, policies, environments, etc.), delivery systems, quality standards, licensing and regulation structures in early childhood settings.
Course: Principles and Practices of Teaching Young Children – Continued

Objectives:
• Identify children’s developmental processes and describe adaptations to curriculum and environments needed to support all children.
• Describe the relationship of observation, planning, implementation, and assessment in effective programming.

Content and Topics:
• Current and historic models, influences, and approaches in the field of early childhood
• The importance of developmentally, culturally, linguistically appropriate practice.
• Applying developmentally-appropriate practices to normative and atypical development

Course: Observation and Assessment

Student Learning Outcomes:
• Compare the purpose, value and use of formal and informal observation and assessment strategies.
• Evaluate the characteristics, strengths and limitations of common assessment tools.
• Complete systematic observations using a variety of methods of data collection to assess the impact of the environment, interactions, and curriculum on children’s development and behavior.

Objectives:
• Identify and apply basic quantitative and qualitative observation and recording techniques.
• Compare and analyze historic and currently recognized assessment tools.
• Use observation tools to identify quality in play-based environment, curriculum, and care routines, and to detect trends and anomalies in individuals and groups.
• Demonstrate knowledge of the role of observation and assessment in intervention.

Content and Topics:
• National and State standards for learning and assessment (e.g., NAEYC’s position statement on assessment)
• Utilization of observation and assessment data to create appropriate curricula and environments
• Linkage between child development theory and research to observation and assessment
• Role of assessment in intervention
Course: Practicum-Field Experience

Student Learning Outcomes:
- Design, implement and evaluate curriculum activities that are based on observation and assessment of young children.
- Critically assess one’s own teaching experiences to guide and inform practice.

Objectives:
- Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
- Analyze student teaching experiences to inform and guide future teaching and collaborative practices.
- Utilize an appropriate recordkeeping system to document, assess and track children’s progress.
- Demonstrate professional and ethical behavior.

Content and Topics:
- Authentic assessment and documentation
- Self-reflection and self-assessment through team collaboration and portfolio documentation
- Content Areas
  - Language
  - Literacy
  - Math
  - Science
  - Social Studies
  - Visual and performing arts
- California State Learning Standards and tools
Unit 4
California Preschool Curriculum Framework as a Resource for Planning and Integrating Curriculum

Key Topic 3: Young Dual Language Learners

Course: Child Growth and Development

Student Learning Outcomes:
• Describe major developmental milestones for children from conception through adolescence in the areas of physical, psychosocial, cognitive, and language development.

Objectives:
• Demonstrate knowledge of the physical, social/emotional, cognitive and language development of children, both typical and atypical, in major developmental stages.
• Demonstrate knowledge of current research as it applies to child development.
• Examine and evaluate the importance of the early years.

Content and Topics:
• Major current and historical theoretical frameworks of child development
• Play-Years Development (including but not limited to physical, social/emotional, cognitive, language, special needs, risk factors, and care and education at each level).
• Bilingual development and theories of language learning and bilingualism

Course: Introduction to Curriculum

Student Learning Outcomes:
• Recognize developmentally appropriate teaching strategies and apply them in supervised settings with young children.
• Identify play-based curriculum models and approaches, standards for early learning, and indicators of quality.
• Use the ongoing cycle of curriculum development to plan, implement, and evaluate early childhood activities and environments.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Demonstrate how curriculum and environment can be designed and adapted for children’s unique and individual ages, stages, and needs.
• Observe and document children at play and propose appropriate activities and possibilities for expanding children’s learning in a variety of curriculum areas.
• Identify ways in which development in all domains and learning in all content areas can be integrated across the curriculum.
Course: Introduction to Curriculum – Continued

Content and Topics:
• Consideration of cultural, linguistic, ethnic, economic, ability and gender diversity including the acquisition of English as a second language in planning for young children
• Planning for diverse learning styles, motivations, interests, and abilities
• Effective use of learning centers and integrated curriculum
• The effect of environment on behavior

Course: Principles and Practices of Teaching Young Children

Student Learning Outcomes:
• Assess early childhood settings, curriculum, and teaching strategies utilizing indicators of quality early childhood practice that support all children including those with diverse characteristics and their families.

Objectives:
• Identify components of a play-based curriculum which is developmentally, culturally and linguistically appropriate and supports the development of all young children.
• Identify children’s developmental processes and describe adaptations to curriculum and environments needed to support all children.

Content and Topics:
• Current and historic models, influences, and approaches in the field of early childhood
• The importance of developmentally, culturally, linguistically appropriate practice.

Course: Teaching in a Diverse Society

Student Learning Outcomes:
• Analyze various aspects of children’s experience as members of families targeted by social bias considering the significant role of education in reinforcing or contradicting such experiences.
• Critically assess the components of linguistically and culturally relevant, inclusive, age-appropriate, anti-bias approaches in promoting optimum learning and development.

Objectives:
• Compare the historical and current perspectives involving diversity and inclusion and their impacts on children’s identity development and learning.
• Evaluate inclusive classroom environments, materials and approaches for developmental, cultural, and linguistic appropriateness.

Content and Topics:
• Culturally and developmentally appropriate classrooms: curriculum, environment; human relationships

Course: Teaching in a Diverse Society – Continued

Content and Topics:
• Anti-bias approaches to all curriculum arenas, materials, activities, goals, assessment
• Children’s books and media to support identity development and anti-bias thinking and represent home language, culture and traditions, stories and songs

Course: Practicum-Field Experience

Student Learning Outcomes:
• Integrate understanding of children’s development and needs to create and maintain healthy, safe, respectful, supportive and challenging learning environments for all children.
• Evaluate the effectiveness of early childhood curriculum, classrooms, teaching strategies and how teachers involve families in their children’s development and learning to improve teaching practices for all children.

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
• Present and evaluate a variety of developmentally, culturally and linguistically appropriate play-based learning experiences.

Content and Topics:
• Application of developmentally, culturally, and linguistically appropriate practices
• Adaptations for children with diverse abilities, learning styles, and temperaments
• California State Learning Standards and tools
Unit 4
California Preschool Curriculum Framework as a Resource for Planning and Integrating Curriculum

Key Topic 4: Exploring Key Elements of the Curriculum Framework Across Domains

Course: Introduction to Curriculum
Student Learning Outcomes:
• Recognize developmentally appropriate teaching strategies and apply them in supervised settings with young children.
• Identify play-based curriculum models and approaches, standards for early learning, and indicators of quality.

Objectives:
• Identify and evaluate teaching behaviors for research-based best practices.
• Identify ways in which the environment functions as an essential component of curriculum.
• Identify ways in which development in all domains and learning in all content areas can be integrated across the curriculum.

Content and Topics:
• Innovative and best practices in teaching
• Use of current research
• Components of effective learning environments
• Content areas (math, science, literacy, social studies, creative arts)

Course: Principles and Practices of Teaching Young Children
Student Learning Outcomes:
• Assess early childhood settings, curriculum, and teaching strategies utilizing indicators of quality early childhood practice that support all children including those with diverse characteristics and their families.
• Examine a variety of guidance and interaction strategies to increase children’s social competence and promote a caring classroom community.

Objectives:
• Identify children’s developmental processes and describe adaptations to curriculum and environments needed to support all children.
• Describe the characteristics of effective relationships and interactions between early childhood professionals, children, families, and colleagues including the importance of collaboration.
Course: Principles and Practices of Teaching Young Children – Continued

Content and Topics:
• Addressing the needs of the “whole child” (physical, cognitive, social-emotional)
• Importance of positive teacher-child relationships and interactions
• The influence of environment on behavior and learning (environment as third teacher)

Course: Practicum-Field Experience

Student Learning Outcomes:
• Integrate understanding of children’s development and needs to create and maintain healthy, safe, respectful, supportive and challenging learning environments for all children.
• Apply a variety of effective approaches, strategies and techniques supporting positive relationships with children and adults.

Objectives:
• Incorporate current research and understanding of developmental theories into the selection of learning materials and experiences for young children.
• Analyze classroom space and daily routines in terms of their effect on the behavior and interactions of children and teachers.
• Integrate content areas and opportunities for development across the curriculum

Content and Topics:
• Organization of physical environment, routine/schedule, and materials
• Positive interactions with children and adults
• Content Areas
  a. Language
  b. Literacy
  c. Math
  d. Science
  e. Social Studies
  f. Visual and performing arts
• Integration of content areas across curriculum
• California State Learning Standards and tools
## Appendix B

### The Foundations

#### Social-Emotional Development

**Self**

<table>
<thead>
<tr>
<th>1.0</th>
<th>Self-Awareness</th>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>Describe their physical characteristics, behavior, and abilities positively.</td>
<td>1.1 Compare their characteristics with those of others and display a growing awareness of their psychological characteristics, such as thoughts and feelings.</td>
<td></td>
</tr>
</tbody>
</table>

| 2.0  | Self-Regulation | 2.1 Need adult guidance in managing their attention, feelings, and impulses and show some effort at self-control. | 2.1 Regulate their attention, thoughts, feelings, and impulses more consistently, although adult guidance is sometimes necessary. |

| 3.0  | Social and Emotional Understanding | 3.1 Seek to understand people’s feelings and behavior, notice diversity in human characteristics, and are interested in how people are similar and different. | 3.1 Begin to comprehend the mental and psychological reasons people act as they do and how they contribute to differences between people. |

| 4.0  | Empathy and Caring | 4.1 Demonstrate concern for the needs of others and people in distress. | 4.1 Respond to another’s distress and needs with sympathetic caring and are more likely to assist. |

| 5.0  | Initiative in Learning | 5.1 Enjoy learning and are confident in their abilities to make new discoveries although may not persist at solving difficult problems. | 5.1 Take greater initiative in making new discoveries, identifying new solutions, and persisting in trying to figure things out. |

