Physical Development: Linking Preschool Learning Foundations and the Kindergarten Content Standards Related to Physical Development

Focus Statement

Students become familiar with the California Department of Education’s Physical Education Model Content Standards for California Public Schools, Kindergarten Through Grade Twelve (2006) and explore their relationship to the physical development foundations in the California Preschool Learning Foundations, Volume 2.

Curriculum Alignment Project (CAP) Student Learning Outcomes

The Curriculum Alignment Project’s (CAP) lower division eight courses and student learning outcomes are mapped onto each instructional guide learning experience. See Appendix A for the specific student learning outcomes, objectives, and examples of course content and topics for the courses listed below.

- Child Growth and Development
- Child, Family and Community
- Introduction to Curriculum
- Principles and Practices of Teaching Young Children
- Observation and Assessment
- Health, Safety and Nutrition
- Teaching in a Diverse Society
- Practicum-Field Experience

Instructional Methodologies

- Jigsaw reading
- Lecture
- Pairs or small group work
- Peer review and feedback
- Reflection paper
- Reflective discussion—large group
California Early Childhood Educator Competency Areas to Consider

The Faculty Initiative Project will be undertaking a comprehensive process in the future to map the content of the instructional guides to the California Department of Education, Child Development Division’s California Early Childhood Educator Competencies. “The Competency Areas to Consider” below are listed in this instructional guide as a preliminary exploration of how particular competency areas might be addressed through these learning experiences.

- Child Development and Learning
- Culture, Diversity, and Equity
- Family and Community Engagement
- Observation, Screening, Assessment, and Documentation
- Learning Environments and Curriculum
- Health, Safety, and Nutrition
- Leadership in Early Childhood Education
- Professionalism
- Administration and Supervision
Physical Development: Linking Preschool Learning Foundations and the Kindergarten Content Standards Related to Physical Development

Before You Start

In this learning experience, students are introduced to the California Department of Education’s Physical Education Model Content Standards for California Public Schools, Kindergarten Through Grade Twelve (2006). It is important for students to be aware of these content standards and the ways in which they align with the preschool learning foundations for physical development.

Students will be reviewing the content standards for this learning experience, so you may want to remind students that they can download the standards from the California Department of Education’s Web site (www.cde.ca.gov/be/st/ss/).

Handout 1, following this learning experience, is a sample of a grid that students can use when determining relationships between the standards and the foundations. An electronic version of the handout will be available when this instructional guide is online at www.wested.org/facultyinitiative.

Information Delivery

Students will be asked to review the physical development domain foundations in the California Preschool Learning Foundations, Volume 2 and the Physical Education Model Content Standards for California Public Schools, Kindergarten Through Grade Twelve (2006).

The following is a summary of the five overarching model content standards for kindergarten (as well as the other elementary grades and middle school) and the concepts and skills for each standard:

1. Students demonstrate the motor skills and movement patterns needed to perform a variety of physical activities.
   - Movement Concepts
   - Body Management
   - Locomotor Movement
   - Manipulative Skills
2. Students demonstrate knowledge of movement concepts, principles, and strategies that apply to the learning and performance of physical activities.
   - Movement Concepts
   - Body Management
   - Locomotor Movement
   - Manipulative Skills

3. Students assess and maintain a level of physical fitness to improve health and performance.
   - Fitness Concepts
   - Aerobic Capacity
   - Muscular Strength/Endurance
   - Flexibility
   - Body Composition
   - Assessment

4. Students demonstrate knowledge of physical fitness concepts, principles, and strategies to improve health and performance.
   - Fitness Concepts
   - Aerobic Capacity
   - Muscular Strength/Endurance
   - Flexibility
   - Body Composition

5. Students demonstrate and utilize knowledge of psychological and sociological concepts, principles, and strategies that apply to the learning and performance of physical activity.
   - Self-Responsibility
   - Social Interaction
   - Group Dynamics
This information can be reviewed prior to or during class, and can be presented as a lecture or through assigned reading.

**Active Learning**

**Getting it started**

Have students review the kindergarten content standards (pp. 1–4) of the *Physical Education Model Content Standards for California Public Schools, Kindergarten Through Grade Twelve*.

**Keeping it going**

Have the students compare the standards with the physical development strands, substrands, and foundations and note where there are connections. They can do this by marking an X in the Handout 1 grid where they see a link. They can also write a few explanatory notes in the grid boxes. Students could do this comparison individually or in pairs or small groups. Depending on the size of your class and the amount of time allotted for this learning experience, you may choose to assign specific combinations of foundations and standards to individual or groups of students.

**Putting it together**

If students have worked in groups, have the groups present their grids to the rest of the class. Ask if there are other connections that may not have been noted or if there are questions about any of the relationships indicated.

If students have worked individually and compared all the standards with the foundations, have them compare their grids with another student. Have them discuss any differences in their grids.

**Another approach/way**

Instead of completing a grid, have students write a reflection paper that addresses the questions in the reflection section of this learning experience.

**Reflection**

Conclude the session by having the class discuss the following questions:

- What are the purposes of the preschool learning foundations and the kindergarten content standards?
- Where do you see similarities and differences between the physical development foundations and the physical...
education model content standards for kindergarten? What might be some reasons for these similarities and differences?

- Why is it important for preschool teachers to be aware of the kindergarten content standards?
- What are some general ways that preschool teachers and kindergarten teachers can use the preschool physical development foundations and the kindergarten physical education model content standards in their classroom practices?

Deeper Understanding

The *California Preschool Learning Foundations, Volume 2* cites the recommendations for physical activity by the National Association for Sport and Physical Education (NASPE) as the current best practice for preschool programs. NASPE has developed national standards and guidelines as well as position statements related to physical activity, physical education, and professional development and conduct.

The following are a few of the position statements on the NASPE Web site (http://www.aahperd.org/naspe/):

- Physical Education is Critical to Educating the Whole Child
- Looking at Physical Education from a Developmental Perspective: A Guide to Teaching
- Comprehensive School Physical Activity Programs

NASPE also has published the second edition of *Active Start: A Statement of Physical Activity Guidelines for Children from Birth to Age 5, 2nd Edition*. A summary of the guidelines for infants, toddlers, and preschoolers are on the Web site description of the publication.

Ask students to review one or more documents from NASPE and prepare a presentation or write a paper that relates key points from the document to the physical development foundations or the kindergarten content standards.