## Social Interaction

### 1.0 Interactions with Familiar Adults

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>At around 48 months of age</td>
<td>1.1 Interact with familiar adults comfortably and competently, especially in familiar settings.</td>
</tr>
<tr>
<td>At around 60 months of age</td>
<td>1.1 Participate in longer and more reciprocal interactions with familiar adults and take greater initiative in social interaction.</td>
</tr>
</tbody>
</table>

### 2.0 Interactions with Peers

<table>
<thead>
<tr>
<th>Peer Interaction</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1</td>
<td>Interact easily with peers in shared activities that occasionally become cooperative efforts.</td>
</tr>
<tr>
<td>2.1</td>
<td>More actively and intentionally cooperate with each other.</td>
</tr>
<tr>
<td>2.2</td>
<td>Participate in simple sequences of pretend play.</td>
</tr>
<tr>
<td>2.2</td>
<td>Create more complex sequences of pretend play that involve planning, coordination of roles, and cooperation.</td>
</tr>
<tr>
<td>2.3</td>
<td>Seek assistance in resolving peer conflict, especially when disagreements have escalated into physical aggression.</td>
</tr>
<tr>
<td>2.3</td>
<td>Negotiate with each other, seeking adult assistance when needed, and increasingly use words to respond to conflict. Disagreements may be expressed with verbal taunting in addition to physical aggression.</td>
</tr>
</tbody>
</table>

### 3.0 Group Participation

<table>
<thead>
<tr>
<th>Group Participation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1</td>
<td>Participate in group activities and are beginning to understand and cooperate with social expectations, group rules, and roles.</td>
</tr>
<tr>
<td>3.1</td>
<td>Participate positively and cooperatively as group members.</td>
</tr>
</tbody>
</table>

### 4.0 Cooperation and Responsibility

<table>
<thead>
<tr>
<th>Cooperation and Responsibility</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1</td>
<td>Seek to cooperate with adult instructions but their capacities for self-control are limited, especially when they are frustrated or upset.</td>
</tr>
<tr>
<td>4.1</td>
<td>Have growing capacities for self-control and are motivated to cooperate in order to receive adult approval and think approvingly of themselves.</td>
</tr>
</tbody>
</table>

### Relationships

#### 1.0 Attachments to Parents

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Seek security and support from their primary family attachment figures.</td>
<td>1.1 Take greater initiative in seeking support from their primary family attachment figures.</td>
</tr>
<tr>
<td>1.2 Contribute to maintaining positive relationships with their primary family attachment figures.</td>
<td>1.2 Contribute to positive mutual cooperation with their primary family attachment figures.</td>
</tr>
<tr>
<td>1.3 After experience with out-of-home care, manage departures and separations from primary family attachment figures with the teacher’s assistance.</td>
<td>1.3 After experience with out-of-home care, comfortably depart from their primary family attachment figures. Also maintain well-being while apart from primary family attachment figures during the day.</td>
</tr>
</tbody>
</table>

#### 2.0 Close Relationships with Teachers and Caregivers

| 2.1 Seek security and support from their primary teachers and caregivers. | 2.1 Take greater initiative in seeking the support of their primary teachers and caregivers. |
| 2.2 Contribute to maintaining positive relationships with their primary teachers and caregivers. | 2.2 Contribute to positive mutual cooperation with their primary teachers and caregivers. |

#### 3.0 Friendships

| 3.1 Choose to play with one or two special peers whom they identify as friends. | 3.1 Friendships are more reciprocal, exclusive, and enduring. |

# Language and Literacy

## Listening and Speaking

### 1.0 Language Use and Conventions

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.1</strong> Use language to communicate with others in familiar social situations for a variety of basic purposes, including describing, requesting, commenting, acknowledging, greeting, and rejecting.</td>
<td><strong>1.1</strong> Use language to communicate with others in both familiar and unfamiliar social situations for a variety of basic and advanced purposes, including reasoning, predicting, problem solving, and seeking new information.</td>
</tr>
<tr>
<td><strong>1.2</strong> Speak clearly enough to be understood by familiar adults and children.</td>
<td><strong>1.2</strong> Speak clearly enough to be understood by both familiar and unfamiliar adults and children.</td>
</tr>
<tr>
<td><strong>1.3</strong> Use accepted language and style during communication with familiar adults and children.</td>
<td><strong>1.3</strong> Use accepted language and style during communication with both familiar and unfamiliar adults and children.</td>
</tr>
<tr>
<td><strong>1.4</strong> Use language to construct short narratives that are real or fictional.</td>
<td><strong>1.4</strong> Use language to construct extended narratives that are real or fictional.</td>
</tr>
</tbody>
</table>

### 2.0 Vocabulary

| **2.1** Understand and use accepted words for objects, actions, and attributes encountered frequently in both real and symbolic contexts. | **2.1** Understand and use an increasing variety and specificity of accepted words for objects, actions, and attributes encountered in both real and symbolic contexts. |
| **2.2** Understand and use accepted words for categories of objects encountered and used frequently in everyday life. | **2.2** Understand and use accepted words for categories of objects encountered in everyday life. |
| **2.3** Understand and use simple words that describe the relations between objects. | **2.3** Understand and use both simple and complex words that describe the relations between objects. |

### 3.0 Grammar

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Understand and use increasingly complex and longer sentences, including sentences that combine two phrases or two to three concepts to communicate ideas.</td>
<td>3.1 Understand and use increasingly complex and longer sentences, including sentences that combine two to three phrases or three to four concepts to communicate ideas.</td>
</tr>
<tr>
<td>3.2 Understand and typically use age-appropriate grammar, including accepted word forms, such as subject-verb agreement, progressive tense, regular past tense, regular plurals, pronouns, and possessives.</td>
<td>3.2 Understand and typically use age-appropriate grammar, including accepted word forms, such as subject-verb agreement, progressive tense, regular and irregular past tense, regular and irregular plurals, pronouns, and possessives.</td>
</tr>
</tbody>
</table>

### Reading

#### 1.0 Concepts about Print

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Begin to display appropriate book-handling behaviors and begin to recognize print conventions.</td>
<td>1.1 Display appropriate book-handling behaviors and knowledge of print conventions.</td>
</tr>
<tr>
<td>1.2 Recognize print as something that can be read.</td>
<td>1.2 Understand that print is something that is read and has specific meaning.</td>
</tr>
</tbody>
</table>

#### 2.0 Phonological Awareness

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Oral blend and delete words and syllables without the support of pictures or objects.</td>
<td></td>
</tr>
<tr>
<td>2.2 Oral blend the onsets, rimes, and phonemes of words and orally delete the onsets of words, with the support of pictures or objects.</td>
<td></td>
</tr>
</tbody>
</table>

### 3.0 Alphabetics and Word/Print Recognition

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Recognize the first letter of own name.</td>
<td>3.1 Recognize own name or other common words in print.</td>
</tr>
<tr>
<td>3.2 Match some letter names to their printed form.</td>
<td>3.2 Match more than half of uppercase letter names and more than half of lowercase letter names to their printed form.</td>
</tr>
<tr>
<td>3.3 Begin to recognize that letters have sounds.</td>
<td></td>
</tr>
</tbody>
</table>

### 4.0 Comprehension and Analysis of Age-Appropriate Text

| 4.1 Demonstrate knowledge of main characters or events in a familiar story (e.g., who, what, where) through answering questions (e.g., recall and simple inferencing), retelling, reenacting, or creating artwork. | 4.1 Demonstrate knowledge of details in a familiar story, including characters, events, and ordering of events through answering questions (particularly summarizing, predicting, and inferencing), retelling, reenacting, or creating artwork. |
| 4.2 Demonstrate knowledge from informational text through labeling, describing, playing, or creating artwork. | 4.2 Use information from informational text in a variety of ways, including describing, relating, categorizing, or comparing and contrasting. |

### 5.0 Literacy Interest and Response

| 5.1 Demonstrate enjoyment of literacy and literacy-related activities. | 5.1 Demonstrate, with increasing independence, enjoyment of literacy and literacy-related activities. |
| 5.2 Engage in routines associated with literacy activities. | 5.2 Engage in more complex routines associated with literacy activities. |

### Writing

#### 1.0 Writing Strategies

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Experiment with grasp and body position using a variety of drawing and writing tools.</td>
<td>1.1 Adjust grasp and body position for increased control in drawing and writing.</td>
</tr>
<tr>
<td>1.2 Write using scribbles that are different from pictures.</td>
<td>1.2 Write letters or letter-like shapes to represent words or ideas.</td>
</tr>
<tr>
<td>1.3 Write marks to represent own name.</td>
<td>1.3 Write first name nearly correctly.</td>
</tr>
</tbody>
</table>

# English-Language Development

## Listening

1.0 Children listen with understanding.

### Focus: Beginning words

<table>
<thead>
<tr>
<th></th>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>Attend to English oral language in both real and pretend activity, relying on intonation, facial expressions, or the gestures of the speaker.</td>
<td>1.1 Demonstrate understanding of words in English for objects and actions as well as phrases encountered frequently in both real and pretend activity.</td>
<td>1.1 Begin to demonstrate an understanding of a larger set of words in English (for objects and actions, personal pronouns, and possessives) in both real and pretend activity.</td>
</tr>
</tbody>
</table>

### Focus: Requests and directions

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2</td>
<td>Begin to follow simple directions in English, especially when there are contextual cues.</td>
<td>1.2 Respond appropriately to requests involving one step when personally directed by others, which may occur with or without contextual cues.</td>
<td>1.2 Follow directions that involve a one- or two-step sequence, relying less on contextual cues.</td>
</tr>
</tbody>
</table>

### Focus: Basic and advanced concepts

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.3</td>
<td>Demonstrate an understanding of words related to basic and advanced concepts in the home language that are appropriate for the age (as reported by parents, teachers, assistants, or others, with the assistance of an interpreter if necessary).</td>
<td>1.3 Begin to demonstrate an understanding of words in English related to basic concepts.</td>
<td>1.3 Demonstrate an understanding of words in English related to more advanced concepts.</td>
</tr>
</tbody>
</table>

Copyright © 2008 California Department of Education, Early Education and Support Division (formerly CDD)
### Speaking

#### Focus: Communication of needs

<table>
<thead>
<tr>
<th></th>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>Use nonverbal communication, such as gestures or behaviors, to seek attention, request objects, or initiate a response from others.</td>
<td>1.1 Combine nonverbal and some verbal communication to be understood by others (may code-switch—that is, use the home language and English—and use telegraphic and/or formulaic speech).</td>
<td>1.1 Show increasing reliance on verbal communication in English to be understood by others.</td>
</tr>
</tbody>
</table>

#### Focus: Vocabulary production

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2</td>
<td>Use vocabulary in the home language that is age-appropriate (as reported by parents, teachers, assistants, or others and with the assistance of an interpreter if necessary).</td>
<td>1.2 Begin to use English vocabulary, mainly consisting of concrete nouns and with some verbs and pronouns (telegraphic speech).</td>
<td>1.2 Use new English vocabulary to share knowledge of concepts.</td>
</tr>
</tbody>
</table>

#### Focus: Conversation

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.3</td>
<td>Converse in the home language (as reported by parents, teachers, assistants, or others, with the assistance of an interpreter if necessary).</td>
<td>1.3 Begin to converse with others, using English vocabulary but may code-switch (i.e., use the home language and English).</td>
<td>1.3 Sustain a conversation in English about a variety of topics.</td>
</tr>
</tbody>
</table>
### 1.0 Children use nonverbal and verbal strategies to communicate with others.

**Focus: Utterance length and complexity**

<table>
<thead>
<tr>
<th></th>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.4</td>
<td>Use a range of utterance lengths in the home language that is age-appropriate (as reported by parents, teachers, assistants, or others, with the assistance of an interpreter if necessary)</td>
<td>1.4 Use two- and three-word utterances in English to communicate.</td>
<td>1.4 Increase utterance length in English by adding appropriate possessive pronouns (e.g., his, her); conjunctions (e.g., and, or); or other elements (e.g., adjectives, adverbs).</td>
</tr>
</tbody>
</table>

**Focus: Grammar**

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.5</td>
<td>Use age-appropriate grammar in the home language (e.g., plurals; simple past tense; use of subject, verb, object), sometimes with errors (as reported by parents, teachers, assistants, or others, with the assistance of an interpreter if necessary).</td>
<td>1.5 Begin to use some English grammatical markers (e.g., -ing or plural -s) and, at times, apply the rules of grammar of the home language to English.</td>
<td>1.5 Expand the use of different forms of grammar in English (e.g., plurals; simple past tense; use of subject, verb and object), sometimes with errors.</td>
</tr>
</tbody>
</table>

**Focus: Inquiry**

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.6</td>
<td>Ask a variety of types of questions (e.g., &quot;what,&quot; &quot;why,&quot; &quot;how,&quot; &quot;when,&quot; and &quot;where&quot;) in the home language (as reported by parents, teachers, assistants, or others, with the assistance of an interpreter if necessary).</td>
<td>1.6 Begin to use &quot;what&quot; and &quot;why&quot; questions in English, sometimes with errors.</td>
<td>1.6 Begin to use &quot;what,&quot; &quot;why,&quot; &quot;how,&quot; &quot;when,&quot; and &quot;where&quot; questions in more complete forms in English, sometimes with errors.</td>
</tr>
</tbody>
</table>
2.0 Children begin to understand and use social conventions in English.

**Focus: Social conventions**

<table>
<thead>
<tr>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Use social conventions of the home language (as reported by teachers, parents, assistants, or others, with the assistance of an interpreter if necessary).</td>
<td>2.1 Demonstrate a beginning understanding of English social conventions.</td>
<td>2.1 Appropriately use words and tone of voice associated with social conventions in English.</td>
</tr>
</tbody>
</table>

3.0 Children use language to create oral narratives about their personal experiences.

**Focus: Narrative development**

| 3.1 Create a narrative in the home language (as reported by parents, teachers, assistants, or others, with the assistance of an interpreter if necessary). | 3.1 Begin to use English to talk about personal experiences; may complete a narrative in the home language while using some English (i.e., code-switching). | 3.1 Produce simple narratives in English that are real or fictional. |
### Reading

#### 1.0 Children demonstrate an appreciation and enjoyment of reading and literature.

**Focus: Participate in read-aloud activity**

<table>
<thead>
<tr>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Attend to an adult reading a short storybook written in the home language or a storybook written in English if the story has been read in the home language.</td>
<td>1.1 Begin to participate in reading activities, using books written in English when the language is predictable.</td>
<td>1.1 Participate in reading activities, using a variety of genres that are written in English (e.g., poetry, fairy tales, concept books, and informational books).</td>
</tr>
</tbody>
</table>

**Focus: Interest in books and reading**

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 “Read” familiar books written in the home language or in English when encouraged by others and, in the home language, talk about the books.</td>
<td>1.2 Choose to “read” familiar books written in the home language or in English with increasing independence and, in the home language or in English, talk about the books.</td>
<td>1.2 Choose to “read” familiar books written in English with increasing independence and talk about the books in English.</td>
</tr>
</tbody>
</table>

Copyright © 2008 California Department of Education, Early Education and Support Division (formerly CDD)
### 2.0 Children show an increasing understanding of book reading.

**Focus: Personal connections to the story**

<table>
<thead>
<tr>
<th></th>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1</td>
<td>Begin to identify and relate to a story from their own life experiences in the home language (as reported by parents, teachers, assistants, or others, with the assistance of an interpreter if necessary).</td>
<td>2.1 Describe their own experiences related to the topic of the story, using telegraphic and/or formulaic speech in English.</td>
<td>2.1 Begin to engage in extended conversations in English about stories.</td>
</tr>
</tbody>
</table>

**Focus: Story structure**

<table>
<thead>
<tr>
<th></th>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.2</td>
<td>Retell a story in the home language when read or told a story in the home language (as reported by parents, teachers, assistants, or others, with the assistance of an interpreter if necessary).</td>
<td>2.2 Retell a story using the home language and some English when read or told a story in English.</td>
<td>2.2 Retell in English the majority of a story read or told in English.</td>
</tr>
</tbody>
</table>

### 3.0 Children demonstrate an understanding of print conventions.

**Focus: Book handling**

<table>
<thead>
<tr>
<th></th>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1</td>
<td>Begin to understand that books are read in a consistent manner (e.g., in English, pages are turned from right to left and the print is read from top to bottom, left to right; this may vary in other languages).</td>
<td>3.1 Continue to develop an understanding of how to read a book, sometimes applying knowledge of print conventions from the home language.</td>
<td>3.1 Demonstrate an understanding that print in English is organized from left to right, top to bottom, and that pages are turned from right to left when a book is read.</td>
</tr>
</tbody>
</table>
### 4.0 Children demonstrate awareness that print carries meaning.

**Focus: Environmental print**

<table>
<thead>
<tr>
<th></th>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1</td>
<td>Begin to recognize that symbols in the environment (classroom, community, or home) carry a consistent meaning in the home language or in English.</td>
<td>4.1 Recognize in the environment (classroom, community, or home) some familiar symbols, words, and print labels in the home language or in English.</td>
<td>4.1 Recognize in the environment (classroom, community, or home) an increasing number of familiar symbols, words, and print labels in English.</td>
</tr>
</tbody>
</table>

### 5.0 Children demonstrate progress in their knowledge of the alphabet in English.

**Focus: Letter awareness**

<table>
<thead>
<tr>
<th></th>
<th>Stage 1: Interact with material representing the letters of the English alphabet.</th>
<th>Stage 2: Begin to talk about the letters of the English alphabet while playing and interacting with them; may code-switch (use the home language and English).</th>
<th>Stage 3: Begin to demonstrate understanding that the letters of the English alphabet are symbols used to make words.</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.1</td>
<td>Interact with material representing the letters of the English alphabet.</td>
<td>5.1 Begin to talk about the letters of the English alphabet while playing and interacting with them; may code-switch (use the home language and English).</td>
<td>5.1 Begin to demonstrate understanding that the letters of the English alphabet are symbols used to make words.</td>
</tr>
</tbody>
</table>

**Focus: Letter recognition**

<table>
<thead>
<tr>
<th></th>
<th>Stage 1: Identify some letters of the alphabet in English.</th>
<th>Stage 2: Identify ten or more letters of the alphabet in English.</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.2</td>
<td>Begin to recognize the first letter in their own name or the character for their own name in the home language or English.</td>
<td>5.2 Identify ten or more letters of the alphabet in English.</td>
</tr>
</tbody>
</table>

Copyright © 2008 California Department of Education, Early Education and Support Division (formerly CDD)
## 6.0 Children demonstrate phonological awareness.

### Focus: Rhyming

<table>
<thead>
<tr>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.1 Listen attentively and begin to participate in simple songs, poems, and finger plays that emphasize rhyme in the home language or in English.</td>
<td>6.1 Begin to repeat or recite simple songs, poems, and finger plays that emphasize rhyme in the home language or in English.</td>
<td>6.1 Repeat, recite, produce, or initiate simple songs, poems, and finger plays that emphasize rhyme in English.</td>
</tr>
</tbody>
</table>

### Focus: Onset (initial sound)

<table>
<thead>
<tr>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.2 Listen attentively and begin to participate in simple songs, poems, and finger plays in the home language or in English.</td>
<td>6.2 Begin to recognize words that have a similar onset (initial sound) in the home language or in English, with support.</td>
<td>6.2 Recognize and produce words that have a similar onset (initial sound) in English.</td>
</tr>
</tbody>
</table>

### Focus: Sound differences in the home language and English

<table>
<thead>
<tr>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.3 Attend to and manipulate different sounds or tones in words in the home language (as reported by parents, teachers, assistants, or others, with the assistance of an interpreter if necessary.)</td>
<td>6.3 Begin to use words in English with phonemes (individual units of meaningful sound in a word or syllable) that are different from the home language.</td>
<td>6.3 Begin to orally manipulate sounds (onsets, rimes, and phonemes) in words in English, with support.</td>
</tr>
</tbody>
</table>
## Writing

### 1.0 Children use writing to communicate their ideas.

**Focus: Writing as communication**

<table>
<thead>
<tr>
<th></th>
<th>Beginning</th>
<th>Middle</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>Begin to understand that writing can be used to communicate.</td>
<td>Begin to understand that what is said in the home language or in English can be written down and read by others.</td>
<td>Develop an increasing understanding that what is said in English can be written down and read by others.</td>
</tr>
</tbody>
</table>

**Focus: Writing to represent words or ideas**

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2</td>
<td>Begin to demonstrate an awareness that written language can be in the home language or in English.</td>
<td>Begin to use marks or symbols to represent spoken language in the home language or in English.</td>
<td>Continue to develop writing by using letters or letter-like marks to represent their ideas in English.</td>
</tr>
</tbody>
</table>

**Focus: Writing their name**

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.3</td>
<td>Write marks to represent their own name in a way that may resemble how it is written in the home language.</td>
<td>Attempt to copy their own name in English or in the writing system of their home language.</td>
<td>Write their first name on their own in English nearly correctly, using letters of the English alphabet to accurately represent pronunciation in their home language.</td>
</tr>
</tbody>
</table>
## Mathematics

### Number Sense

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.0</strong> Children begin to understand numbers and quantities in their everyday environment.</td>
<td><strong>1.0</strong> Children expand their understanding of numbers and quantities in their everyday environment.</td>
</tr>
<tr>
<td>1.1 Recite numbers in order to ten with increasing accuracy.</td>
<td>1.1 Recite numbers in order to twenty with increasing accuracy.</td>
</tr>
<tr>
<td>1.2 Begin to recognize and name a few written numerals.</td>
<td>1.2 Recognize and know the name of some written numerals.</td>
</tr>
<tr>
<td>1.3 Identify, without counting, the number of objects in a collection of up to three objects (i.e., subitize).</td>
<td>1.3 Identify, without counting, the number of objects in a collection of up to four objects (i.e., subitize).</td>
</tr>
<tr>
<td>1.4 Count up to five objects, using one-to-one correspondence (one object for each number word) with increasing accuracy.</td>
<td>1.4 Count up to ten objects, using one-to-one correspondence (one object for each number word) with increasing accuracy.</td>
</tr>
<tr>
<td>1.5 Use the number name of the last object counted to answer the question, “How many . . . ?”</td>
<td>1.5 Understand, when counting, that the number name of the last object counted represents the total number of objects in the group (i.e., cardinality).</td>
</tr>
</tbody>
</table>

### 2.0 Children begin to understand number relationships and operations in their everyday environment.

<table>
<thead>
<tr>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>2.0</strong> Children expand their understanding of number relationships and operations in their everyday environment.</td>
</tr>
<tr>
<td>2.1 Compare visually (with or without counting) two groups of objects that are obviously equal or nonequal and communicate, “more” or “same.”</td>
</tr>
<tr>
<td>2.2 Understand that adding to (or taking away) one or more objects from a group will increase (or decrease) the number of objects in the group.</td>
</tr>
</tbody>
</table>

### Measurement

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.0</strong> Children begin to compare and order objects.</td>
<td><strong>1.0</strong> Children expand their understanding of comparing, ordering, and measuring objects.</td>
</tr>
<tr>
<td>1.1 Demonstrate awareness that objects can be compared by length, weight, or capacity, by noting gross differences, using words such as bigger, longer, heavier, or taller, or by placing objects side by side to compare length.</td>
<td>1.1 Compare two objects by length, weight, or capacity directly (e.g., putting objects side by side) or indirectly (e.g., using a third object).</td>
</tr>
<tr>
<td><strong>1.2</strong> Order three objects by size.</td>
<td><strong>1.2</strong> Order four or more objects by size.</td>
</tr>
<tr>
<td><strong>1.3</strong> Measure length using multiple duplicates of the same-size concrete units laid end to end.</td>
<td></td>
</tr>
</tbody>
</table>

### Geometry

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.0</strong> Children begin to identify and use common shapes in their everyday environment.</td>
<td><strong>1.0</strong> Children identify and use a variety of shapes in their everyday environment.</td>
</tr>
<tr>
<td>1.1 Identify simple two-dimensional shapes, such as a circle and square.</td>
<td>1.1 Identify, describe, and construct a variety of different shapes, including variations of a circle, triangle, rectangle, square, and other shapes.</td>
</tr>
<tr>
<td><strong>1.2</strong> Use individual shapes to represent different elements of a picture or design.</td>
<td><strong>1.2</strong> Combine different shapes to create a picture or design.</td>
</tr>
<tr>
<td><strong>2.0</strong> Children begin to understand positions in space.</td>
<td><strong>2.0</strong> Children expand their understanding of positions in space.</td>
</tr>
<tr>
<td>2.1 Identify positions of objects and people in space, such as in/on/under, up/down, and inside/outside.</td>
<td>2.1 Identify positions of objects and people in space, including in/on/under, up/down, inside/outside, beside/between, and in front/behind.</td>
</tr>
</tbody>
</table>
### Mathematical Reasoning

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.0</strong> Children use mathematical thinking to solve problems that</td>
<td><strong>1.0</strong> Children expand the use of mathematical thinking to solve</td>
</tr>
<tr>
<td>arise in their everyday environment.</td>
<td>problems that arise in their everyday environment.</td>
</tr>
<tr>
<td><strong>1.1</strong> Begin to apply simple mathematical strategies to solve</td>
<td><strong>1.1</strong> Identify and apply a variety of mathematical strategies to</td>
</tr>

## Visual and Performing Arts

### Visual Art

#### 1.0 Notice, Respond, and Engage

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Notice and communicate about objects or forms that appear in art.</td>
<td>1.1 Communicate about elements appearing in art (such as line, texture, or perspective), and describe how objects are positioned in the artwork.</td>
</tr>
<tr>
<td>1.2 Create marks with crayons, paints, and chalk and then identify them; mold and build with dough and clay and then identify them.</td>
<td>1.2 Begin to plan art and show increasing care and persistence in completing it.</td>
</tr>
<tr>
<td>1.3 Enjoy and engage with displays of visual art, inside or outside the classroom. Begin to express preferences for some art activities or materials.</td>
<td>1.3 Enjoy and engage with displays of visual art. May expand critical assessment of visual art to include preferences for types of artwork or art activities.</td>
</tr>
<tr>
<td>1.4 Choose own art for display in the classroom or for inclusion in a portfolio or book and briefly explain choice.</td>
<td>1.4 Choose own art for display in the classroom or for inclusion in a portfolio or book and explain her or his ideas in some detail.</td>
</tr>
</tbody>
</table>

#### 2.0 Develop Skills in Visual Art

| 2.1 Make straight and curved marks and lines; begin to draw rough circle shapes. | 2.1 Draw single circle and add lines to create representations of people and things. |
| 2.2 Begin to create paintings or drawings that suggest people, animals, and objects. | 2.2 Begin to create representative paintings or drawings that approximate or depict people, animals, and objects. |

Copyright © 2010 California Department of Education, Early Education and Support Division (formerly CDD)
### 2.0 Develop Skills in Visual Art (Continued)

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.3 Make somewhat regular-shaped balls and coils out of dough or clay.</td>
<td>2.3 Make more representational forms out of dough or clay, using tools (for example, a rolling pin or a garlic press).</td>
</tr>
<tr>
<td>2.4 Begin to use paper and other materials to assemble simple collages.</td>
<td>2.4 Use paper and other materials to make two- and three-dimensional assembled works.</td>
</tr>
<tr>
<td>2.5 Begin to recognize and name materials and tools used for visual arts.</td>
<td>2.5 Recognize and name materials and tools used for visual arts.</td>
</tr>
<tr>
<td>2.6 Demonstrate some motor control when working with visual arts tools.</td>
<td>2.6 Demonstrate increasing coordination and motor control when working with visual arts tools.</td>
</tr>
</tbody>
</table>

### 3.0 Create, Invent, and Express Through Visual Art

| 3.1 Create art and sometimes name the work. | 3.1 Intentionally create content in a work of art. |
| 3.2 Begin to draw figures or objects. | 3.2 Draw more detailed figures or objects with more control of line and shape. |
| 3.3 Begin to use intensity of marks and color to express a feeling or mood. | 3.3 Use intensity of marks and color more frequently to express a feeling or mood. |

### Music

#### 1.0 Notice, Respond, and Engage

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Sustain attention and begin to reflect verbally about music; demonstrate familiarity with words that describe music.</td>
<td>1.1 Verbally reflect on music and describe music by using an expanded vocabulary.</td>
</tr>
<tr>
<td>1.2 Recognize simple repeating melody and rhythm patterns.</td>
<td>1.2 Demonstrate more complex repeating melody and rhythm patterns.</td>
</tr>
<tr>
<td>1.3 Identify the sources of a limited variety of musical sounds.</td>
<td>1.3 Identify the sources of a wider variety of music and music-like sounds.</td>
</tr>
<tr>
<td>1.4 Use body movement freely to respond loosely to beat—loud versus quiet (dynamics)—and tempo.</td>
<td>1.4 Use body movement freely and more accurately to respond to beat, dynamics, and tempo of music.</td>
</tr>
</tbody>
</table>

#### 2.0 Develops Skills in Music

<table>
<thead>
<tr>
<th>2.1 Begin to discriminate between different voices and certain instrumental and environmental sounds. Follow words in a song.</th>
<th>2.1 Become more able to discriminate between different voices and various instrumental and environmental sounds. Follow words in a song.</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.2 Explore vocally; sing repetitive patterns and parts of songs alone and with others.</td>
<td>2.2 Extend vocal exploration; sing repetitive patterns and entire songs alone and with others in wider ranges of pitch.</td>
</tr>
</tbody>
</table>

#### 3.0 Create, Invent, and Express Through Music

<table>
<thead>
<tr>
<th>3.1 Explore vocal and instrumental skills and use instruments to produce simple rhythms and tones.</th>
<th>3.1 Continue to apply vocal and instrumental skills and use instruments to produce more complex rhythms, tones, melodies, and songs.</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2 Move or use body to demonstrate beat and tempo, often spontaneously.</td>
<td>3.2 Move or use body to demonstrate beat, tempo, and style of music, often intentionally.</td>
</tr>
<tr>
<td>3.3 Improvise vocally and instrumentally.</td>
<td>3.3 Explore, improvise, and create brief melodies with voice or instrument.</td>
</tr>
</tbody>
</table>

### Drama

#### 1.0 Notice, Respond, and Engage

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Demonstrate an understanding of simple drama vocabulary.</td>
<td>1.1 Demonstrate a broader understanding of drama vocabulary.</td>
</tr>
<tr>
<td>1.2 Identify preferences and interests related to participating in drama.</td>
<td>1.2 Explain preferences and interests related to participating in drama.</td>
</tr>
<tr>
<td>1.3 Demonstrate knowledge of simple plot of a participatory drama.</td>
<td>1.3 Demonstrate knowledge of extended plot and conflict of a participatory drama.</td>
</tr>
</tbody>
</table>

#### 2.0 Develop Skills to Create, Invent, and Express Through Drama

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Demonstrate basic role-play skills with imagination and creativity.</td>
<td>2.1 Demonstrate extended role-play skills with increased imagination and creativity.</td>
</tr>
<tr>
<td>2.2 Add props and costumes to enhance dramatization of familiar stories and fantasy play with peers.</td>
<td>2.2 Create and use an increasing variety of props, costumes and scenery to enhance dramatization of familiar stories and fantasy play with peers.</td>
</tr>
</tbody>
</table>

### Dance

#### 1.0 Notice, Respond, and Engage

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Engage in dance movements.</td>
<td>1.1 Further engage and participate in dance movements.</td>
</tr>
<tr>
<td>1.2 Begin to understand and use vocabulary related to dance.</td>
<td>1.2 Connect dance terminology with demonstrated steps.</td>
</tr>
<tr>
<td>1.3 Respond to instruction of one skill at a time during movement, such as a jump or fall.</td>
<td>1.3 Respond to instruction of more than one skill at a time in movement, such as turning, leaping, and turning again. Often initiate a sequence of skills.</td>
</tr>
<tr>
<td>1.4 Explore and use different steps and movements to create or form a dance.</td>
<td>1.4 Use understanding of different steps and movements to create or form a dance.</td>
</tr>
</tbody>
</table>
### 2.0 Develop Skills in Dance

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Begin to be aware of own body in space.</td>
<td>2.1 Continue to develop awareness of body in space.</td>
</tr>
<tr>
<td>2.2 Begin to be aware of other people in dance or when moving in space.</td>
<td>2.2 Show advanced awareness and coordination of movement with other people in dance or when moving in space.</td>
</tr>
<tr>
<td>2.3 Begin to respond to tempo and timing through movement.</td>
<td>2.3 Demonstrate some advanced skills in responding to tempo and timing through movement.</td>
</tr>
</tbody>
</table>

### 3.0 Create, Invent, and Express Through Dance

<table>
<thead>
<tr>
<th>3.1 Begin to act out and dramatize through music and movement patterns.</th>
<th>3.1 Extend understanding and skills for acting out and dramatizing through music and movement patterns.</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2 Invent dance movements.</td>
<td>3.2 Invent and recreate dance movements.</td>
</tr>
<tr>
<td>3.3 Improvise simple dances that have a beginning and an end.</td>
<td>3.3 Improvise more complex dances that have a beginning, middle, and an end.</td>
</tr>
<tr>
<td>3.4 Communicate feelings spontaneously through dance and begin to express simple feelings intentionally through dance when prompted by adults.</td>
<td>3.4 Communicate and express feelings intentionally through dance.</td>
</tr>
</tbody>
</table>
## Physical Development

### Fundamental Movement Skills

#### 1.0 Balance

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Maintain balance while holding still; sometimes may need assistance.</td>
<td>1.1 Show increasing balance and control when holding still.</td>
</tr>
<tr>
<td>1.2 Maintain balance while in motion when moving from one position to another or when changing directions, though balance may not be completely stable.</td>
<td>1.2 Show increasing balance control while moving in different directions and when transitioning from one movement or position to another.</td>
</tr>
</tbody>
</table>

#### 2.0 Locomotor Skills

| 2.1 Walk with balance, not always stable, oppositional arm movements still developing, and relatively wide base of support (space between feet). | 2.1 Walk with balance, oppositional arm movements, and relatively narrow base of support (space between feet). |
| 2.2 Run with short stride length and feet off the ground for a short period of time. May show inconsistent opposition of arms and legs. | 2.2 Run with a longer stride length and each foot off the ground for a greater length of time. Opposition of arms and legs is more consistent. |
| 2.3 Jump for height (up or down) and for distance with beginning competence. | 2.3 Jump for height (up or down) and for distance with increasing competence. Uses arm swing to aid forward jump. |
| 2.4 Begin to demonstrate a variety of locomotor skills, such as galloping, sliding, hopping, and leaping. | 2.4 Demonstrate increasing ability and body coordination in a variety of locomotor skills, such as galloping, sliding, hopping, and leaping. |

Copyright © 2010 California Department of Education, Early Education and Support Division (formerly CDD)
### 3.0 Manipulative Skills

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Begin to show gross motor manipulative skills by using arms, hands, and feet, such as rolling a ball underhand, tossing underhand, bouncing, catching, striking, throwing overhand, and kicking.</td>
<td>3.1 Show gross motor manipulative skills by using arms, hands, and feet with increased coordination, such as rolling a ball underhand, tossing underhand, bouncing, catching, striking, throwing overhand, and kicking.</td>
</tr>
<tr>
<td>3.2 Begin to show fine motor manipulative skills using hands and arms such as in-hand manipulation, writing, cutting, and dressing.</td>
<td>3.2 Show increasing fine motor manipulative skills using hands and arms such as in-hand manipulation, writing, cutting, and dressing.</td>
</tr>
</tbody>
</table>

### Perceptual–Motor Skills and Movement Concepts

#### 1.0 Body Awareness

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Demonstrate knowledge of the names of body parts.</td>
<td>1.1 Demonstrate knowledge of an increasing number of body parts.</td>
</tr>
</tbody>
</table>

#### 2.0 Spatial Awareness

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Use own body as reference point when locating or relating to other people or objects in space.</td>
<td>2.1 Use own body, general space, and other people’s space when locating or relating to other people or objects in space.</td>
</tr>
</tbody>
</table>

#### 3.0 Directional Awareness

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Distinguish movements that are up and down and to the side of the body (for example, understands “use that side, now the other side”).</td>
<td>3.1 Begin to understand and distinguish between the sides of the body.</td>
</tr>
<tr>
<td>3.2 Move forward and backward or up and down easily.</td>
<td>3.2 Can change directions quickly and accurately.</td>
</tr>
</tbody>
</table>
### 3.0 Directional Awareness (Continued)

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.3 Can place an object on top of or under something with some accuracy.</td>
<td>3.3 Can place an object or own body in front of, to the side, or behind something else with greater accuracy.</td>
</tr>
<tr>
<td>3.4 Use any two body parts together.</td>
<td>3.4 Demonstrate more precision and efficiency during two-handed fine motor activities.</td>
</tr>
</tbody>
</table>

### Active Physical Play

#### 1.0 Active Participation

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Initiate or engage in simple physical activities for a short to moderate period of time.</td>
<td>1.1 Initiate more complex physical activities for a sustained period of time.</td>
</tr>
</tbody>
</table>

#### 2.0 Cardiovascular Endurance

| 2.1 Engage in frequent bursts of active play that involves the heart, the lungs, and the vascular system. | 2.1 Engage in sustained active play of increasing intensity that involves the heart, the lungs, and the vascular system. |

#### 3.0 Muscular Strength, Muscular Endurance, and Flexibility

| 3.1 Engage in active play activities that enhance leg and arm strength, muscular endurance, and flexibility. | 3.1 Engage in increasing amounts of active play activities that enhance leg and arm strength, muscular endurance, and flexibility. |
# Health

## Health Habits

### 1.0 Basic Hygiene

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>At around 48 months</td>
<td>1.1 Demonstrate knowledge of some steps in the handwashing routine.</td>
</tr>
<tr>
<td>At around 60 months</td>
<td>1.1 Demonstrate knowledge of more steps in the handwashing routine.</td>
</tr>
<tr>
<td></td>
<td>1.2 Practice health habits that prevent infectious diseases and infestations (such as lice) when appropriate, with adult support, instruction, and modeling.</td>
</tr>
<tr>
<td></td>
<td>1.2 Begin to independently practice health habits that prevent infectious disease and infestations (such as lice) when appropriate, with less adult support, instruction, and modeling.</td>
</tr>
</tbody>
</table>

### 2.0 Oral Health

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2.1 Demonstrate knowledge of some steps of the routine for brushing teeth, with adult supervision and instruction.</td>
</tr>
<tr>
<td></td>
<td>2.1 Demonstrate knowledge of more steps of the routine for brushing and when toothbrushing should be done, with less adult supervision.</td>
</tr>
</tbody>
</table>

### 3.0 Knowledge of Wellness

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>3.1 Identify a few internal body parts (most commonly the bones, brain, and heart) but may not understand their basic function.</td>
</tr>
<tr>
<td></td>
<td>3.1 Identify several different internal body parts and demonstrate a basic, limited knowledge of some functions.</td>
</tr>
<tr>
<td></td>
<td>3.2 Begin to understand that health-care providers try to keep people well and help them when they are not well.</td>
</tr>
<tr>
<td></td>
<td>3.2 Demonstrate greater understanding that health-care providers try to keep people well and help them when they are not well.</td>
</tr>
<tr>
<td></td>
<td>3.3 Communicate to an adult about not feeling well, feeling uncomfortable, or about a special health need, with varying specificity and reliability.</td>
</tr>
<tr>
<td></td>
<td>3.3 Communicate to an adult about not feeling well, feeling uncomfortable, or about a special health need, with more specificity and reliability.</td>
</tr>
</tbody>
</table>

### 4.0 Sun Safety

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>4.1 Begin to practice sun-safe actions, with adult support and guidance.</td>
</tr>
<tr>
<td></td>
<td>4.1 Practice sun-safe actions with decreasing adult support and guidance.</td>
</tr>
</tbody>
</table>
### Safety

<table>
<thead>
<tr>
<th><strong>1.0 Injury Prevention</strong></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>At around 48 months of age</strong></td>
<td><strong>At around 60 months of age</strong></td>
</tr>
<tr>
<td>1.1 Follow safety rules with adult support and prompting.</td>
<td>1.1 Follow safety rules more independently though may still need adult support and prompting.</td>
</tr>
<tr>
<td>1.2 Begin to show ability to follow emergency routines after instruction and practice (for example, a fire drill or earthquake drill).</td>
<td>1.2 Demonstrate increased ability to follow emergency routines after instruction and practice.</td>
</tr>
<tr>
<td>1.3 Show beginning ability to follow transportation and pedestrian safety rules with adult instruction and supervision.</td>
<td>1.3 Show increased ability to follow transportation and pedestrian safety rules with adult support and supervision.</td>
</tr>
</tbody>
</table>

### Nutrition

<table>
<thead>
<tr>
<th><strong>1.0 Nutrition Knowledge</strong></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>At around 48 months of age</strong></td>
<td><strong>At around 60 months of age</strong></td>
</tr>
<tr>
<td>1.1 Identify different kinds of foods.</td>
<td>1.1 Identify a larger variety of foods and may know some of the related food groups.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>2.0 Nutrition Choices</strong></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Demonstrate a beginning understanding that eating a variety of food helps the body grow and be healthy, and choose from a variety of foods at mealtimes.</td>
<td>2.1 Demonstrate greater understanding that eating a variety of food helps the body grow and be healthy, and choose from a greater variety of foods at mealtimes.</td>
</tr>
<tr>
<td>2.2 Indicate food preferences that reflect familial and cultural practices.</td>
<td>2.2 Indicate food preferences based on familial and cultural practices and on some knowledge of healthy choices.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>3.0 Self-Regulation of Eating</strong></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Indicate awareness of own hunger and fullness.</td>
<td>3.1 Indicate greater awareness of own hunger and fullness.</td>
</tr>
</tbody>
</table>

## History–Social Science

### Self and Society

#### 1.0 Culture and Diversity

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Exhibit developing cultural, ethnic, and racial identity and understand relevant language and cultural practices. Display curiosity about diversity in human characteristics and practices, but prefer those of their own group.</td>
<td>1.1 Manifest stronger cultural, ethnic, and racial identity and greater familiarity with relevant language, traditions, and other practices. Show more interest in human diversity, but strongly favor characteristics of their own group.</td>
</tr>
</tbody>
</table>

#### 2.0 Relationships

| 2.1 Interact comfortably with many peers and adults; actively contribute to creating and maintaining relationships with a few significant adults and peers. | 2.1 Understand the mutual responsibilities of relationships; take initiative in developing relationships that are mutual, cooperative, and exclusive. |

#### 3.0 Social Roles and Occupations

| 3.1 Play familiar adult social roles and occupations (such as parent, teacher, and doctor) consistent with their developing knowledge of these roles. | 3.1 Exhibit more sophisticated understanding of a broader variety of adult roles and occupations, but uncertain how work relates to income. |

---

# Becoming a Preschool Community Member (Civics)

## 1.0 Skills for Democratic Participation

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Identify as members of a group, participate willingly in group activities, and begin to understand and accept responsibility as group members, although assistance is required in coordinating personal interests with those of others.</td>
<td>1.1 Become involved as responsible participants in group activities, with growing understanding of the importance of considering others’ opinions, group decision making, and respect for majority rules and the views of group members who disagree with the majority.</td>
</tr>
</tbody>
</table>

## 2.0 Responsible Conduct

| 2.1 Strive to cooperate with group expectations to maintain adult approval and get along with others. Self-control is inconsistent, however, especially when children are frustrated or upset. | 2.1 Exhibit responsible conduct more reliably as children develop self-esteem (and adult approval) from being responsible group members. May also manage others’ behavior to ensure that others also fit in with group expectations. |

## 3.0 Fairness and Respect for Other People

| 3.1 Respond to the feelings and needs of others with simple forms of assistance, sharing, and turn-taking. Understand the importance of rules that protect fairness and maintain order. | 3.1 Pay attention to others’ feelings, more likely to provide assistance, and try to coordinate personal desires with those of other children in mutually satisfactory ways. Actively support rules that protect fairness to others. |

## 4.0 Conflict Resolution

| 4.1 Can use simple bargaining strategies and seek adult assistance when in conflict with other children or adults, although frustration, distress, or aggression also occurs. | 4.1 More capable of negotiating, compromising, and finding cooperative means of resolving conflict with peers or adults, although verbal aggression may also result. |

Copyright © 2012 California Department of Education, Early Education and Support Division (formerly CDD)
# Sense of Time (History)

## 1.0 Understanding Past Events

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Recall past experiences easily and enjoy hearing stories about the past, but require adult help to determine when past events occurred in relation to each other and to connect them with current experience.</td>
<td>1.1 Show improving ability to relate past events to other past events and current experiences, although adult assistance continues to be important.</td>
</tr>
</tbody>
</table>

## 2.0 Anticipating and Planning Future Events

<p>| |</p>
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Anticipate events in familiar situations in the near future, with adult assistance.</td>
</tr>
<tr>
<td>2.1 Distinguish when future events will happen, plan for them, and make choices (with adult assistance) that anticipate future needs.</td>
</tr>
</tbody>
</table>

## 3.0 Personal History

<p>| |</p>
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Proudly display developing skills to attract adult attention and share simple accounts about recent experiences.</td>
</tr>
<tr>
<td>3.1 Compare current abilities with skills at a younger age and share more detailed autobiographical stories about recent experiences.</td>
</tr>
</tbody>
</table>

## 4.0 Historical Changes in People and the World

<p>| |</p>
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1 Easily distinguish older family members from younger ones (and other people) and events in the recent past from those that happened “long ago,” although do not readily sequence historical events on a timeline.</td>
</tr>
<tr>
<td>4.1 Develop an interest in family history (e.g., when family members were children) as well as events of “long ago,” and begin to understand when these events occurred in relation to each other.</td>
</tr>
</tbody>
</table>

Copyright © 2012 California Department of Education, Early Education and Support Division (formerly CDD)
### Sense of Place
*(Geography and Ecology)*

#### 1.0 Navigating Familiar Locations

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Identify the characteristics of familiar locations such as home and school, describe objects and activities associated with each, recognize the routes between them, and begin using simple directional language (with various degrees of accuracy).</td>
<td>1.1 Comprehend larger familiar locations, such as the characteristics of their community and region (including hills and streams, weather, common activities) and the distances between familiar locations (such as between home and school), and compare their home community with those of others.</td>
</tr>
</tbody>
</table>

#### 2.0 Caring for the Natural World

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Show an interest in nature (including animals, plants, and weather) especially as children have direct experience with them. Begin to understand human interactions with the environment (such as pollution in a lake or stream) and the importance of taking care of plants and animals.</td>
<td>2.1 Show an interest in a wider range of natural phenomena, including those not directly experienced (such as snow for a child living in Southern California), and are more concerned about caring for the natural world and the positive and negative impacts of people on the natural world (e.g., recycling, putting trash in trash cans).</td>
</tr>
</tbody>
</table>

#### 3.0 Understanding the Physical World Through Drawings and Maps

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Can use drawings, globes, and maps to refer to the physical world, although often unclear on the use of map symbols.</td>
<td>3.1 Create their own drawings, maps, and models; are more skilled at using globes, maps, and map symbols; and use maps for basic problem solving (such as locating objects) with adult guidance.</td>
</tr>
</tbody>
</table>

Copyright © 2012 California Department of Education, Early Education and Support Division (formerly CDD)
### 1.0 Exchange

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.1</strong> Understand ownership, limited supply, what stores do, give-and-take, and payment of money to sellers. Show interest in money and its function, but still figuring out the relative value of coins.</td>
<td><strong>1.1</strong> Understand more complex economic concepts (e.g., bartering; more money is needed for things of greater value; if more people want something, more will be sold).</td>
</tr>
</tbody>
</table>

Copyright © 2012 California Department of Education, Early Education and Support Division (formerly CDD)
### Science

#### Scientific Inquiry

<table>
<thead>
<tr>
<th>1.0 Observation and Investigation</th>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>Demonstrate curiosity and raise simple questions about objects and events in their environment.</td>
<td>Demonstrate curiosity and an increased ability to raise questions about objects and events in their environment.</td>
</tr>
<tr>
<td>1.2</td>
<td>Observe objects and events in the environment and describe them.</td>
<td>Observe objects and events in the environment and describe them in greater detail.</td>
</tr>
<tr>
<td>1.3</td>
<td>Begin to identify and use, with adult support, some observation and measurement tools.</td>
<td>Identify and use a greater variety of observation and measurement tools. May spontaneously use an appropriate tool, though may still need adult support.</td>
</tr>
<tr>
<td>1.4</td>
<td>Compare and contrast objects and events and begin to describe similarities and differences.</td>
<td>Compare and contrast objects and events and describe similarities and differences in greater detail.</td>
</tr>
<tr>
<td>1.5</td>
<td>Make predictions and check them, with adult support, through concrete experiences.</td>
<td>Demonstrate an increased ability to make predictions and check them (e.g., may make more complex predictions, offer ways to test predictions, and discuss why predictions were correct or incorrect).</td>
</tr>
<tr>
<td>1.6</td>
<td>Make inferences and form generalizations based on evidence.</td>
<td>Demonstrate an increased ability to make inferences and form generalizations based on evidence.</td>
</tr>
</tbody>
</table>

---

1. Other related scientific processes, such as classifying, ordering, and measuring, are addressed in the foundations for mathematics.
## 2.0 Documentation and Communication

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Record observations or findings in various ways, with adult assistance, including pictures, words (dictated to adults), charts, journals, models, and photos.</td>
<td>2.1 Record information more regularly and in greater detail in various ways, with adult assistance, including pictures, words (dictated to adults), charts, journals, models, photos, or by tallying and graphing information.</td>
</tr>
<tr>
<td>2.2 Share findings and explanations, which may be correct or incorrect, with or without adult prompting.</td>
<td>2.2 Share findings and explanations, which may be correct or incorrect, more spontaneously and with greater detail.</td>
</tr>
</tbody>
</table>

### Physical Sciences

## 1.0 Properties and Characteristics of Nonliving Objects and Materials

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Observe, investigate, and identify the characteristics and physical properties of objects and of solid and nonsolid materials (size, weight, shape, color, texture, and sound).</td>
<td>1.1 Demonstrate increased ability to observe, investigate, and describe in greater detail the characteristics and physical properties of objects and of solid and nonsolid materials (size, weight, shape, color, texture, and sound).</td>
</tr>
</tbody>
</table>

## 2.0 Changes in Nonliving Objects and Materials

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Demonstrate awareness that objects and materials can change; explore and describe changes in objects and materials (rearrangement of parts; change in color, shape, texture, temperature).</td>
<td>2.1 Demonstrate an increased awareness that objects and materials can change in various ways. Explore and describe in greater detail changes in objects and materials (rearrangement of parts; change in color, shape, texture, form, and temperature).</td>
</tr>
</tbody>
</table>
### 2.0 Changes in Nonliving Objects and Materials (continued)

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.2 Observe and describe the motion of objects (in terms of speed, direction, the ways things move), and explore the effect of own actions (e.g., pushing pulling, rolling, dropping) on making objects move.</td>
<td>2.2 Demonstrate an increased ability to observe and describe in greater detail the motion of objects (in terms of speed, direction, the ways things move), and to explore the effect of own actions on the motion of objects, including changes in speed and direction.</td>
</tr>
</tbody>
</table>

### Life Sciences

### 1.0 Properties and Characteristics of Living Things

<table>
<thead>
<tr>
<th>At around 48 months of age</th>
<th>At around 60 months of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Identify characteristics of a variety of animals and plants, including appearance (inside and outside) and behavior, and begin to categorize them.</td>
<td>1.1 Identify characteristics of a greater variety of animals and plants and demonstrate an increased ability to categorize them.</td>
</tr>
<tr>
<td>1.2 Begin to indicate knowledge of body parts and processes (e.g., eating, sleeping, breathing, walking) in humans and other animals.</td>
<td>1.2 Indicate greater knowledge of body parts and processes (e.g., eating, sleeping, breathing, walking) in humans and other animals.</td>
</tr>
<tr>
<td>1.3 Identify the habitats of people and familiar animals and plants in the environment and begin to realize that living things have habitats in different environments.</td>
<td>1.3 Recognize that living things have habitats in different environments suited to their unique needs.</td>
</tr>
<tr>
<td>1.4 Indicate knowledge of the difference between animate objects (animals, people) and inanimate objects. For example, expect animate objects to initiate movement and to have different insides than inanimate objects.</td>
<td>1.4 Indicate knowledge of the difference between animate and inanimate objects, providing greater detail, and recognize that only animals and plants undergo biological processes such as growth, illness, healing, and dying.</td>
</tr>
</tbody>
</table>

---

2. The knowledge of body parts is also addressed in the California Preschool Learning Foundations (Volume 2) for health. In science, it also includes the knowledge of body processes. Knowledge of body parts is extended to those of humans and other animals.
### 2.0 Changes in Living Things

Appendix C

Sample Environments and Materials for All Nine Domains of the California Preschool Curriculum Framework

The California Preschool Curriculum Framework lists suggestions for environments and materials that support children’s learning and development in each of the nine domains.

Appendix C is a comprehensive overview of all of these suggestions. This resource can be useful for explorations within individual domains or for working across domains. These suggestions are listed by domain as presented in the three volumes of the California Preschool Curriculum Framework. All are equally important and are not listed with priority.

California Preschool Curriculum Framework, Volume 1
- Social-Emotional Development
- Language and Literacy
- English-Language Development
- Mathematics

California Preschool Curriculum Framework, Volume 2
- Visual and Performing Arts
- Physical Development
- Health

California Preschool Curriculum Framework, Volume 3
- History–Social Science
- Science
## Sample Environments and Materials by Domain

<table>
<thead>
<tr>
<th></th>
<th></th>

<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Challenging and developmentally appropriate materials</td>
<td>The daily schedule for adult-child and child-child interactions</td>
<td>Provide safe havens where the child does not have to speak to anyone</td>
<td>Enrich the environment with objects and materials that promote mathematical growth</td>
<td>Dance and movement require only space in a room and benefit further from music and costumes of modest scope and cost</td>
<td>Teachers promote optimal physical development when they provide children with positive encouragement and quality instruction (both indirect and direct)</td>
<td>Establish a physical learning environment designed for children’s initiative</td>
<td>Extended projects that are centered on a topic in history or social science and emerge from children’s interests and inquiries</td>
<td>Be thoughtful about what objects and materials to include in the environment</td>
</tr>
<tr>
<td>Ample supply of materials</td>
<td>Large-group space</td>
<td>Establish consistent classroom routines and procedures</td>
<td>Integrate math-related materials into all interest areas in the classroom</td>
<td>Many things handy in a preschool environment can serve as props for dramatic play and drama, where imagination can turn almost anything into something else</td>
<td>The immediate physical environment is a powerful influence on children’s physical development</td>
<td>Provide safe, inviting learning environments and appropriate supervision of children</td>
<td>Reflective of diversity</td>
<td>Provide a variety of natural materials to observe and investigate</td>
</tr>
<tr>
<td>Organized learning areas</td>
<td>Small-group space</td>
<td>Provide space in the classroom environment for children to interact in small groups and one-on-one</td>
<td>Provide real-life settings in the preschool environment</td>
<td>Visual arts largely involve drawing, painting, and creating two- and three-dimensional works of art</td>
<td>Indoor and outdoor play environments should include a variety of appropriately sized equipment that promotes both gross and fine motor development</td>
<td>Maintain a clean, healthy, and sanitary environment</td>
<td>A balance between child choice and adult direction</td>
<td>Include objects and materials that allow for creativity and open-ended investigation</td>
</tr>
</tbody>
</table>
## Sample Environments and Materials by Domain

<table>
<thead>
<tr>
<th></th>
<th></th>

<tbody>
<tr>
<td>Appropriately sized small-group activities</td>
<td>A space to display family-related items</td>
<td>Provide space where teachers and other adults can interact individually and in small groups with children who are learning English</td>
<td>Use materials and objects that are relevant and meaningful to the children in your group</td>
<td>It is important that music not be limited to prerecorded songs</td>
<td>Learning is most meaningful when the environment and materials reflect and accommodate children’s individual interests, backgrounds, and present abilities</td>
<td>Have supplies available and accessible to promote routine health practices</td>
<td>A variety of materials to support children’s inquiry-based learning and practice in the skills of social science</td>
<td>Include living things in the preschool environment</td>
</tr>
<tr>
<td>A variety of small-group activities</td>
<td>Centers or interest areas</td>
<td>Provide linguistically and culturally appropriate materials</td>
<td>Use children’s books to explore mathematics with children</td>
<td>Adaptive materials may be necessary to ensure that activities are accessible for all children</td>
<td>Take time to build safety into both indoor and outdoor play environments</td>
<td>Provide stimulating and developmentally appropriate materials in interest areas for children’s use during dramatic play</td>
<td>Materials that connect children to times and places</td>
<td>Include scientific tools for observation, measurement, and documentation</td>
</tr>
<tr>
<td>Aesthetically appealing</td>
<td>Prepare materials ahead of time for maximizing language and literacy</td>
<td>Make clear signs and explicit picture cues for interest areas</td>
<td>Be intentional and mindful in setting up and using the physical environment</td>
<td>Materials that may serve as props for pretend play, or costumes that reflect the cultural backgrounds of the children in the preschool program, are good to have on hand</td>
<td>Movement experiences should include exploration, discovery, and appreciation of the natural environment</td>
<td>Provide furnishings and utensils appropriate for children’s size and abilities</td>
<td>Real experiences with nature and other environmental education materials</td>
<td>Make scientific tools available throughout the preschool environment</td>
</tr>
</tbody>
</table>

Appendix D

Sample Interactions and Strategies for All Nine Domains of the California Preschool Curriculum Framework

The California Preschool Curriculum Framework lists suggestions for interactions and strategies that support children’s learning and development in each of the nine domains.

Appendix D is a comprehensive overview of all of these suggestions. This resource can be useful for explorations within individual domains or for working across domains. These suggestions are listed by domain as presented in the three volumes of the California Preschool Curriculum Framework. All are equally important and are not listed with priority.

California Preschool Curriculum Framework, Volume 1
- Social-Emotional Development
- Language and Literacy
- English-Language Development
- Mathematics

California Preschool Curriculum Framework, Volume 2
- Visual and Performing Arts
- Physical Development
- Health

California Preschool Curriculum Framework, Volume 3
- History–Social Science
- Science
## Domain: Social-Emotional Development

### Strand: Self

#### Substrand: Self-Awareness
- Designate learning areas to help children select preferred sites

#### Substrand: Self-Regulation
- Use appropriately stimulating aesthetic elements
- Observe the levels of social and emotional understanding that children already have
- Model behavior and attitudes

#### Substrand: Social and Emotional Understanding
- Observe individual children attentively
- Eliminate or reduce background noise
- Label the emotions people express and communicate with children about what may be provoking those feelings
- Label children’s feelings

#### Substrand: Empathy and Caring
- Incorporate artwork and play materials that reflect children’s home cultures
- Observe individual children closely
- Generalize from specific examples to broader realities
- Prompt and guide desired behavior
- Observe individual children while they pursue their own activities

#### Substrand: Initiative in Learning
- Describe aloud for children observations of what they do and express
- Model behavior and attitudes toward others
- Discuss characteristics openly
- Acknowledge and express appreciation for children’s empathetic responses
- Model curiosity and enthusiasm when you learn new things

Faculty Initiative Project Instructional Guide for the California Preschool Curriculum Framework, Volume 3
DRAFT April 1, 2018 – Appendix D – Sample Interactions and Strategies by Domain, Strand, and Substrand
CDE/Early Education and Support Division and WestEd Center for Child and Family Studies
*May be duplicated for educational purposes only.*
### Domain: English-Language Development

#### Strand: Reading

- **Substrand:** Children Demonstrate Appreciation and Enjoyment of Reading and Literature
  - Expose children enthusiastically to all types of print
  - Connect literacy to the home culture and community
  - Build on existing strengths
  - Use read-alouds

- **Substrand:** Children Show an Increasing Understanding of Book Reading
  - Connect print material to children’s interests
  - Invite children to discuss and react to story narratives
  - Encourage children to dictate, retell, and create their own books

- **Substrand:** Children Demonstrate Understanding of Print Conventions
  - Point out print features during shared reading
  - Point out print features during shared writing
  - Equip all learning areas with books and writing materials
  - Help children create their own books

- **Substrand:** Children Demonstrate Awareness That Print Carries Meaning
  - Point out the meaning of print around the classroom and in the community
  - Have lots of clear print in multiple language in the environment
  - Engage children in purposeful writing
  - Use real objects and emphasize syllables and phonemes

- **Substrand:** Children Demonstrate Progress in Their Knowledge of the Alphabet in English
  - Have children identify the letters of their own names in any language
  - Provide English alphabet letters in multiple forms
  - Read alphabet books in multiple languages
  - Identify and practice English sounds that do not exist in the home language

- **Substrand:** Children Demonstrate Phonological Awareness
  - Sing silly English songs that can be phonetically manipulated
  - Sing songs, recite poems, clap rhythms, and do finger plays that emphasize rhymes daily
  - Use real objects and emphasize syllables and phonemes

*(California Preschool Curriculum Framework, Volume 1, pp. 206-218)*

**Foundation:**

**Compare, Order, and Measure Objects**

- Provide opportunities to promote measurement concepts in the environment
- Observe preschool children’s measurement concepts in everyday play and routines
- Facilitate and reinforce measurement concepts in everyday play and routines
  - Build preschool children’s descriptive and comparison vocabulary
  - Ask questions
  - Challenge preschool children to use measurement to solve problems
- Provide opportunities to compare and order objects
- Use literature to illustrate measurement concepts
- Provide small-group activities using standard and nonstandard measurement
- Encourage preschool children to estimate measurement
- Encourage preschool children to record and document what they have measured

**Foundation:** Promoting Mathematical Reasoning and Problem Solving

- Identify and create opportunities for mathematical reasoning
- Pose meaningful questions and challenge preschool children’s thinking
- Support preschool children in reasoning mathematically
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Encourage engagement with art at all levels</td>
<td>Provide children simply with a means and place to make marks (e.g. a crayon and paper), and they will begin with the same basic images</td>
<td>Support exploration and discovery</td>
</tr>
<tr>
<td>Provide opportunities for children to reflect on their own work and sometimes their own actions, through communication with peers and the teacher, and to reflect on the works of peers in encouraging and positive ways</td>
<td>Encourage communication around shape and form to aid children’s drawing skills</td>
<td>Give children the time and space needed to explore creativity</td>
</tr>
<tr>
<td>Respect individual developmental, cultural, and linguistic differences, and encourage children to respect them</td>
<td>Help children acquire painting skills through practice with the tools</td>
<td>Provide a comfortable environment in which children can practice art</td>
</tr>
<tr>
<td></td>
<td>Stimulate children’s interest in color and application of paint through other forms of painting</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Create opportunities for children to work with dough, clay, or wet sand</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Provide only the <em>malleable</em> material, without tools, during children’s initial explorations of sculpting so that children have a chance to explore through touch</td>
<td></td>
</tr>

Appendix E

Overarching Principles and Domain Guiding Principles for All Domains of the California Preschool Curriculum Framework

All three volumes of the preschool curriculum framework were developed with eight overarching principles in mind—principles that are grounded in early childhood research and practice. These principles emphasize individually, culturally, and linguistically responsive learning experiences and environments for young children.

Additionally, for each domain of the three volumes of the California Preschool Curriculum Framework, there is a section listing guiding principles specifically for that domain. These principles are research-based and follow guidelines for developmentally appropriate practice.

Appendix E is a comprehensive overview, which includes the eight overarching principles as well as the domain guiding principles for each of the nine domains. This resource can be useful for explorations within individual domains or for working across domains. These principles are listed as presented in the three volumes of the California Preschool Curriculum Framework. All are equally important and are not listed with priority.

California Preschool Curriculum Framework, Volume 1
- Social-Emotional Development
- Language and Literacy
- English-Language Development
- Mathematics

California Preschool Curriculum Framework, Volume 2
- Visual and Performing Arts
- Physical Development
- Health

California Preschool Curriculum Framework, Volume 3
- History–Social Science
- Science
### Overarching Principles

<table>
<thead>
<tr>
<th>Overarching Principles</th>
<th>Relationships are central</th>
<th>Play is a primary context for learning</th>
<th>Learning is integrated</th>
<th>Intentional teaching enhances children's learning experiences</th>
<th>Family and community partnerships create meaningful connections</th>
<th>Individualization of learning includes all children</th>
<th>Responsiveness to culture and language supports children's learning</th>
<th>Time for reflection and planning enhances teaching</th>
</tr>
</thead>
</table>

### Social-Emotional Development Domain Guiding Principles

- Support social-emotional development with intentionality
- Attend to the impact of overall program design on social-emotional development
- Utilize curriculum practices that support healthy social-emotional development
- Encourage play-based active learning

### Language and Literacy Domain Guiding Principles

- Language and literacy work together
- Children say or sign what they hear or see
- Children learn everywhere
- Children learn best from experiences that are interest, useful, and fun
- Celebrate and support the individual
- Connect school and home
- Create a culturally sensitive environment
- Encourage children to take a turn
- Make thoughts more explicit to children by thinking out loud
- Support Curiosity and confidence
- Create literacy-rich environments
- Observe children

### English-Language Development Domain Guiding Principles

- Families matter
- Recognize existing language and literacy strength in the home language
- Respect cultural values and behaviors reflected in the child’s language and communication
- Allow the child use of the home language to have immediate access to the entire curriculum, concept development, and high levels of interaction
- Support English-language development across all domains
- Use language as a meaningful tool to communicate
- Make children’s learning interesting and fun for English learners
- Accept code switching as normal
- Give preschool English learners time
- Allow for children’s voluntary participation
### Overarching Principles and Domain Guiding Principles

#### Mathematics Domain Guiding Principles
- Build on preschool children’s natural interest in mathematics and their intuitive and informal mathematical knowledge
- Encourage inquiry and exploration to foster problem solving and mathematical reasoning
- Use everyday activities as natural vehicles for developing preschool children’s mathematical knowledge
- Introduce mathematical concepts through intentionally planned experiences
- Provide a mathematically rich environment
- Provide an environment rich in language, and introduce preschool children to the language of mathematics
- Support English learners in developing mathematical knowledge as they concurrently acquire English
- Observe preschool children and listen to them
- Recognize and support the individual
- Establish a partnership with parents and other caregivers in supporting children’s learning of mathematics

#### Visual and Performing Arts Domain Guiding Principles
- The arts are inclusive of all children
- The arts a language that is common to all
- The arts promote dispositions for learning
- Children make their own meaning
- Children are capable of creating original art in all its forms
- Children learn about human connections, beauty, and appreciation of the arts
- The child’s work is play
- Children are active learners who thrive when challenged appropriately
- Arts experiences for preschoolers are more about process than product
- The arts reinforce the integrated nature of learning
- Cultural competence is approached through art
- The arts are motivating and engaging for learners
- Art can nurture the nurturer
- The arts provide a unique means for families to interact

#### Overarching Principles

#### History–Social Science Domain Guiding Principles

- **Build a cooperative, inclusive preschool community**
- **Create activities that will actively engage children’s social skills and understanding**
- **Affirm children’s home cultures, experiences, and values**
- **Encourage children’s social curiosity**
- **Model social behavior and attitudes with explanations**
- **Actively teach and practice the essential skills of democratic participation**
- **Encourage children to incorporate their knowledge of adult roles and occupations into their dramatic play**
- **Observe and converse with children during play in order to learn about their current understanding of time and history**
- **Help children deepen their own sense of place**
- **Nurture children’s sense of wonder about nature**

#### Science Domain Guiding Principles

- **The preschool environment supports children’s curiosity and encourages inquiry and experimentation**
- **Content of inquiry is developmentally appropriate and builds on children’s prior experiences**
- **Scientific inquiry experiences are interesting and engaging for children and teachers**
- **Children explore scientific concepts directly through active, hands-on, minds-on playful experiences**
- **Children explore scientific concepts in depth through multiple, related learning experiences over time**
- **Children construct knowledge through social interactions with peers and adults**
- **Children use language and other forms of communication to express their thoughts, describe observations, and document their work**
- **Teachers support children who are English learners in understanding and communicating scientific knowledge and skills**
- **Science is embedded in children’s daily activities and play and provides a natural vehicle for integrating mathematics, literacy, and other content areas**
- **Individual differences are recognized, and all children are included and supported**
- **The preschool environment, home, and community are connected through science**
